# Proposed ACGME Program Requirements for Graduate Medical Education in Sports Medicine

# Common Program Requirements (One-Year Fellowship) are in BOLD

Where applicable, text in italics describes the underlying philosophy of the requirements in that section. These philosophic statements are not program requirements and are therefore not citable.

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (One-Year Fellowship) are intended to explain the differences.

#### Introduction

Int.A.

Fellowship is advanced graduate medical education beyond a core residency program for physicians who desire to enter more specialized practice. Fellowship-trained physicians serve the public by providing subspecialty care, which may also include core medical care, acting as a community resource for expertise in their field, creating and integrating new knowledge into practice, and educating future generations of physicians. Graduate medical education values the strength that a diverse group of physicians brings to medical care.

Fellows who have completed residency are able to practice independently in their core specialty. The prior medical experience and expertise of fellows distinguish them from physicians entering into residency training. The fellow's care of patients within the subspecialty is undertaken with appropriate faculty supervision and conditional independence. Faculty members serve as role models of excellence, compassion, professionalism, and scholarship. The fellow develops deep medical knowledge, patient care skills, and expertise applicable to their focused area of practice. Fellowship is an intensive program of subspecialty clinical and didactic education that focuses on the multidisciplinary care of patients. Fellowship education is often physically, emotionally, and intellectually demanding, and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, residents, fellows, faculty members, students, and all members of the health care team.

 In addition to clinical education, many fellowship programs advance fellows' skills as physician-scientists. While the ability to create new knowledge within medicine is not exclusive to fellowship-educated physicians, the fellowship experience expands a physician's abilities to pursue hypothesis-driven scientific inquiry that results in contributions to the medical literature and patient care. Beyond the clinical subspecialty expertise achieved, fellows develop mentored relationships built on an infrastructure that promotes collaborative research.

Int.B. Definition of Subspecialty

Sports medicine fellowships provide advanced education to allow fellows to acquire competence in preventing, diagnosing, and treating injuries related to participation in sports and/or exercise. In addition to the study of those fields that focus on prevention, diagnosis, treatment, and management of injuries, sports medicine deals with illnesses and diseases that might stem from and have effects on health and physical performance. Fellows also develop skills in the evaluation and management of those illnesses and diseases that might have an effect on health and athletic performance.

# Int.C. Length of Educational Program

The educational program in sports medicine must be 12 months in length. (Core)\*

#### I. Oversight

#### I.A. Sponsoring Institution

The Sponsoring Institution is the organization or entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education consistent with the ACGME Institutional Requirements.

When the Sponsoring Institution is not a rotation site for the program, the most commonly utilized site of clinical activity for the program is the primary clinical site.

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, a federally qualified health center, a surgery center, an academic and private single-specialty clinic, or an educational foundation.

I.A.1. The program must be sponsored by one ACGME-accredited Sponsoring Institution. (Core)

I.B. Participating Sites

A participating site is an organization providing educational experiences or educational assignments/rotations for fellows.

The program, with approval of its Sponsoring Institution, must designate a primary clinical site. (Core)

The Sponsoring Institution must also sponsor an Accreditation Council for Graduate Medical Education (ACGME)-accredited

86 I.B.1.a) 

I.B.1.

88		residency program in emergency medicine, family medicine,
89		pediatrics, or physical medicine and rehabilitation. (Core)
90		
91	I.B.1.a).(1)	The sports medicine program must function as an integral
92		part of an ACGME-accredited residency program in
93		emergency medicine, family medicine, pediatrics, or
94		physical medicine and rehabilitation. (Core)
95	100	There was the a program letter of a meaning (DLA) hetween the
96 07	I.B.2.	There must be a program letter of agreement (PLA) between the
97 98		program and each participating site that governs the relationship between the program and the participating site providing a required
99		assignment. (Core)
100		assignment.
101	I.B.2.a)	The PLA must:
102	1.Β.Σ.α)	THE LA HUSE.
103	I.B.2.a).(1)	be renewed at least every 10 years; and, (Core)
104		,,,,,,,,
105	I.B.2.a).(2)	be approved by the designated institutional official
106	, , ,	(DIO). (Core)
107		· ,
108	I.B.3.	The program must monitor the clinical learning and working
109		environment at all participating sites. (Core)
110		
111	I.B.3.a)	At each participating site there must be one faculty member,
112		designated by the program director, who is accountable for
113		fellow education for that site, in collaboration with the
114		program director. <sup>(Core)</sup>
115		

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

117	I.B.4.	The program director must submit any additions or deletions of
118		participating sites routinely providing an educational experience,
119		required for all fellows, of one month full time equivalent (FTE) or
120		more through the ACGME's Accreditation Data System (ADS). (Core)
121		

122

123

124

125

126 127 I.C. The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. (Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

	ao notea i	v.o. 1.0/1.(0).
128		
129	I.D.	Resources
130		
131	I.D.1.	The program, in partnership with its Sponsoring Institution, must
132		ensure the availability of adequate resources for fellow education.
133		(Core)
134		
135	I.D.1.a)	There must be an identifiable sports medicine clinic that offers
136		continuing care to patients who seek consultation regarding
137		sports-related or exercise-related health problems. (Core)
138		
139	I.D.1.a).(1)	The sports medicine clinic must have up-to-date diagnostic
140		imaging and functional rehabilitation services available and
141		accessible to clinic patients. (Core) (Detail)
142		
143	I.D.1.a).(2)	Consultation in medical and surgical specialties and
144		subspecialties must be readily available. (Core) (Detail)
145		
146	I.D.1.b)	The program must have access to sporting events, team sports,
147		and mass-participation events. (Core)
148		
149	I.D.1.c)	There must be an acute care facility that provides access to the
150		full range of services typically found in an acute care general
151		hospital. (Core)
152		
153	I.D.2.	The program, in partnership with its Sponsoring Institution, must
154		ensure healthy and safe learning and working environments that
155		promote fellow well-being and provide for: (Core)
156		
157	I.D.2.a)	access to food while on duty; (Core)
158		
159	I.D.2.b)	safe, quiet, clean, and private sleep/rest facilities available
160		and accessible for fellows with proximity appropriate for safe
161		patient care, if the fellows are assigned in-house call; (Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care;

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

I.D.2.d) security and safety measures appropriate to the participating site: and. (Core)

I.D.2.e) accommodations for fellows with disabilities consistent with the Sponsoring Institution's policy. (Core)

I.D.3. Fellows must have ready access to subspecialty-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities. (Core)

I.D.4. The program's educational and clinical resources must be adequate to support the number of fellows appointed to the program. (Core)

 I.D.4.a) There must be a patient population that includes patients of all ages and physical abilities, as well as each gender, and is adequate in number and variety to meet the needs of the educational program. (Core)

I.E. A fellowship program usually occurs in the context of many learners and other care providers and limited clinical resources. It should be structured to optimize education for all learners present.

 I.E.1. Fellows should contribute to the education of residents in core programs, if present. (Core)

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

**II. Personnel** 

II.A. Program Director

II.A.1. There must be one faculty member appointed as program director with authority and accountability for the overall program, including compliance with all applicable program requirements. (Core)

II.A.1.a) The Sponsoring Institution's Graduate Medical Education Committee (GMEC) must approve a change in program director. (Core)

II.A.1.b) Final approval of the program director resides with the Review Committee. (Core)

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

II.A.2. The program director must be provided with support adequate for administration of the program based upon its size and configuration.

II.A.2.a)

At a minimum, the program director must be provided with the salary support required to devote 20 percent FTE (at least eight hours per week) of non-clinical time to the administration of the program. (Core)

II.A.3. Qualifications of the program director:

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; (Core)

II.A.3.b)

must include current certification in the subspecialty for which they are the program director by the American Board of Emergency Medicine, Family Medicine, Internal Medicine, Pediatrics, or Physical Medicine and Rehabilitation or by the American Osteopathic Board of Emergency Medicine, Family Physicians, Internal Medicine, Neuromusculoskeletal Medicine,

232 233 234		Pediatrics, or Physical Medicine and Rehabilitation, or subspecialty qualifications that are acceptable to the Review Committee; and, (Core)
235		
236	II.A.3.c)	must demonstrate devotion of at least 10 hours per week, on
237	·	average, of his or her professional effort to administering the
238		program, and teaching and supervising the sports medicine
239		fellows. (Core)-(Detail)
240		
241	II.A.4.	Program Director Responsibilities
242		
243		The program director must have responsibility, authority, and
244		accountability for: administration and operations; teaching and
245		scholarly activity; fellow recruitment and selection, evaluation, and
246		promotion of fellows, and disciplinary action; supervision of fellows;
247		and fellow education in the context of patient care. (Core)
248		
249	II.A.4.a)	The program director must:
250		
251	II.A.4.a).(1)	be a role model of professionalism; (Core)
252		

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

253 254

258

255 256 257

II.A.4.a).(2)

II.A.4.a).(3)

design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; (Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

259

260261262

263

administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; (Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to

others, yet remains accountable. The leadership team may include physician and non-
physician personnel with varying levels of education, training, and experience.

264 265	II.A.4.a).(4)	develop and oversee a process to evaluate candidates
266	-,(,	prior to approval as program faculty members for
267		participation in the fellowship program education and
268		at least annually thereafter, as outlined in V.B.; (Core)
269		
270	II.A.4.a).(5)	have the authority to approve program faculty
271		members for participation in the fellowship program
272		education at all sites; (Core)
273 274	II.A.4.a).(6)	have the authority to remove program feaulty
274	II.A.4.a).(b)	have the authority to remove program faculty members from participation in the fellowship program
276		education at all sites; (Core)
277		cadoation at an sites,
278	II.A.4.a).(7)	have the authority to remove fellows from supervising
279	, , ,	interactions and/or learning environments that do not
280		meet the standards of the program; (Core)
281		

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

	the program director controls who is teaching the residents.		
282 283 284 285	II.A.4.a).(8)	submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; (Core)	
286 287 288 289	II.A.4.a).(9)	provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); (Core)	
290 291 292 293 294 295	II.A.4.a).(10)	provide a learning and working environment in which fellows have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; (Core)	
296 297 298 299	II.A.4.a).(11)	ensure the program's compliance with the Sponsoring Institution's policies and procedures related to grievances and due process; (Core)	
300 301 302 303 304	II.A.4.a).(12)	ensure the program's compliance with the Sponsoring Institution's policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a fellow; (Core)	

305

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

306 307

308

309

310 311

312

313

II.A.4.a).(13) ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; (Core) II.A.4.a).(13).(a) Fellows must not be required to sign a noncompetition guarantee or restrictive covenant. (Core) II.A.4.a).(14) document verification of program completion for all graduating fellows within 30 days; (Core) provide verification of an individual fellow's II.A.4.a).(15)

314 315 316

317 318

319 320 321

> Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

322

323 324

326 327 328

325

and. (Core)

requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program Director's Guide to the Common Program

completion upon the fellow's request, within 30 days;

Requirements. (Core)

II.B. **Faculty** 

> Faculty members are a foundational element of graduate medical education - faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

345 Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of 346 347 the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty 348 members create an effective learning environment by acting in a 349 professional manner and attending to the well-being of the fellows and 350 351 themselves. 352 Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment or salary support. 353 354 II.B.1. For each participating site, there must be a sufficient number of 355 faculty members with competence to instruct and supervise all fellows at that location. (Core) 356 357 358 II.B.1.a) In addition to the sports medicine program director, there must be 359 at least one sports medicine faculty member with current 360 subspecialty certification in sports medicine by the American Board of Emergency Medicine, Family Medicine, Internal 361 Medicine, Pediatrics, or Physical Medicine and Rehabilitation, or 362 363 the American Osteopathic Board of Emergency Medicine, Family Physicians, Internal Medicine, Neuromusculoskeletal Medicine, 364 Pediatrics, or Physical Medicine and Rehabilitation. (Core) 365 366 367 II.B.1.b) The faculty must include at least one board-certified orthopaedic surgeon who is engaged in the operative management of sports 368 369 injuries and other conditions and who is readily available to teach and provide consultation to the fellows. (Detail) 370 371 372 II.B.2. **Faculty members must:** 373 374 II.B.2.a) be role models of professionalism; (Core) 375 demonstrate commitment to the delivery of safe, quality, 376 II.B.2.b) 377 cost-effective, patient-centered care; (Core) 378 Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve. 379 demonstrate a strong interest in the education of fellows; (Core) 380 II.B.2.c) 381 382 devote sufficient time to the educational program to fulfill II.B.2.d) their supervisory and teaching responsibilities: (Core) 383 384 administer and maintain an educational environment 385 II.B.2.e) conducive to educating fellows; and, (Core) 386

388 389	II.B.2.f)	pursue faculty development designed to enhance their skills (Core)
390		
391	II.B.3.	Faculty Qualifications
392		
393	II.B.3.a)	Faculty members must have appropriate qualifications in
394	,	their field and hold appropriate institutional appointments.
395		(Core)
396		
397	II.B.3.b)	Subspecialty physician faculty members must:
398		Canopoolariy priyorotan radany momboro madii
399	II.B.3.b).(1)	have current certification in the subspecialty by the
400		American Board of Emergency Medicine, Family
401		Medicine, Internal Medicine, Pediatrics, or Physical
402		Medicine and Rehabilitation, or the American
403		Osteopathic Board of Emergency Medicine, Family
404		Physicians, Internal Medicine, Neuromusculoskeletal
405		Medicine, Pediatrics, or Physical Medicine and
406		Rehabilitation, or possess qualifications judged
407		acceptable to the Review Committee. (Core)
		acceptable to the Review Committee.
408	II D 2 -\	Annuary physician foculty manulage who would have in
409	II.B.3.c)	Any non-physician faculty members who participate in
410		fellowship program education must be approved by the
411		program director. <sup>(Core)</sup>
412		

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

 II.B.3.d)

Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee. (Core)

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. (Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and

assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

429		
430 431	II.B.4.a)	Core faculty members must be designated by the program director. (Core)
432		
433	II.B.4.b)	Core faculty members must complete the annual ACGME
434	,	Faculty Survey. (Core)
435		
436	II.B.4.c)	The program must maintain a ratio of at least one core faculty
437		member to every two fellows appointed to the program. (Core)
438		
439	II.C.	Program Coordinator
440		
441	II.C.1.	There must be administrative support for program coordination. (Core)
442		
443	II.D.	Other Program Personnel
444		
445		The program, in partnership with its Sponsoring Institution, must jointly
446		ensure the availability of necessary personnel for the effective
447		administration of the program. (Core)
448		
449	II.D.1.	The sports medicine team must include coaches and certified athletic
450		trainers with whom the fellows interact. (Detail)
451		
452	II.D.2.	Qualified staff members in behavioral science, clinical imaging, clinical
453		pharmacology, exercise physiology, nutrition, and physical therapy must
454		be available to provide consultations and to assist with teaching fellows.
455		(Detail)
456		

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

# III. Fellow Appointments

 III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of

470 471 472	Canada (CFPC)-accredited residency program located in Canada.		
		Eligibility for ABMS or AOA Board certification may not be raining. Applicants must be notified of this at the time of in II.A.4.a).(9).	
473 474 475 476 477 478	III.A.1.a)	Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. (Core)	
479 480 481 482 483	III.A.1.b)	Prior to appointment in the program, fellows should have completed a residency program in emergency medicine, family medicine, internal medicine, pediatrics, or physical medicine and rehabilitation that satisfies III.A.1. (Core)	
484	III.A.1.c)	Fellow Eligibility Exception	
485 486 487 488 489		The Review Committee for Emergency Medicine, Family Medicine, Pediatrics, and Physical Medicine and Rehabilitation will allow the following exception to the fellowship eligibility requirements:	
490 491 492 493 494 495 496 497 498 499 500 501 502 503 504 505 506 507 508	III.A.1.c).(1)	An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions: (Core)	
	III.A.1.c).(1).(a)	evaluation by the program director and fellowship selection committee of the applicant's suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and, (Core)	
	III.A.1.c).(1).(b)	review and approval of the applicant's exceptional qualifications by the GMEC; and,	
508 509 510 511 512	III.A.1.c).(1).(c)	verification of Educational Commission for Foreign Medical Graduates (ECFMG) certification. (Core)	
512 513 514 515 516 517	III.A.1.c).(2)	Applicants accepted through this exception must have an evaluation of their performance by the Clinical Competency Committee within 12 weeks of matriculation. (Core)	

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

Subspecialty Background and Intent: As a multidisciplinary fellowship, applicants may be eligible from various specialties, and as such, the respective accrediting Review Committees recommend that program directors know each of the specialty boards' certification criteria, prior to appointment of fellows.

- III.B. The program director must not appoint more fellows than approved by the Review Committee. (Core)
- III.B.1. All complement increases must be approved by the Review Committee. (Core)
- IV. Educational Program

 The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

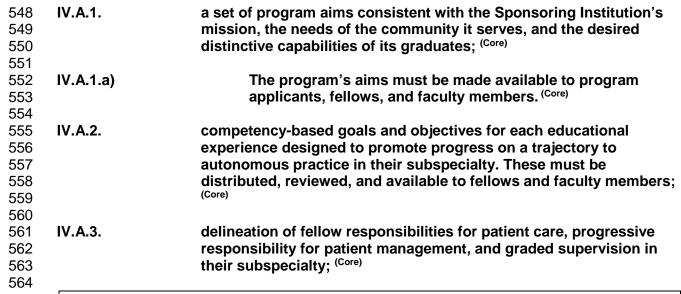

The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for example, it is expected that a program aiming to prepare physician-scientists will have a different curriculum from one focusing on community health.

IV.A. The curriculum must contain the following educational components: (Core)

©2019 Accreditation Council for Graduate Medical Education (ACGME)

Sports Medicine for Review and Comment

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

IV.A.4. structured educational activities beyond direct patient care; and,

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. (Core)

### IV.B. ACGME Competencies

565 566

567 568

569 570

571 572 573

574

575 576

577 578 Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: (Core)

579 580	IV.B.1.a)	Professionalism
581		Fellows must demonstrate a commitment to professionalism
582		and an adherence to ethical principles. (Core)
583		
584	IV.B.1.b)	Patient Care and Procedural Skills
585	·	

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s Crossing the Quality Chasm: A New Health System for the 21st Century, 2001 and Berwick D, Nolan T, Whittington J. The Triple Aim: care, cost, and quality. Health Affairs. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

586		
587 588	IV.B.1.b).(1)	Fellows must be able to provide patient care that is
589		compassionate, appropriate, and effective for the treatment of health problems and the promotion of
590		health. (Core)
590 591		neatti.
592	IV.B.1.b).(1).(a)	Fellows must demonstrate competence in the

IV.B.1.c).(1).(n)	environmental effects on exercise; (Core)
IV.B.1.c).(1).(0)	growth and development related to exercise; (Core)
IV.B.1.c).(1).(p)	the role of exercise in maintaining the health and function of the elderly; and, (Core)
IV.B.1.c).(1).(q)	exercise programs in school-age children. (Core)
IV.B.1.c).(2)	Fellows must demonstrate knowledge in the basic principles of sports ultrasound, and the sonographic appearance of normal and pathologic adipose, fascia, muscle, tendon, bone, cartilage, joint, vasculature, and nerves. (Core)
IV.B.1.d)	Practice-based Learning and Improvement
	Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. (Core)
	IV.B.1.c).(1).(I)  IV.B.1.c).(1).(m)  IV.B.1.c).(1).(n)  IV.B.1.c).(1).(o)  IV.B.1.c).(1).(p)  IV.B.1.c).(1).(q)  IV.B.1.c).(2)

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

701		
702	IV.B.1.e)	Interpersonal and Communication Skills
703	•	
704		Fellows must demonstrate interpersonal and communication
705		skills that result in the effective exchange of information and
706		collaboration with patients, their families, and health
707		professionals. (Core)
708		
709	IV.B.1.f)	Systems-based Practice
710	,	
711		Fellows must demonstrate an awareness of and
712		responsiveness to the larger context and system of health

710		care including the social determinants of health, so well as
713 714		care, including the social determinants of health, as well as the ability to call effectively on other resources to provide
71 <del>4</del> 715		optimal health care. (Core)
715 716		optimal fleatiff care. (***)
716 717 718	IV.C.	Curriculum Organization and Fellow Experiences
719 720 721	IV.C.1.	The curriculum must be structured to optimize fellow educational experiences, the length of these experiences, and supervisory continuity. (Core)
722 723 724 725	IV.C.1.a)	Rotations must be of sufficient length to provide a quality educational experience, defined by continuity of patient care, ongoing supervision, longitudinal relationships with faculty
726 727 728 729 730 731	IV.C.1.b)	Clinical experiences should be structured to facilitate learning in a manner that allows the fellows to function as part of an effective interprofessional team that works together longitudinally with shared goals of patient safety and quality improvement. (Core)
732 733 734 735 736	IV.C.2.	The program must provide instruction and experience in pain management if applicable for the subspecialty, including recognition of the signs of addiction. (Core)
737 738	IV.C.3.	Curriculum Organization
739 740 741 742	IV.C.3.a)	There must be conferences, seminars, and/or workshops in sports medicine specifically designed to augment fellows' clinical experiences. (Core) (Detail)
743 744 745 746	IV.C.3.b)	Clinical activities in sports medicine must represent a minimum of 60% of fellows' time in the program. The remainder of the time should be spent in didactic and scholarly activities, and in the practice of the fellow's primary specialty. (Core) (Detail)
747 748 749 750	IV.C.3.c)	Fellows must spend at least one half-day per week maintaining their skills in their primary specialty areas. (Core) (Detail)
751 752	IV.C.4.	Fellow Experiences
753 754 755	IV.C.4.a)	Fellows must participate in conducting pre-participation physical evaluations of athletes. (Core)
756 757 758	IV.C.4.b)	Fellows must have experience with procedures relevant to the practice of sports medicine. (Core)
759 760 761 762	IV.C.4.b).(1)	Fellows must assist with, observe, and perform outpatient non-operative interventional procedures clinically relevant to the practice of sports medicine; and, (Core) (Detail)

763 764 765	IV.C.4.b).(2)	Fellows must assist with, and/or observe, inpatient and outpatient operative musculoskeletal procedures clinically relevant to the practice of sports medicine. (Core) (Detail)
766 767	IV.C.4.c)	Fellows must have a sports medicine clinic experience. (Core)
768 769 770 771 772 773	IV.C.4.c).(1)	Fellows must provide sports medicine clinic patients with continuing, comprehensive care and provide consultation for health problems related to sports and exercise. (Core) (Detail)
774 775 776 777	IV.C.4.c).(2)	Each fellow must spend at least one day per week for 10 months in a single sports medicine clinic providing care to patients. (Core) (Detail)
778 779 780 781 782 783 784 785	IV.C.4.c).(3)	If a fellow's sports medicine clinic patients are hospitalized, the fellow must either follow them during their inpatient stay and resume outpatient care following the hospitalization, or remain in active communication with the inpatient care team regarding management and treatment decisions and resume outpatient care following the hospitalization. (Core) (Detail)
786 787	IV.C.4.d)	Fellows must have experience providing on-site sports care. (Core)
788 789 790	IV.C.4.d).(1)	Fellows must plan and implement all aspects of medical care at various sporting events. (Core) (Detail)
791 792 793 794 795	IV.C.4.d).(2)	Fellows must participate in providing comprehensive and continuing care to a single sports team where medical care can be provided across seasons, or, to several sports teams across seasons. (Core) (Detail)
796 797 798 799 800 801	IV.C.4.d).(3)	Fellows must have clinical experiences that provide exposure to, and facilitate skill development in, the appropriate recognition, on-field management, and medical transportation of sports medicine urgencies and emergencies. (Core) (Detail)
802 803	IV.C.4.d).(4)	Fellows must function as a team physician. (Outcome)‡
804	IV.C.4.e)	Fellows must participate in mass-participation events. (Core)
805 806 807 808 809	IV.C.4.e).(1)	Fellows must plan and implement all aspects of medical care for at least one mass-participation sports event. (Core)
810 811 812 813	IV.C.4.e).(2)	Fellows must have experience providing medical consultation, direct care-planning, event planning, protection of participants, and coordination with local EMS systems. (Core) (Detail)

814 815 816 817	IV.C.4.f)	1	medicine network inv	xperience working in a community sports olving parents, coaches, athletic trainers, el, residents, and physicians.

890			
891	V.A.	Fellov	w Evaluation
892	V/ A 4		Foodbook and Evaluation
893	V.A.1	•	Feedback and Evaluation

manating and on (Detail)

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is evaluating a fellow's learning by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when

fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

895 896 897

898 899 V.A.1.a)

Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. (Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

900 901

V.A.1.b)

Evaluation must be documented at the completion of the assignment. (Core)

903 904

902

V.A.1.b).(1) 905

For block rotations of greater than three months in Evaluations must be completed at least every three months. (Core)

906 907 908

909

910

V.A.1.c)

The program must provide an objective performance evaluation based on the Competencies and the subspecialtyspecific Milestones, and must: (Core)

911 912 913

914 915

V.A.1.c).(1)

V.A.1.c).(2)

use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, (Core)

916 917 918

provide that information to the Clinical Competency Committee for its synthesis of progressive fellow performance and improvement toward unsupervised practice. (Core)

919 920

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

922 923	V.A.1.d)	The program director or their designee, with input from the Clinical Competency Committee, must:
923 924		Chinical Competency Committee, must.
925	V.A.1.d).(1)	meet with and review with each fellow their
926		documented semi-annual evaluation of performance,
927		including progress along the subspecialty-specific
928		Milestones. (Core)
929		
930	V.A.1.d).(2)	develop plans for fellows failing to progress, following
931		institutional policies and procedures. (Core)
932		•

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

933		
934	V.A.1.e)	The evaluations of a fellow's performance must be accessible
935		for review by the fellow. (Core)
936		
937	V.A.2.	Final Evaluation
938		
939	V.A.2.a)	The program director must provide a final evaluation for each
940		fellow upon completion of the program. (Core)
941		
942	V.A.2.a).(1)	The subspecialty-specific Milestones, and when
943		applicable the subspecialty-specific Case Logs, must
944		be used as tools to ensure fellows are able to engage
945		in autonomous practice upon completion of the
946		program. <sup>(Core)</sup>
947		
948	V.A.2.a).(2)	The final evaluation must:
949		
950	V.A.2.a).(2).(a)	become part of the fellow's permanent record
951		maintained by the institution, and must be
952		accessible for review by the fellow in
953		accordance with institutional policy; (Core)

033

955 956 957 958	V.A.2.a).(2).(b	<b>)</b>	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; (Core)

983 984 985 986	V.A.3.b).(3)	adv	et prior to the fellows' semi-annual evaluations and rise the program director regarding each fellow's gress. (Core)
987 988	V.B.	Faculty Evaluation	
989 990 991 992	V.B.1.		st have a process to evaluate each faculty mance as it relates to the educational program at

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should

have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

993 994

This evaluation must include a review of the faculty member's V.B.1.a) 995 clinical teaching abilities, engagement with the educational program, participation in faculty development related to their 996 skills as an educator, clinical performance, professionalism, 997 and scholarly activities. (Core) 998 999 1000 V.B.1.b) This evaluation must include written, confidential evaluations by the fellows. (Core) 1001 1002 1003 V.B.2. Faculty members must receive feedback on their evaluations at least annually. (Core) 1004 1005

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1006

1027

1028 1029

1000		
1007	V.C.	Program Evaluation and Improvement
1008		
1009	V.C.1.	The program director must appoint the Program Evaluation
1010		Committee to conduct and document the Annual Program
1011		Evaluation as part of the program's continuous improvement
1012		process. (Core)
1013		
1014	V.C.1.a)	The Program Evaluation Committee must be composed of at
1015		least two program faculty members, at least one of whom is a
1016		core faculty member, and at least one fellow. (Core)
1017		
1018	V.C.1.b)	Program Evaluation Committee responsibilities must include:
1019		
1020	V.C.1.b).(1)	acting as an advisor to the program director, through
1021		program oversight; <sup>(Core)</sup>
1022		
1023	V.C.1.b).(2)	review of the program's self-determined goals and
1024		progress toward meeting them; (Core)
1025		
1026	V.C.1.b).(3)	guiding ongoing program improvement, including

and. (Core)

development of new goals, based upon outcomes;

1030	V.C.1.b).(4)	review of the current operating environment to identify
1031		strengths, challenges, opportunities, and threats as
1032		related to the program's mission and aims. (Core)
1033		

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

1034		
1035 1036	V.C.1.c)	The Program Evaluation Committee should consider the following elements in its assessment of the program:
1037		
1038	V.C.1.c).(1)	fellow performance; (Core)
1039	, , ,	•
1040	V.C.1.c).(2)	faculty development; and, (Core)
1041	, , ,	• • • • • • •
1042	V.C.1.c).(3)	progress on the previous year's action plan(s). (Core)
1043	, ( )	
1044	V.C.1.d)	The Program Evaluation Committee must evaluate the
1045	,	program's mission and aims, strengths, areas for
1046		improvement, and threats. (Core)
1047		•
1048	V.C.1.e)	The annual review, including the action plan, must:
1049	,	<b>3</b>
1050	V.C.1.e).(1)	be distributed to and discussed with the members of
1051	/(/	the teaching faculty and the fellows; and, (Core)
1052		<b>3 3 3 3</b>
1053	V.C.1.e).(2)	be submitted to the DIO. (Core)
1054		
1055	V.C.2.	The program must participate in a Self-Study prior to its 10-Year
1056		Accreditation Site Visit. (Core)
1057		
1058	V.C.2.a)	A summary of the Self-Study must be submitted to the DIO.
1059	/	(Core)

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the ACGME Manual of Policies and Procedures. Additionally, a description of the Self-Study process, as well as information on how to prepare for the 10-Year Accreditation Site Visit, is available on the ACGME website.

1060

102/

1062 1063 1064 1065 1066 1067 1068 1069 1070	V.C.3.	One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.  The program director should encourage all eligible program graduates to take the certifying examination offered by the applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.
1071 1072 1073 1074 1075 1076 1077	V.C.3.a)	For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)
1078 1079 1080 1081 1082 1083 1084	V.C.3.b)	For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)
1085 1086 1087 1088 1089 1090	V.C.3.c)	For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)
1092 1093 1094 1095 1096 1097 1098	V.C.3.d)	For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)
1099 1100 1101 1102 1103 1104	V.C.3.e)	For each of the exams referenced in V.C.3.a)-d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have met this requirement, no matter the percentile rank of the program for pass rate in that subspecialty. (Outcome)

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable

performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1109

V.C.3.f)

Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. (Core)

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1110 1111

1112

VI. The Learning and Working Environment

1113 1114 Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

1115 1116

 Excellence in the safety and quality of care rendered to patients by fellows today

1117 1118 1119

• Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice

1120 1121 1122

• Excellence in professionalism through faculty modeling of:

1123 1124 1125

 the effacement of self-interest in a humanistic environment that supports the professional development of physicians

1127 1128 1129

1126

o the joy of curiosity, problem-solving, intellectual rigor, and discovery

1130 1131  Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-

being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

#### VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

### VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

#### VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

1167 1168 1169 1170 1171 1172	VI.A.1.a).(1).(a)	The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.
1173 1174 1175 1176	VI.A.1.a).(1).(b)	The program must have a structure that promotes safe, interprofessional, team-based care. (Core)
1177	VI.A.1.a).(2)	Education on Patient Safety
1178 1179 1180 1181 1182		Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. (Core)
	Background and Intent: Optimal interprofessional learning and w	patient safety occurs in the setting of a coordinated orking environment.
1183 1184 1185	VI.A.1.a).(3)	Patient Safety Events
1186 1187 1188 1189 1190 1191 1192 1193 1194 1195		Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.
1196 1197 1198	VI.A.1.a).(3).(a)	Residents, fellows, faculty members, and other clinical staff members must:
1199 1200 1201 1202	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site; (Core)
1203 1204 1205 1206	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and, (Core)
1207 1208 1209 1210	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution's patient safety reports. (Core)
1210 1211 1212 1213 1214	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include

1215 1216 1217		analysis, as well as formulation and implementation of actions. (Core)
1217 1218 1219 1220	VI.A.1.a).(4)	Fellow Education and Experience in Disclosure of Adverse Events
1221 1222 1223 1224 1225 1226		Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.
1226 1227 1228 1229 1230	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. (Core)
1231 1232 1233 1234	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated. (Detail)†
1235 1236	VI.A.1.b)	Quality Improvement
1237 1238	VI.A.1.b).(1)	Education in Quality Improvement
1239 1240 1241 1242 1243		A cohesive model of health care includes quality- related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.
1243 1244 1245 1246 1247	VI.A.1.b).(1).(a)	Fellows must receive training and experience in quality improvement processes, including an understanding of health care disparities. (Core)
1248 1249	VI.A.1.b).(2)	Quality Metrics
1250 1251 1252 1253		Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.
1254 1255 1256 1257	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data on quality metrics and benchmarks related to their patient populations. (Core)
1257 1258 1259	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1269 1260 1261 1262 1263		Experiential learning is essential to developing the ability to identify and institute sustainable systemsbased changes to improve patient care.

1264 1265 1266 1267	VI.A.1.b).(3).(a)	Fellows must have the opportunity to participate in interprofessional quality improvement activities. (Core)
1268 1269 1270	VI.A.1.b).(3).(a).(i)	This should include activities aimed at reducing health care disparities. (Detail)
1271 1272	VI.A.2.	Supervision and Accountability
1273 1274 1275 1276 1277 1278 1279 1280 1281	VI.A.2.a)	Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.
1282 1283 1284 1285 1286 1287		Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.
1288 1289 1290 1291 1292 1293 1294	VI.A.2.a).(1)	Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care.  (Core)
1294 1295 1296 1297 1298	VI.A.2.a).(1).(a)	This information must be available to fellows, faculty members, other members of the health care team, and patients. (Core)
1299 1300 1301 1302 1303 1304 1305 1306 1307 1308 1309 1310 1311 1312 1313	VI.A.2.a).(1).(b)	Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. (Core)
	VI.A.2.b)	Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the immediate availability of the supervising faculty member or fellow, either on site or by means of telephonic and/or electronic modalities. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.

1314 1315 1316 1317 1318 1319 1320	VI.A.2.b).(1)	The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow's level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. (Core)
1321 1322	VI.A.2.c)	Levels of Supervision
1323 1324 1325 1326		To promote oversight of fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: (Core)
1327 1328 1329	VI.A.2.c).(1)	Direct Supervision – the supervising physician is physically present with the fellow and patient. (Core)
1330 1331	VI.A.2.c).(2)	Indirect Supervision:
1332 1333 1334 1335 1336 1337	VI.A.2.c).(2).(a)	with Direct Supervision immediately available – the supervising physician is physically within the hospital or other site of patient care, and is immediately available to provide Direct Supervision. (Core)
1338 1339 1340 1341 1342 1343	VI.A.2.c).(2).(b)	with Direct Supervision available – the supervising physician is not physically present within the hospital or other site of patient care, but is immediately available by means of telephonic and/or electronic modalities, and is available to provide Direct Supervision. (Core)
1345 1346 1347 1348	VI.A.2.c).(3)	Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. (Core)
1349 1350 1351 1352 1353	VI.A.2.d)	The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each fellow must be assigned by the program director and faculty members. (Core)
1354 1355 1356 1357	VI.A.2.d).(1)	The program director must evaluate each fellow's abilities based on specific criteria, guided by the Milestones. (Core)
1358 1359 1360 1361 1362	VI.A.2.d).(2)	Faculty members functioning as supervising physicians must delegate portions of care to fellows based on the needs of the patient and the skills of each fellow. (Core)
1363 1364	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior fellows and residents in recognition of their progress

1365 1366 1367 1368		toward independence, based on the needs of each patient and the skills of the individual resident or fellow. (Detail)
1369 1370 1371 1372	VI.A.2.e)	Programs must set guidelines for circumstances and events in which fellows must communicate with the supervising faculty member(s). (Core)
1373 1374 1375 1376 1377	VI.A.2.e).(1)	Each fellow must know the limits of their scope of authority, and the circumstances under which the fellow is permitted to act with conditional independence. (Outcome)
		d and Intent: The ACGME Glossary of Terms defines conditional ce as: Graded, progressive responsibility for patient care with defined
1378 1379 1380 1381 1382 1383	VI.A.2.f)	Faculty supervision assignments must be of sufficient duration to assess the knowledge and skills of each fellow and to delegate to the fellow the appropriate level of patient care authority and responsibility. (Core)
1384 1385	VI.B.	Professionalism
1386 1387 1388 1389 1390 1391	VI.B.1.	Programs, in partnership with their Sponsoring Institutions, must educate fellows and faculty members concerning the professional responsibilities of physicians, including their obligation to be appropriately rested and fit to provide the care required by their patients. (Core)
1392 1393	VI.B.2.	The learning objectives of the program must:
1394 1395 1396 1397	VI.B.2.a)	be accomplished through an appropriate blend of supervised patient care responsibilities, clinical teaching, and didactic educational events; (Core)
1398 1399	VI.B.2.b)	be accomplished without excessive reliance on fellows to fulfill non-physician obligations; and, (Core)

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1401

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

1402

1403

1418

1420

1/21

Background and Intent: The Common Program Requirements do not define "manageable patient care responsibilities" as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1404 1405 VI.B.3. The program director, in partnership with the Sponsoring Institution, 1406 must provide a culture of professionalism that supports patient safety and personal responsibility. (Core) 1407 1408 1409 VI.B.4. Fellows and faculty members must demonstrate an understanding 1410 of their personal role in the: 1411 provision of patient- and family-centered care; (Outcome) 1412 VI.B.4.a) 1413 1414 safety and welfare of patients entrusted to their care, VI.B.4.b) 1415 including the ability to report unsafe conditions and adverse events: (Outcome) 1416 1417

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1419 VI.B.4.c) assurance of their fitness for work, including: (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1421		
1422	VI.B.4.c).(1)	management of their time before, during, and after
1423		clinical assignments; and, (Outcome)
1424		
1425	VI.B.4.c).(2)	recognition of impairment, including from illness,
1426		fatigue, and substance use, in themselves, their peers,
1427		and other members of the health care team. (Outcome)
1428		
1429	VI.B.4.d)	commitment to lifelong learning; (Outcome)
1430		
1431	VI.B.4.e)	monitoring of their patient care performance improvement
1432		indicators; and, <sup>(Outcome)</sup>
1433		
1434	VI.B.4.f)	accurate reporting of clinical and educational work hours,
1435		patient outcomes, and clinical experience data. (Outcome)

1436 1437 VLB.5 All fellows and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the 1438 recognition that under certain circumstances, the best interests of 1439 the patient may be served by transitioning that patient's care to 1440 another qualified and rested provider. (Outcome) 1441 1442 VI.B.6. 1443 Programs, in partnership with their Sponsoring Institutions, must provide a professional, equitable, respectful, and civil environment 1444 1445 that is free from discrimination, sexual and other forms of 1446 harassment, mistreatment, abuse, or coercion of students, fellows, 1447 faculty, and staff. (Core) 1448 VI.B.7. 1449 Programs, in partnership with their Sponsoring Institutions, should 1450 have a process for education of fellows and faculty regarding unprofessional behavior and a confidential process for reporting, 1451 investigating, and addressing such concerns. (Core) 1452 1453 VI.C. Well-Being 1454 1455 1456 Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require 1457

Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being requires that physicians retain the joy in medicine while managing their own real life stresses. Self-care and responsibility to support other members of the health care team are important components of professionalism; they are also skills that must be modeled, learned, and nurtured in the context of other aspects of fellowship training.

Fellows and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities

that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

VI.C.1.	The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:
VI.C.1.a)	efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; (Core)
VI.C.1.b)	attention to scheduling, work intensity, and work compression that impacts fellow well-being; (Core)
VI.C.1.c)	evaluating workplace safety data and addressing the safety of fellows and faculty members; (Core)
Sponsoring In monitor and e Issues to be a	and Intent: This requirement emphasizes the responsibility shared by the estitution and its programs to gather information and utilize systems that inhance fellow and faculty member safety, including physical safety. ddressed include, but are not limited to, monitoring of workplace injuries, notional violence, vehicle collisions, and emotional well-being after s.
VI.C.1.d)	policies and programs that encourage optimal fellow and faculty member well-being; and, (Core)
family and frie	nd Intent: Well-being includes having time away from work to engage with ends, as well as to attend to personal needs and to one's own health, quate rest, healthy diet, and regular exercise.
VI.C.1.d).(1)	Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours (Core)
opportunity to that are appro time away fro	nd Intent: The intent of this requirement is to ensure that fellows have the access medical and dental care, including mental health care, at times priate to their individual circumstances. Fellows must be provided with m the program as needed to access care, including appointments ring their working hours.
VI.C.1.e)	attention to fellow and faculty member burnout, depression, and substance abuse. The program, in partnership with its Sponsoring Institution, must educate faculty members and

1508

depression, and substance abuse, including means to assist

those who experience these conditions. Fellows and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care.

The program, in partnership with its Sponsoring Institution, must: (Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Wellbeing section of the ACGME website (<a href="http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being">http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being</a>).

**VI.C.1.e).(1)** 

 encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; (Core)

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

 VI.C.1.e).(2) provide access to appropriate tools for self-screening; and, (Core)

VI.C.1.e).(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. (Core)

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1002		
1533	VI.C.2.	There are circumstances in which fellows may be unable to attend
1534		work, including but not limited to fatigue, illness, family
1535		emergencies, and parental leave. Each program must allow an
1536		appropriate length of absence for fellows unable to perform their
1537		patient care responsibilities. (Core)
1538		
1539	VI.C.2.a)	The program must have policies and procedures in place to
1540	•	ensure coverage of patient care. (Core)
1541		·
1542	VI.C.2.b)	These policies must be implemented without fear of negative
1543	•	consequences for the fellow who is or was unable to provide
1544		the clinical work. (Core)
1545		

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

1547	VI.D.	Fatigue Mitigation
1548		
1549	VI.D.1.	Programs must:
1550		
1551	VI.D.1.a)	educate all faculty members and fellows to recognize the
1552		signs of fatigue and sleep deprivation; (Core)
1553		
1554	VI.D.1.b)	educate all faculty members and fellows in alertness
1555	•	management and fatigue mitigation processes; and, (Core)
1556		
1557	VI.D.1.c)	encourage fellows to use fatigue mitigation processes to
1558	-	manage the potential negative effects of fatigue on patient
1559		care and learning. (Detail)
1560		-

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1532

1562 1563	VI.D.2.	Each program must ensure continuity of patient care, consistent with the program's policies and procedures referenced in VI.C.2–
1564		VI.C.2.b), in the event that a fellow may be unable to perform their
1565		patient care responsibilities due to excessive fatigue. (Core)
1566		·
1567	VI.D.3.	The program, in partnership with its Sponsoring Institution, must
1568		ensure adequate sleep facilities and safe transportation options for
1569		fellows who may be too fatigued to safely return home. (Core)
1570		, , ,
1571	VI.E.	Clinical Responsibilities, Teamwork, and Transitions of Care
1572		, ,
1573	VI.E.1.	Clinical Responsibilities
1574		•
1575		The clinical responsibilities for each fellow must be based on PGY
1576		level, patient safety, fellow ability, severity and complexity of patient
1577		illness/condition, and available support services. (Core)
1578		•
1579	VI.E.1.a)	The program director must have the authority and responsibility to
1580	,	set appropriate clinical responsibilities (i.e., patient caps) for each
1581		fellow. (Core)
1582		

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

	•	
1583		
1584	VI.E.2.	Teamwork
1585		
1586		Fellows must care for patients in an environment that maximizes
1587		communication. This must include the opportunity to work as a
1588		member of effective interprofessional teams that are appropriate to
1589		the delivery of care in the subspecialty and larger health system.
1590		(Core)
1591		
1592	VI.E.3.	Transitions of Care
1593		
1594	VI.E.3.a)	Programs must design clinical assignments to optimize
1595		transitions in patient care, including their safety, frequency,
1596		and structure. (Core)
1597		
1598	VI.E.3.b)	Programs, in partnership with their Sponsoring Institutions,
1599		must ensure and monitor effective, structured hand-over
1600		processes to facilitate both continuity of care and patient
1601		safety. (Core)
1602		-

1603 1604 1605 1606	VI.E.3.c)	Programs must ensure that fellows are competent in communicating with team members in the hand-over process.
1607 1608 1609 1610	VI.E.3.d)	Programs and clinical sites must maintain and communicate schedules of attending physicians and fellows currently responsible for care. (Core)
1611 1612 1613 1614 1615 1616	VI.E.3.e)	Each program must ensure continuity of patient care, consistent with the program's policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency. (Core)
1617 1618	VI.F.	Clinical Experience and Education
1619 1620 1621 1622		Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms "clinical experience and education," "clinical and educational work," and "clinical and educational work hours" replace the terms "duty hours," "duty periods," and "duty." These changes have been made in response to concerns that the previous use of the term "duty" in reference to number of hours worked may have led some to conclude that fellows' duty to "clock out" on time superseded their duty to their patients.

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. (Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

## Scheduling

1623

1624

1625

1626 1627

1628

1629

1630 1631

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their

scheduled work period when needed without violating the 80-hour requirement.

Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

## **Oversight**

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

## Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1632 1633

VI.F.2.

**Mandatory Time Free of Clinical Work and Education** 

VI.F.2.a)	The program must design an effective program structure that is configured to provide fellows with educational
	opportunities, as well as reasonable opportunities for rest
	and personal well-being. <sup>(Core)</sup>
VI.F.2.b)	Fellows should have eight hours off between scheduled
	clinical work and education periods. (Detail)
VI.F.2.b).(1)	There may be circumstances when fellows choose to
	stay to care for their patients or return to the hospital
	with fewer than eight hours free of clinical experience
	and education. This must occur within the context of
	the 80-hour and the one-day-off-in-seven
	requirements. (Detail)
	•
	,

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1650 1651

4005

VI.F.2.c)

VI.F.2.d)

1652 1653

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

education after 24 hours of in-house call. (Core)

1654 1655

1656 1657 1658

1659

Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

Fellows must have at least 14 hours free of clinical work and

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is

defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

		, ,
1660		
1661 <b>VI.</b>	.F.3.	Maximum Clinical Work and Education Period Length
1662		
663 <b>VI</b> .	.F.3.a)	Clinical and educational work periods for fellows must not
664		exceed 24 hours of continuous scheduled clinical
665		assignments. <sup>(Core)</sup>
666		
667 <b>VI.</b>	.F.3.a).(1)	Up to four hours of additional time may be used for
668		activities related to patient safety, such as providing
669		effective transitions of care, and/or fellow education.
670		(Core)
671		
672 <b>VI.</b>	.F.3.a).(1).(a)	Additional patient care responsibilities must not
673		be assigned to a fellow during this time. (Core)
674		

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

= .	
VI.F.4.	Clinical and Educational Work Hour Exceptions
VI.F.4.a)	In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to
	remain or return to the clinical site in the following
	circumstances:
\/  <b>[</b> 4 a) /4\	to continue to musuido coro to a cinale coversivill or
VI.F.4.a).(1)	to continue to provide care to a single severely ill or unstable patient; (Detail)
VI.F.4.a).(2)	humanistic attention to the needs of a patient or
	family; or, <sup>(Detail)</sup>
VI.F.4.a).(3)	to attend unique educational events. (Detail)
VI.F.4.b)	These additional hours of care or education will be counted
•	toward the 80-hour weekly limit. (Detail)
	·

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and

that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

J	
VI.F.4.c)	A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.
	The Review Committees for Emergency Medicine, Family
	Medicine, Pediatrics, or and Physical Medicine and Rehabilitation
	will not consider requests for exceptions to the 80-hour limit to the
	fellows' work week.
VI.F.4.c).(1)	In preparing a request for an exception, the program
	director must follow the clinical and educational work
	hour exception policy from the ACGME Manual of
	Policies and Procedures. (Core)
VI.F.4.c).(2)	Prior to submitting the request to the Review
	Committee, the program director must obtain approval
	from the Sponsoring Institution's GMEC and DIO. (Core)

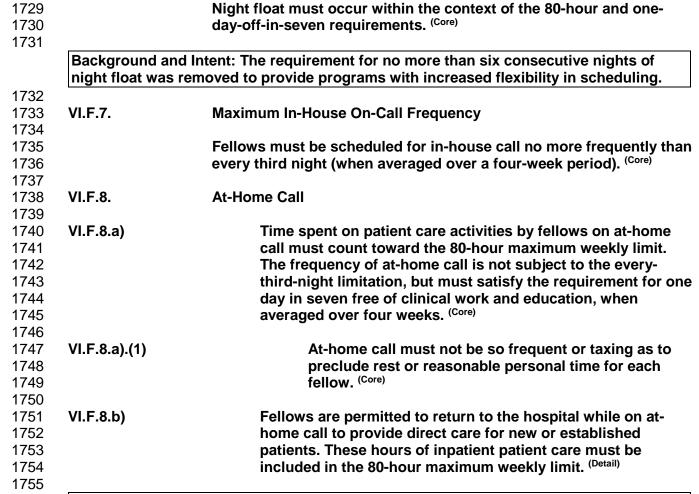

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

conlighting must not interfere with the ability of the fellow achieve the goals and objectives of the educational ogram, and must not interfere with the fellow's fitness for ork nor compromise patient safety. (Core)

······································
me spent by fellows in internal and external moonlighting s defined in the ACGME Glossary of Terms) must be unted toward the 80-hour maximum weekly limit. (Core)

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <a href="http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements">http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements</a>).

VI.F.6. In-House Night Float

1726 1727

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
