

## Accreditation Council for Graduate Medical Education

### General Surgery Case Logs

#### National Data Report

**Prepared by:** Department of Applications and Data Analysis

I. National Resident Statistics Main Table

- A. The main table provides a national picture of educational experiences. The report is ideal for establishing and assessing national policy related to resident practical experiences. Data is broken out by role (surgeon, assistant, etc).
- B. Descriptive statistics have been carefully chosen to provide the most useful information for judging performance at the national level.
  - i. "Natl Res AVE" - The national average describes the mean number of procedures performed per resident in the nation.
  - ii. "Natl Res STD" - The standard deviation indicates how tightly the scores are clustered around the mean in a set of data.
  - iii. "Natl Res MAX" - This statistics represents the maximum value seen among procedure counts.
  - iv. "Natl Res SUM" - This statistics represents the sum of all procedure counts.

II. National Benchmark Table for Program Statistics

The table displays selected percentile and standard deviation benchmarks of program averages. For example, a score at the 10th percentile indicates that 10% of programs achieved averages less than the value while the remaining 90% achieved more than the value.

**GENERAL SURGERY: NATIONAL RESIDENT REPORT (Main Table)**  
**Reporting Period: Total Experience of Residents Completing Programs in 2009-2010**  
**Residency Review Committee for General Surgery**
