1 **Proposed ACGME Program Requirements for Graduate Medical Education**
2 **in Undersea and Hyperbaric Medicine**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 The subspecialty of undersea and hyperbaric medicine is a discipline that deals
50 with the prevention of injury and illness due to exposure to environments in which
51 the ambient pressure is increased, such as in diving or hyperbaric chamber
52 exposure, and the therapeutic use of high environmental pressure and the
53 delivery of oxygen under high pressure to treat disease. The scope of the
54 subspecialty emphasizes the occupational, environmental, safety, and clinical
55 aspects of diving, hyperbaric chamber operations, compressed air work, and
56 hyperbaric oxygen therapy.

57
58 **Int.C. Length of Educational Program**

59
60 The educational program in undersea and hyperbaric medicine must be 12
61 months in length. ^{(Core)*}

62
63 **I. Oversight**

64
65 **I.A. Sponsoring Institution**

66
67 *The Sponsoring Institution is the organization or entity that assumes the*
68 *ultimate financial and academic responsibility for a program of graduate*
69 *medical education consistent with the ACGME Institutional Requirements.*

70
71 *When the Sponsoring Institution is not a rotation site for the program, the*
72 *most commonly utilized site of clinical activity for the program is the*
73 *primary clinical site.*

74

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

75
76 **I.A.1. The program must be sponsored by one ACGME-accredited**
77 **Sponsoring Institution.** ^(Core)

78
79 **I.B. Participating Sites**

80
81 *A participating site is an organization providing educational experiences or*
82 *educational assignments/rotations for fellows.*

83
84 **I.B.1. The program, with approval of its Sponsoring Institution, must**
85 **designate a primary clinical site.** ^(Core)

86
87 **I.B.1.a)** The Sponsoring Institution should also sponsor an ACGME-
88 accredited residency program in emergency medicine or
89 preventive medicine. ^(Core)

- 90
91 **I.B.2.** There must be a program letter of agreement (PLA) between the
92 program and each participating site that governs the relationship
93 between the program and the participating site providing a required
94 assignment. ^(Core)
95
96 **I.B.2.a)** The PLA must:
97
98 **I.B.2.a).(1)** be renewed at least every 10 years; and, ^(Core)
99
100 **I.B.2.a).(2)** be approved by the designated institutional official
101 (DIO). ^(Core)
102
103 **I.B.3.** The program must monitor the clinical learning and working
104 environment at all participating sites. ^(Core)
105
106 **I.B.3.a)** At each participating site there must be one faculty member,
107 designated by the program director, who is accountable for
108 fellow education for that site, in collaboration with the
109 program director. ^(Core)
110

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

- 111
112 **I.B.4.** The program director must submit any additions or deletions of
113 participating sites routinely providing an educational experience,
114 required for all fellows, of one month full time equivalent (FTE) or
115 more through the ACGME's Accreditation Data System (ADS). ^(Core)
116
117 **I.B.5.** The program must be based at a primary hospital (hereafter referred to as
118 the primary clinical site). ^(Core)
119

- 120 I.B.6. Required experiences not available at the primary clinical site, including
 121 clinical experience in critical care areas, must be provided through a
 122 participating site. ^(Core)
 123
- 124 I.B.7. Programs using multiple participating sites must ensure a unified
 125 educational experience for the fellows. ^(Core)
 126
- 127 I.B.7.a) Each participating site must offer significant educational
 128 opportunities to the overall program. ^(Core)
 129
- 130 I.B.7.b) Required rotations to participating sites that are geographically
 131 distant from the Sponsoring Institution must offer educational
 132 opportunities, unavailable locally, that significantly augment the
 133 fellows' overall educational experience. ^{(Detail)†}
 134
- 135 I.B.8. The number and location of participating sites must not preclude fellows'
 136 participation in conferences and other educational experiences. ^(Core)
 137
- 138 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
 139 **practices that focus on mission-driven, ongoing, systematic recruitment**
 140 **and retention of a diverse and inclusive workforce of residents (if present),**
 141 **fellows, faculty members, senior administrative staff members, and other**
 142 **relevant members of its academic community.** ^(Core)
 143

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

- 144
- 145 **I.D. Resources**
- 146
- 147 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
 148 **ensure the availability of adequate resources for fellow education.**
 149 ^(Core)
 150
- 151 I.D.1.a) All participating sites must provide appropriate support services to
 152 ensure an adequate educational experience. ^(Core)
 153
- 154 I.D.1.a).(1) This includes support personnel and physical resources to
 155 ensure that fellows have sufficient time and space to carry
 156 out their clinical and educational responsibilities. ^(Core)
 157
- 158 I.D.1.b) Space and Equipment
- 159
- 160 Adequate space must be available for faculty members to perform
 161 their educational, research, and administrative responsibilities.
 162 ^(Core)
 163

164	I.D.1.b).(1)	Adequate conference and teaching space must be available for didactic and case conferences. ^(Core) (Detail)
165		
166		
167	I.D.1.c)	Inpatient, Ambulatory Care, Laboratory, and Other Clinical Facilities
168		
169		
170	I.D.1.c).(1)	A hyperbaric chamber capable of treatment of the full range of conditions amenable to hyperbaric oxygen therapy must be available. ^(Core)
171		
172		
173		
174	I.D.1.c).(2)	A full-service clinical laboratory that is capable of measurement of chemistry, blood indices, and microbiology of patients needing hyperbaric therapy must be available at all times. ^(Core)
175		
176		
177		
178		
179	I.D.1.c).(3)	Radiologic services must be available at all times within the primary clinical site. ^(Core)
180		
181		
182	I.D.1.c).(4)	Inpatient and outpatient facilities, including intensive care units capable of addressing the needs of patients with respiratory toxicants, gas forming infections, wound healing problems, gas embolism, and other conditions requiring hyperbaric treatment, must be available. ^(Core)
183		
184		
185		
186		
187		
188	I.D.1.d)	Patient Population
189		
190	I.D.1.d).(1)	There must be a sufficient number and variety of patients of all ages with medical and surgical conditions requiring hyperbaric therapy. ^(Core)
191		
192		
193		
194	I.D.1.d).(2)	The patient population at the primary clinical site must include the majority of emergent and elective indications for hyperbaric therapy. ^(Core)
195		
196		
197		
198	I.D.1.e)	Support Services
199		
200	I.D.1.e).(1)	Support services must include physical therapy, social services, occupational medicine, and psychologic and psychological testing services. ^(Core)
201		
202		
203		
204	I.D.1.e).(2)	The following services must be provided at the primary clinical site: ^(Core)
205		
206		
207	I.D.1.e).(2).(a)	24-hour availability of hyperbaric medicine services with at least 100 consultations and 1000 patient treatments per year; ^(Core)
208		
209		
210		
211	I.D.1.e).(2).(b)	an emergency service for both adult and pediatric patients, adult and pediatric inpatient facilities, and adult and pediatric surgical and intensive care facilities; and, ^(Core)
212		
213		
214		

215
216 I.D.1.e).(2).(c) inpatient and outpatient facilities with staff members
217 who consult the hyperbaric medicine service. (Core)
218

219 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
220 **ensure healthy and safe learning and working environments that**
221 **promote fellow well-being and provide for:** (Core)
222

223 **I.D.2.a) access to food while on duty;** (Core)
224

225 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
226 **and accessible for fellows with proximity appropriate for safe**
227 **patient care;** (Core)
228

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

229
230 **I.D.2.c) clean and private facilities for lactation that have refrigeration**
231 **capabilities, with proximity appropriate for safe patient care;**
232 (Core)
233

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

234
235 **I.D.2.d) security and safety measures appropriate to the participating**
236 **site; and,** (Core)
237

238 **I.D.2.e) accommodations for fellows with disabilities consistent with**
239 **the Sponsoring Institution's policy.** (Core)
240

241 **I.D.3. Fellows must have ready access to subspecialty-specific and other**
242 **appropriate reference material in print or electronic format. This**
243 **must include access to electronic medical literature databases with**
244 **full text capabilities.** (Core)
245

246 **I.D.4. The program's educational and clinical resources must be adequate**
247 **to support the number of fellows appointed to the program.** (Core)
248

249 I.E. *A fellowship program usually occurs in the context of many learners and*
250 *other care providers and limited clinical resources. It should be structured*
251 *to optimize education for all learners present.*

253 I.E.1. Fellows should contribute to the education of residents in core
254 programs, if present. ^(Core)
255

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

256
257 II. Personnel

258
259 II.A. Program Director

260
261 II.A.1. There must be one faculty member appointed as program director
262 with authority and accountability for the overall program, including
263 compliance with all applicable program requirements. ^(Core)
264

265 II.A.1.a) The Sponsoring Institution's Graduate Medical Education
266 Committee (GMEC) must approve a change in program
267 director. ^(Core)
268

269 II.A.1.b) Final approval of the program director resides with the
270 Review Committee. ^(Core)
271

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

272
273 II.A.2. The program director must be provided with support adequate for
274 administration of the program based upon its size and configuration.
275 ^(Core)
276

277 II.A.2.a) ~~This must be at least 10 percent salary support or protected time.~~
278 ^(Core)

280 II.A.2.b) The program director must be provided minimum protected time
281 for the administration of the program based on program size
282 according to the following: ^(Core)
283

<u>Program Size</u>	<u>% FTE Required</u>
---------------------	-----------------------

<u>0-3 fellows</u>	<u>20%</u>
<u>4-6 fellows</u>	<u>25%</u>
<u>7-9 fellows</u>	<u>30%</u>
<u>>10 fellows</u>	<u>35%</u>

284
285

315
316
317
318
319
320
321
322
323

II.A.3. Qualifications of the program director:

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; ^(Core)

II.A.3.a).(1) This must include at least three years' experience as a physician faculty member in an ACGME-accredited program, as well as possession of adequate undersea and hyperbaric medicine experience judged to be acceptable by the Review Committee. ^(Core)

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Emergency Medicine, American Board of Preventive Medicine, or by the American Osteopathic Board of Emergency Medicine, American Osteopathic Board of Family Physicians, American Osteopathic Board of Preventive Medicine, or subspecialty qualifications that are acceptable to the Review Committee; ^(Core)

II.A.3.c) must include current clinical activity in the practice of undersea and hyperbaric medicine; and, ^(Core)

II.A.3.d) should include demonstrated participation in academic societies and educational programs designed to enhance his or her educational and administrative skills. ^(Core)-(Detail)

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. ^(Core)

II.A.4.a) The program director must:

II.A.4.a).(1) be a role model of professionalism; ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program

director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

324
325
326
327
328
329

- II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

330
331
332
333
334

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

335
336
337
338
339
340
341
342
343
344
345
346
347
348
349
350
351
352

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)

- II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; ^(Core)

- II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; ^(Core)

- II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 353
354 **II.A.4.a).(8)** submit accurate and complete information required
355 and requested by the DIO, GMEC, and ACGME; ^(Core)
356
357 **II.A.4.a).(9)** provide applicants who are offered an interview with
358 information related to the applicant's eligibility for the
359 relevant subspecialty board examination(s); ^(Core)
360
361 **II.A.4.a).(10)** provide a learning and working environment in which
362 fellows have the opportunity to raise concerns and
363 provide feedback in a confidential manner as
364 appropriate, without fear of intimidation or retaliation;
365 ^(Core)
366
367 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring
368 Institution's policies and procedures related to
369 grievances and due process; ^(Core)
370
371 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring
372 Institution's policies and procedures for due process
373 when action is taken to suspend or dismiss, not to
374 promote, or not to renew the appointment of a fellow;
375 ^(Core)
376

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- 377
378 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring
379 Institution's policies and procedures on employment
380 and non-discrimination; ^(Core)
381
382 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-
383 competition guarantee or restrictive covenant.
384 ^(Core)
385
386 **II.A.4.a).(14)** document verification of program completion for all
387 graduating fellows within 30 days; ^(Core)
388
389 **II.A.4.a).(15)** provide verification of an individual fellow's
390 completion upon the fellow's request, within 30 days;
391 and, ^(Core)
392

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

393

394 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
395 Institution’s DIO before submitting information or
396 requests to the ACGME, as required in the Institutional
397 Requirements and outlined in the ACGME Program
398 Director’s Guide to the Common Program
399 Requirements. ^(Core)
400

401 **II.B. Faculty**

402
403 *Faculty members are a foundational element of graduate medical education*
404 *– faculty members teach fellows how to care for patients. Faculty members*
405 *provide an important bridge allowing fellows to grow and become practice*
406 *ready, ensuring that patients receive the highest quality of care. They are*
407 *role models for future generations of physicians by demonstrating*
408 *compassion, commitment to excellence in teaching and patient care,*
409 *professionalism, and a dedication to lifelong learning. Faculty members*
410 *experience the pride and joy of fostering the growth and development of*
411 *future colleagues. The care they provide is enhanced by the opportunity to*
412 *teach. By employing a scholarly approach to patient care, faculty members,*
413 *through the graduate medical education system, improve the health of the*
414 *individual and the population.*

415
416 *Faculty members ensure that patients receive the level of care expected*
417 *from a specialist in the field. They recognize and respond to the needs of*
418 *the patients, fellows, community, and institution. Faculty members provide*
419 *appropriate levels of supervision to promote patient safety. Faculty*
420 *members create an effective learning environment by acting in a*
421 *professional manner and attending to the well-being of the fellows and*
422 *themselves.*
423

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

424
425 **II.B.1. For each participating site, there must be a sufficient number of**
426 **faculty members with competence to instruct and supervise all**
427 **fellows at that location.** ^(Core)
428

429 **II.B.1.a)** Consultants from appropriate medical subspecialties should be
430 available for consultation and didactic teaching, including those
431 with experience and understanding of anesthesiology, critical
432 care, emergency medicine, infectious disease, ophthalmology,
433 plastic surgery, preventive medicine, rehabilitative medicine,
434 vascular surgery, and other disciplines as they pertain to the
435 comprehensive treatment of the clinical hyperbaric patient. ^(Detail)
436

437 **II.B.2. Faculty members must:**

438
439 **II.B.2.a) be role models of professionalism;** ^(Core)
440

441 **II.B.2.b)** demonstrate commitment to the delivery of safe, quality,
442 cost-effective, patient-centered care; ^(Core)
443

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

444
445 **II.B.2.c)** demonstrate a strong interest in the education of fellows; ^(Core)
446

447 **II.B.2.d)** devote sufficient time to the educational program to fulfill
448 their supervisory and teaching responsibilities; ^(Core)
449

450 **II.B.2.e)** administer and maintain an educational environment
451 conducive to educating fellows; ^(Core)
452

453 **II.B.2.f)** regularly participate in organized clinical discussions,
454 rounds, journal clubs, and conferences; ^(Core)
455

456 **II.B.2.g)** pursue faculty development designed to enhance their skills
457 at least annually; ^(Core)
458

459 **II.B.2.h)** demonstrate sound clinical and teaching abilities, a commitment to
460 their own continuing medical education; and, ^(Core)
461

462 **II.B.2.i)** regularly participate in clinical discussions, rounds, journal clubs,
463 and research conferences in a manner that promotes a spirit of
464 inquiry and scholarship and the provision of support for fellows'
465 participation, as appropriate, in scholarly activity. ^(Core)
466

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

467
468 **II.B.3.** Faculty Qualifications
469

470 **II.B.3.a)** Faculty members must have appropriate qualifications in
471 their field and hold appropriate institutional appointments.
472 ^(Core)
473

474 **II.B.3.b)** Subspecialty physician faculty members must:

475
476 **II.B.3.b).(1)** have current certification in the subspecialty by the
477 American Board of Emergency Medicine, American
478 Board of Preventive Medicine, or the American
479 Osteopathic Board of Emergency Medicine, American

480 Osteopathic Board of Family Physicians, American
481 Osteopathic Board of Preventive Medicine, **or possess**
482 **qualifications judged acceptable to the Review**
483 **Committee.** (Core)

484
485 **II.B.3.c) Any non-physician faculty members who participate in**
486 **fellowship program education must be approved by the**
487 **program director.** (Core)
488

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

489
490 **II.B.3.d) Any other specialty physician faculty members must have**
491 **current certification in their specialty by the appropriate**
492 **American Board of Medical Specialties (ABMS) member**
493 **board or American Osteopathic Association (AOA) certifying**
494 **board, or possess qualifications judged acceptable to the**
495 **Review Committee.** (Core)
496

497 **II.B.4. Core Faculty**
498
499 **Core faculty members must have a significant role in the education**
500 **and supervision of fellows and must devote a significant portion of**
501 **their entire effort to fellow education and/or administration, and**
502 **must, as a component of their activities, teach, evaluate, and provide**
503 **formative feedback to fellows.** (Core)
504

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

505
506 **II.B.4.a) Core faculty members must be designated by the program**
507 **director.** (Core)
508

509 **II.B.4.b) Core faculty members must complete the annual ACGME**
510 **Faculty Survey.** (Core)
511

512 **II.B.4.c) There must be a minimum of two undersea and hyperbaric core**
513 **physician faculty members based at the primary clinical site,**
514 **including the program director.** (Core)
515

516 **II.C. Program Coordinator**

- 517
518 **II.C.1.** **There must be a program coordinator.** ^(Core)
519
520 **II.C.2.** **The program coordinator must be provided with support adequate**
521 **for administration of the program based upon its size and**
522 **configuration.** ^(Core)
523
524 **II.C.2.a)** **There must be at least one 0.2 FTE program coordinator**
525 **dedicated to the fellowship program’s administration.** ^(Core)
526

Background and Intent: Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

- 527
528 **II.D.** **Other Program Personnel**
529
530 **The program, in partnership with its Sponsoring Institution, must jointly**
531 **ensure the availability of necessary personnel for the effective**
532 **administration of the program.** ^(Core)
533

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

534
535 **III.** **Fellow Appointments**

536
537 **III.A.** **Eligibility Criteria**

538
539 **III.A.1.** **Eligibility Requirements – Fellowship Programs**

540
541 **All required clinical education for entry into ACGME-accredited**
542 **fellowship programs must be completed in an ACGME-accredited**
543 **residency program, an AOA-approved residency program, a**
544 **program with ACGME International (ACGME-I) Advanced Specialty**
545 **Accreditation, or a Royal College of Physicians and Surgeons of**

546
547
548
549

**Canada (RCPSC)-accredited or College of Family Physicians of
Canada (CFPC)-accredited residency program located in Canada.**
(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

559
560
561
562
563
564
565
566

- III.A.1.a) Fellowship programs must receive verification of each entering fellow’s level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program.** (Core)
- III.A.1.b)** Prior to entry in the program, fellows must have successfully completed a residency program that satisfies III.A.1. and that includes a minimum of 12 months of preventive, primary, surgical, and/or critical care training. (Core)
- III.A.1.c) Fellow Eligibility Exception**
The Review Committees for Emergency Medicine and Preventive Medicine will allow the following exception to the fellowship eligibility requirements:

Specialty Background and Intent: When exercising the Eligibility Exception for an exceptionally qualified candidate who is seeking board certification, programs must be aware that completing an ACGME-accredited fellowship program may not by itself be sufficient to meet the eligibility requirements for subspecialty certification. Programs must contact the applicable certifying board directly to determine an applicant’s eligibility for certification.

587
588

- III.A.1.c).(1) An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions:** (Core)
 - III.A.1.c).(1).(a) evaluation by the program director and fellowship selection committee of the applicant’s suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and,** (Core)
 - III.A.1.c).(1).(b) review and approval of the applicant’s exceptional qualifications by the GMEC; and,** (Core)
 - III.A.1.c).(1).(c) verification of Educational Commission for Foreign Medical Graduates (ECFMG) certification.** (Core)

589
590
591
592
593
594

III.A.1.c).(2)

Applicants accepted through this exception must have an evaluation of their performance by the Clinical Competency Committee within 12 weeks of matriculation. ^(Core)

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

623

III.B. The program director must not appoint more fellows than approved by the Review Committee. ^(Core)

III.B.1. All complement increases must be approved by the Review Committee. ^(Core)

III.C. Fellow Transfers

The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring fellow, and Milestones evaluations upon matriculation. ^(Core)

IV. Educational Program

The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis

624 *on research, leadership, public health, etc. It is expected that the program aims*
625 *will reflect the nuanced program-specific goals for it and its graduates; for*
626 *example, it is expected that a program aiming to prepare physician-scientists will*
627 *have a different curriculum from one focusing on community health.*

628
629 **IV.A. The curriculum must contain the following educational components:** (Core)

630
631 **IV.A.1. a set of program aims consistent with the Sponsoring Institution's**
632 **mission, the needs of the community it serves, and the desired**
633 **distinctive capabilities of its graduates;** (Core)

634
635 **IV.A.1.a) The program's aims must be made available to program**
636 **applicants, fellows, and faculty members.** (Core)

637
638 **IV.A.2. competency-based goals and objectives for each educational**
639 **experience designed to promote progress on a trajectory to**
640 **autonomous practice in their subspecialty. These must be**
641 **distributed, reviewed, and available to fellows and faculty members;**
642 (Core)

643
644 **IV.A.3. delineation of fellow responsibilities for patient care, progressive**
645 **responsibility for patient management, and graded supervision in**
646 **their subspecialty;** (Core)

647
Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

648
649 **IV.A.4. structured educational activities beyond direct patient care; and,**
650 (Core)

651
Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

652
653 **IV.A.5. advancement of fellows' knowledge of ethical principles**
654 **foundational to medical professionalism.** (Core)

655
656 **IV.B. ACGME Competencies**

657
Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the

Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

658
659
660
661
662
663
664
665
666
667
668

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: (Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

692
693
694

IV.B.1.b).(1) Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. (Core)

IV.B.1.b).(1).(a) Fellows must demonstrate competence in the: (Core)

IV.B.1.b).(1).(a).(i) assessment of prospective divers for fitness to dive; (Core)

IV.B.1.b).(1).(a).(ii) assessment of hyperbaric chamber personnel for fitness to participate as a tender in a multiplace hyperbaric chamber; (Core)

IV.B.1.b).(1).(a).(iii) assessment of patients with suspected decompression sickness or arterial gas embolism and prescription of treatment; (Core)

IV.B.1.b).(1).(a).(iv) assessment of patients with specific problem wounds with respect to indications for hyperbaric oxygen therapy, fitness for hyperbaric treatment and prescription of treatment; (Core)

695 IV.B.1.b).(1).(a).(v) assessment and management of patients
696 with complications of hyperbaric therapy;
697 (Core)

698
699 IV.B.1.b).(1).(a).(vi) management of critically-ill patients in the
700 hyperbaric environment; and, (Core)

701
702 IV.B.1.b).(1).(a).(vii) assessment of patients with toxic gas
703 exposure (e.g., carbon monoxide). (Core)

704
705 **IV.B.1.b).(2) Fellows must be able to perform all medical,
706 diagnostic, and surgical procedures considered
707 essential for the area of practice. (Core)**

708
709 **IV.B.1.c) Medical Knowledge**

710
711 **Fellows must demonstrate knowledge of established and
712 evolving biomedical, clinical, epidemiological and social-
713 behavioral sciences, as well as the application of this
714 knowledge to patient care. (Core)**

715
716 IV.B.1.c).(1) Fellows must demonstrate competence in their knowledge
717 of the indications and contraindications for hyperbaric
718 oxygen therapy and dive medicine. (Core)

719
720 **IV.B.1.d) Practice-based Learning and Improvement**

721
722 **Fellows must demonstrate the ability to investigate and
723 evaluate their care of patients, to appraise and assimilate
724 scientific evidence, and to continuously improve patient care
725 based on constant self-evaluation and lifelong learning. (Core)**

726
**Background and Intent: Practice-based learning and improvement is one of the
defining characteristics of being a physician. It is the ability to investigate and
evaluate the care of patients, to appraise and assimilate scientific evidence, and to
continuously improve patient care based on constant self-evaluation and lifelong
learning.**
**The intention of this Competency is to help a fellow refine the habits of mind required
to continuously pursue quality improvement, well past the completion of fellowship.**

727
728 **IV.B.1.e) Interpersonal and Communication Skills**

729
730 **Fellows must demonstrate interpersonal and communication
731 skills that result in the effective exchange of information and
732 collaboration with patients, their families, and health
733 professionals. (Core)**

734
735 **IV.B.1.f) Systems-based Practice**

736

737 **Fellows must demonstrate an awareness of and**
738 **responsiveness to the larger context and system of health**
739 **care, including the social determinants of health, as well as**
740 **the ability to call effectively on other resources to provide**
741 **optimal health care.** (Core)
742

743 **IV.C. Curriculum Organization and Fellow Experiences**

744
745 **IV.C.1. The curriculum must be structured to optimize fellow educational**
746 **experiences, the length of these experiences, and supervisory**
747 **continuity.** (Core)
748

749 IV.C.1.a) Clinical experiences should be structured to facilitate learning in a
750 manner that allows the fellows to function as part of an effective
751 interprofessional team that works together towards the shared
752 goals of patient safety and quality improvement. (Detail)
753

754 IV.C.1.b) The program director is responsible for determining the duration of
755 the clinical experiences for fellows on all rotations. (Core)
756

757 **IV.C.2. The program must provide instruction and experience in pain**
758 **management if applicable for the subspecialty, including recognition**
759 **of the signs of addiction.** (Core)
760

761 IV.C.3. Didactic Experiences

762
763 IV.C.3.a) Programs must teach the basic skills and knowledge that
764 constitute the foundations of hyperbaric medicine practice, and
765 must provide progressive responsibility for and experience in the
766 application of these principles to the management of clinical
767 problems. (Core)
768

769 IV.C.3.b) Programs must offer a broad education in undersea and
770 hyperbaric medicine to prepare fellows to provide comprehensive
771 patient care in the specialty. (Core)
772

773 IV.C.3.c) The program director and teaching faculty members must prepare
774 and comply with written educational goals for the program. (Core)
775

776 IV.C.3.c).(1) All educational components should be related to the
777 program goals. (Detail)
778

779 IV.C.3.d) Seminars and critical literature review activities pertaining to the
780 subspecialty must be conducted regularly and as scheduled. (Core)
781

782 IV.C.3.e) Each program must offer its fellows an average of at least five
783 hours per week of planned educational experiences not including
784 change-of-shift reports. (Core)
785

786 IV.C.3.e).(1) These educational experiences must include presentations
787 based on the core content areas. (Core)

788		
789	IV.C.3.e).(2)	These educational experiences should include:
790		
791	IV.C.3.e).(2).(a)	administrative seminars; ^(Detail)
792		
793	IV.C.3.e).(2).(b)	clinical and basic science; ^(Detail)
794		
795	IV.C.3.e).(2).(c)	journal review; ^(Detail)
796		
797	IV.C.3.e).(2).(d)	morbidity and mortality conferences; and, ^(Detail)
798		
799	IV.C.3.e).(2).(e)	research methods. ^(Detail)
800		
801	IV.C.3.f)	Fellows must participate, on average, in at least 70 percent of the
802		planned didactic experiences offered. ^(Core)
803		
804	IV.C.4.	Academic and Clinical Content
805		
806		The curriculum must include the following academic and clinical content:
807		^(Core)
808		
809	IV.C.4.a)	history of undersea and hyperbaric medicine; ^(Core)
810		
811	IV.C.4.b)	decompression theory and physiology, including theory and
812		application of decompression tables; ^(Core)
813		
814	IV.C.4.c)	oxygen physiology in normobaric, hyperbaric and hypobaric
815		environments, and oxygen toxicity; ^(Core)
816		
817	IV.C.4.d)	pathophysiology of decompression illness and arterial gas
818		embolism, including iatrogenic gas embolism; ^(Core)
819		
820	IV.C.4.e)	diving operations and human performance in the hyperbaric and
821		hypobaric environments; ^(Core)
822		
823	IV.C.4.f)	medical examination and standards for divers and personnel
824		working in hyperbaric and hypobaric environments; ^(Core)
825		
826	IV.C.4.g)	effects of hyperbaric oxygenation on infectious disease; ^(Core)
827		
828	IV.C.4.h)	principles of treatment of toxic gas exposures, such as carbon
829		monoxide poisoning; ^(Core)
830		
831	IV.C.4.i)	effects of hyperbaric oxygenation on irradiated tissues and
832		ischemic wounds; ^(Core)
833		
834	IV.C.4.j)	tissue oxygen measurement; ^(Core)
835		
836	IV.C.4.k)	multiplace and monoplace hyperbaric chamber operations,
837		including safety considerations, management of critically-ill

838		patients in the hyperbaric environment, clinical monitoring, and
839		mechanical ventilation; ^(Core)
840		
841	IV.C.4.l)	evaluation of the patient for clinical hyperbaric treatment, including
842		contraindications and side effects; ^(Core)
843		
844	IV.C.4.m)	hazards of standard electrical therapies in hyperbaric
845		environment, including electrical defibrillation and precautions;
846		^(Core)
847		
848	IV.C.4.n)	emergency procedures for both monoplace and multiplace
849		installations; ^(Core)
850		
851	IV.C.4.o)	saturation diving covering air quality standards and life support
852		requirements, including the physiology and practical (medical)
853		issues associated with heliox, trimix, and hydrogen/oxygen/helium
854		mixtures; and, ^(Core)
855		
856	IV.C.4.p)	systems management, including administrative aspects of
857		chamber operations, such as billing issues, quality assurance, and
858		peer review. ^(Core)
859		
860	IV.C.5.	Fellow Experiences
861		
862	IV.C.5.a)	At least 10 months of fellow experiences must include:
863		
864	IV.C.5.a).(1)	participation as the primary or consulting physician
865		responsible for providing direct/bedside patient evaluation
866		and management; and, ^(Core)
867		
868	IV.C.5.a).(2)	the evaluation and management of patients with both
869		acute and non-emergency indications for hyperbaric
870		oxygen therapy. ^(Core)
871		
872	IV.C.5.a).(2).(a)	Each fellow must have the opportunity to evaluate
873		at least 50 patients for treatment initiation of
874		hyperbaric therapy or fitness to dive, including
875		responsibility for providing bedside evaluation and
876		management. ^(Core)
877		
878	IV.C.5.a).(3)	Up to two months of electives are allowed for additional
879		training in areas of relevance to undersea and hyperbaric
880		medicine, such as critical care, surgery, submarine
881		medicine, toxicology or radiation oncology. ^(Detail)
882		
883	IV.C.5.b)	Fellows must have progressive experience and responsibility for
884		the teaching of undersea and hyperbaric medicine to health care
885		trainees and professionals, including medical students, interns,
886		other fellows, and nurses. ^(Core)
887		
888	IV.D.	Scholarship

889
890 **Medicine is both an art and a science. The physician is a humanistic**
891 **scientist who cares for patients. This requires the ability to think critically,**
892 **evaluate the literature, appropriately assimilate new knowledge, and**
893 **practice lifelong learning. The program and faculty must create an**
894 **environment that fosters the acquisition of such skills through fellow**
895 **participation in scholarly activities as defined in the subspecialty-specific**
896 **Program Requirements. Scholarly activities may include discovery,**
897 **integration, application, and teaching.**

898
899 **The ACGME recognizes the diversity of fellowships and anticipates that**
900 **programs prepare physicians for a variety of roles, including clinicians,**
901 **scientists, and educators. It is expected that the program's scholarship will**
902 **reflect its mission(s) and aims, and the needs of the community it serves.**
903 **For example, some programs may concentrate their scholarly activity on**
904 **quality improvement, population health, and/or teaching, while other**
905 **programs might choose to utilize more classic forms of biomedical**
906 **research as the focus for scholarship.**

907
908 **IV.D.1. Program Responsibilities**

909
910 **IV.D.1.a) The program must demonstrate evidence of scholarly**
911 **activities, consistent with its mission(s) and aims. ^(Core)**

912
913 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
914 **must allocate adequate resources to facilitate fellow and**
915 **faculty involvement in scholarly activities. ^(Core)**

916
917 **IV.D.2. Faculty Scholarly Activity**

918
919 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
920 **accomplishments in at least three of the following domains:**
921 **^(Core)**

- 922
923
- 924 • **Research in basic science, education, translational**
 - 925 **science, patient care, or population health**
 - 926 • **Peer-reviewed grants**
 - 927 • **Quality improvement and/or patient safety initiatives**
 - 928 • **Systematic reviews, meta-analyses, review articles,**
 - 929 **chapters in medical textbooks, or case reports**
 - 930 • **Creation of curricula, evaluation tools, didactic**
 - 931 **educational activities, or electronic educational**
 - 932 **materials**
 - 933 • **Contribution to professional committees, educational**
 - 934 **organizations, or editorial boards**
 - 935 • **Innovations in education**

936 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
937 **activity within and external to the program by the following**
938 **methods:**

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

- IV.D.2.b).(1) faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor; (Outcome)‡
- IV.D.2.b).(2) peer-reviewed publication. (Outcome)
- IV.D.2.b).(2).(a) While not all faculty members must be investigators, the faculty as a whole must demonstrate broad involvement in scholarly activity. (Core)
- IV.D.2.b).(2).(a).(i) The faculty as a whole must demonstrate at least one piece of scholarly activity per year, averaged over five years. (Core)
- IV.D.2.b).(2).(a).(ii) The responsibility for establishing and maintaining an environment of inquiry and scholarship rests with the faculty, and an active research component must be included in the program. (Core)
- IV.D.3. Fellow Scholarly Activity**
- IV.D.3.a) The curriculum must advance fellows’ knowledge of the basic principles of research, including how research is conducted, evaluated, explained to patients, and applied to patient care. (Core)
- IV.D.3.b) Fellows must participate in scholarly activity that includes at least one of the following:
 - IV.D.3.b).(1) peer-reviewed funding and research; (Outcome)
 - IV.D.3.b).(2) publication of original research or review articles; or, (Outcome)

981 IV.D.3.b).(3) presentations at local, regional, or national professional
982 and scientific society meetings. ^(Outcome)
983

984 **IV.E. Fellowship programs may assign fellows to engage in the independent**
985 **practice of their core specialty during their fellowship program.**
986

987 [The Review Committee’s proposal to allow the independent practice option is
988 part of the focused revision and is subject to public comment.]
989

990 **IV.E.1. If programs permit their fellows to utilize the independent practice**
991 **option, it must not exceed 20 percent of their time per week or 10**
992 **weeks of an academic year.** ^(Core)
993

Background and Intent: Fellows who have previously completed residency programs have demonstrated sufficient competence to enter autonomous practice within their core specialty. This option is designed to enhance fellows’ maturation and competence in their core specialty. This enables fellows to occupy a dual role in the health system: as learners in their subspecialty, and as credentialed practitioners in their core specialty. Hours worked in independent practice during fellowship still fall under the clinical and educational work hour limits. See Program Director Guide for more details.

994
995 IV.E.2. Fellows should maintain their primary Board skills during their fellowship.
996 ^{(Core)(Detail)} [Moved from IV.C.6.]
997

998 IV.E.2.a) ~~Fellows should not devote more than 12 hours per week,~~
999 ~~averaged over four weeks, to clinical practice unrelated to~~
1000 ~~undersea and hyperbaric medicine.~~ ^(Detail) [Moved from IV.C.6.a)]
1001

Specialty Specific Background and Intent: The Review Committee for Emergency Medicine considers the requirements above to be exclusive of moonlighting. Additional time spent by the fellows in the engagement of independent practice of their core specialty beyond the maximum stated in the requirements will be considered moonlighting, and will be counted toward the 80-hour maximum clinical time per week.

1002
1003 **V. Evaluation**

1004
1005 **V.A. Fellow Evaluation**

1006
1007 **V.A.1. Feedback and Evaluation**
1008

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1009		
1010	V.A.1.a)	Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)
1011		
1012		
1013		
1014	V.A.1.a).(1)	At least quarterly the fellows' knowledge, skills, and professional growth, must be evaluated using appropriate criteria and procedures; and, ^(Core)
1015		
1016		
1017		
1018	V.A.1.a).(2)	These evaluations must be communicated to each fellow in a timely manner. ^(Core)
1019		
1020		

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1021		
1022	V.A.1.b)	Evaluation must be documented at the completion of the assignment. ^(Core)
1023		
1024		
1025	V.A.1.b).(1)	For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)
1026		
1027		
1028		
1029	V.A.1.b).(2)	Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. ^(Core)
1030		
1031		
1032		
1033		

- 1034 V.A.1.c) The program must provide an objective performance
 1035 evaluation based on the Competencies and the subspecialty-
 1036 specific Milestones, and must: ^(Core)
 1037
 1038 V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers,
 1039 patients, self, and other professional staff members);
 1040 and, ^(Core)
 1041
 1042 V.A.1.c).(2) provide that information to the Clinical Competency
 1043 Committee for its synthesis of progressive fellow
 1044 performance and improvement toward unsupervised
 1045 practice. ^(Core)
 1046

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1047
 1048 V.A.1.d) The program director or their designee, with input from the
 1049 Clinical Competency Committee, must:
 1050
 1051 V.A.1.d).(1) meet with and review with each fellow their
 1052 documented semi-annual evaluation of performance,
 1053 including progress along the subspecialty-specific
 1054 Milestones. ^(Core)
 1055
 1056 V.A.1.d).(2) assist fellows in developing individualized learning
 1057 plans to capitalize on their strengths and identify areas
 1058 for growth; and, ^(Core)
 1059
 1060 V.A.1.d).(3) develop plans for fellows failing to progress, following
 1061 institutional policies and procedures. ^(Core)
 1062

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a

faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1063
1064 V.A.1.e) At least annually, there must be a summative evaluation of
1065 each fellow that includes their readiness to progress to the
1066 next year of the program, if applicable. (Core)
1067
- 1068 V.A.1.f) The evaluations of a fellow's performance must be accessible
1069 for review by the fellow. (Core)
1070
- 1071 V.A.2. Final Evaluation
1072
- 1073 V.A.2.a) The program director must provide a final evaluation for each
1074 fellow upon completion of the program. (Core)
1075
- 1076 V.A.2.a).(1) The subspecialty-specific Milestones, and when
1077 applicable the subspecialty-specific Case Logs, must
1078 be used as tools to ensure fellows are able to engage
1079 in autonomous practice upon completion of the
1080 program. (Core)
1081
- 1082 V.A.2.a).(2) The final evaluation must:
1083
- 1084 V.A.2.a).(2).(a) become part of the fellow's permanent record
1085 maintained by the institution, and must be
1086 accessible for review by the fellow in
1087 accordance with institutional policy; (Core)
1088
- 1089 V.A.2.a).(2).(b) verify that the fellow has demonstrated the
1090 knowledge, skills, and behaviors necessary to
1091 enter autonomous practice; (Core)
1092
- 1093 V.A.2.a).(2).(c) consider recommendations from the Clinical
1094 Competency Committee; and, (Core)
1095
- 1096 V.A.2.a).(2).(d) be shared with the fellow upon completion of
1097 the program. (Core)
1098
- 1099 V.A.3. A Clinical Competency Committee must be appointed by the
1100 program director. (Core)
1101
- 1102 V.A.3.a) At a minimum the Clinical Competency Committee must
1103 include three members, at least one of whom is a core faculty
1104 member. Members must be faculty members from the same
1105 program or other programs, or other health professionals
1106 who have extensive contact and experience with the
1107 program's fellows. (Core)
1108

- 1109 **V.A.3.b) The Clinical Competency Committee must:**
 1110
 1111 **V.A.3.b).(1) review all fellow evaluations at least semi-annually;**
 1112 **(Core)**
 1113
 1114 **V.A.3.b).(2) determine each fellow’s progress on achievement of**
 1115 **the subspecialty-specific Milestones; and, (Core)**
 1116
 1117 **V.A.3.b).(3) meet prior to the fellows’ semi-annual evaluations and**
 1118 **advise the program director regarding each fellow’s**
 1119 **progress. (Core)**
 1120
 1121 **V.B. Faculty Evaluation**
 1122
 1123 **V.B.1. The program must have a process to evaluate each faculty**
 1124 **member’s performance as it relates to the educational program at**
 1125 **least annually. (Core)**
 1126

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1127
 1128 **V.B.1.a) This evaluation must include a review of the faculty member’s**
 1129 **clinical teaching abilities, engagement with the educational**
 1130 **program, participation in faculty development related to their**
 1131 **skills as an educator, clinical performance, professionalism,**
 1132 **and scholarly activities. (Core)**
 1133
 1134 **V.B.1.b) This evaluation must include written, confidential evaluations**
 1135 **by the fellows. (Core)**
 1136
 1137 **V.B.2. Faculty members must receive feedback on their evaluations at least**
 1138 **annually. (Core)**
 1139

1140 V.B.3. Results of the faculty educational evaluations should be
1141 incorporated into program-wide faculty development plans. (Core)
1142

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1143
1144 V.C. Program Evaluation and Improvement
1145

1146 V.C.1. The program director must appoint the Program Evaluation
1147 Committee to conduct and document the Annual Program
1148 Evaluation as part of the program’s continuous improvement
1149 process. (Core)
1150

1151 V.C.1.a) The Program Evaluation Committee must be composed of at
1152 least two program faculty members, at least one of whom is a
1153 core faculty member, and at least one fellow. (Core)
1154

1155 V.C.1.b) Program Evaluation Committee responsibilities must include:

1156
1157 V.C.1.b).(1) acting as an advisor to the program director, through
1158 program oversight; (Core)
1159

1160 V.C.1.b).(2) review of the program’s self-determined goals and
1161 progress toward meeting them; (Core)
1162

1163 V.C.1.b).(3) guiding ongoing program improvement, including
1164 development of new goals, based upon outcomes;
1165 and, (Core)
1166

1167 V.C.1.b).(4) review of the current operating environment to identify
1168 strengths, challenges, opportunities, and threats as
1169 related to the program’s mission and aims. (Core)
1170

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

1171
1172 V.C.1.c) The Program Evaluation Committee should consider the
1173 following elements in its assessment of the program:
1174

1175 V.C.1.c).(1) curriculum; (Core)
1176

1177 V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s);
1178 (Core)

1179		
1180	V.C.1.c).(3)	ACGME letters of notification, including citations, Areas for Improvement, and comments; ^(Core)
1181		
1182		
1183	V.C.1.c).(4)	quality and safety of patient care; ^(Core)
1184		
1185	V.C.1.c).(5)	aggregate fellow and faculty:
1186		
1187	V.C.1.c).(5).(a)	well-being; ^(Core)
1188		
1189	V.C.1.c).(5).(b)	recruitment and retention; ^(Core)
1190		
1191	V.C.1.c).(5).(c)	workforce diversity; ^(Core)
1192		
1193	V.C.1.c).(5).(d)	engagement in quality improvement and patient safety; ^(Core)
1194		
1195		
1196	V.C.1.c).(5).(e)	scholarly activity; ^(Core)
1197		
1198	V.C.1.c).(5).(f)	ACGME Resident/Fellow and Faculty Surveys (where applicable); and, ^(Core)
1199		
1200		
1201	V.C.1.c).(5).(g)	written evaluations of the program. ^(Core)
1202		
1203	V.C.1.c).(6)	aggregate fellow:
1204		
1205	V.C.1.c).(6).(a)	achievement of the Milestones; ^(Core)
1206		
1207	V.C.1.c).(6).(b)	in-training examinations (where applicable); ^(Core)
1208		
1209		
1210	V.C.1.c).(6).(c)	board pass and certification rates; and, ^(Core)
1211		
1212	V.C.1.c).(6).(d)	graduate performance. ^(Core)
1213		
1214	V.C.1.c).(7)	aggregate faculty:
1215		
1216	V.C.1.c).(7).(a)	evaluation; and, ^(Core)
1217		
1218	V.C.1.c).(7).(b)	professional development ^(Core)
1219		
1220	V.C.1.d)	The Program Evaluation Committee must evaluate the program's mission and aims, strengths, areas for improvement, and threats. ^(Core)
1221		
1222		
1223		
1224	V.C.1.e)	The annual review, including the action plan, must:
1225		
1226	V.C.1.e).(1)	be distributed to and discussed with the members of the teaching faculty and the fellows; and, ^(Core)
1227		
1228		
1229	V.C.1.e).(2)	be submitted to the DIO. ^(Core)

1230
1231 **V.C.2.** The program must participate in a Self-Study prior to its 10-Year
1232 Accreditation Site Visit. *(Core)*

1233
1234 **V.C.2.a)** A summary of the Self-Study must be submitted to the DIO.
1235 *(Core)*
1236

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1237
1238 **V.C.3.** *One goal of ACGME-accredited education is to educate physicians*
1239 *who seek and achieve board certification. One measure of the*
1240 *effectiveness of the educational program is the ultimate pass rate.*

1241
1242 *The program director should encourage all eligible program*
1243 *graduates to take the certifying examination offered by the*
1244 *applicable American Board of Medical Specialties (ABMS) member*
1245 *board or American Osteopathic Association (AOA) certifying board.*

1246
1247 **V.C.3.a)** For subspecialties in which the ABMS member board and/or
1248 AOA certifying board offer(s) an annual written exam, in the
1249 preceding three years, the program's aggregate pass rate of
1250 those taking the examination for the first time must be higher
1251 than the bottom fifth percentile of programs in that
1252 subspecialty. *(Outcome)*

1253
1254 **V.C.3.b)** For subspecialties in which the ABMS member board and/or
1255 AOA certifying board offer(s) a biennial written exam, in the
1256 preceding six years, the program's aggregate pass rate of
1257 those taking the examination for the first time must be higher
1258 than the bottom fifth percentile of programs in that
1259 subspecialty. *(Outcome)*

1260
1261 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
1262 AOA certifying board offer(s) an annual oral exam, in the
1263 preceding three years, the program's aggregate pass rate of
1264 those taking the examination for the first time must be higher
1265 than the bottom fifth percentile of programs in that
1266 subspecialty. *(Outcome)*

1267
1268 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
1269 AOA certifying board offer(s) a biennial oral exam, in the

1270 preceding six years, the program's aggregate pass rate of
1271 those taking the examination for the first time must be higher
1272 than the bottom fifth percentile of programs in that
1273 subspecialty. ^(Outcome)

1274
1275 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1276 whose graduates over the time period specified in the
1277 requirement have achieved an 80 percent pass rate will have
1278 met this requirement, no matter the percentile rank of the
1279 program for pass rate in that subspecialty. ^(Outcome)
1280

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1281
1282 **V.C.3.f)** Programs must report, in ADS, board certification status
1283 annually for the cohort of board-eligible fellows that
1284 graduated seven years earlier. ^(Core)
1285

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1286
1287 **VI. The Learning and Working Environment**
1288

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*

1294

- 1295 • *Excellence in the safety and quality of care rendered to patients by today's*
- 1296 *fellows in their future practice*
- 1297
- 1298 • *Excellence in professionalism through faculty modeling of:*
- 1299
- 1300 ○ *the effacement of self-interest in a humanistic environment that supports*
- 1301 *the professional development of physicians*
- 1302
- 1303 ○ *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- 1304
- 1305 • *Commitment to the well-being of the students, residents, fellows, faculty*
- 1306 *members, and all members of the health care team*
- 1307

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1441 participate in interprofessional quality
1442 improvement activities. ^(Core)
1443

1444 VI.A.1.b).(3).(a).(i) This should include activities aimed at
1445 reducing health care disparities. ^(Detail)
1446

1447 VI.A.2. Supervision and Accountability

1448
1449 VI.A.2.a) *Although the attending physician is ultimately responsible for*
1450 *the care of the patient, every physician shares in the*
1451 *responsibility and accountability for their efforts in the*
1452 *provision of care. Effective programs, in partnership with*
1453 *their Sponsoring Institutions, define, widely communicate,*
1454 *and monitor a structured chain of responsibility and*
1455 *accountability as it relates to the supervision of all patient*
1456 *care.*
1457

1458 *Supervision in the setting of graduate medical education*
1459 *provides safe and effective care to patients; ensures each*
1460 *fellow's development of the skills, knowledge, and attitudes*
1461 *required to enter the unsupervised practice of medicine; and*
1462 *establishes a foundation for continued professional growth.*
1463

1464 VI.A.2.a).(1) Each patient must have an identifiable and
1465 appropriately-credentialed and privileged attending
1466 physician (or licensed independent practitioner as
1467 specified by the applicable Review Committee) who is
1468 responsible and accountable for the patient's care.
1469 ^(Core)
1470

1471	VI.A.2.a).(1).(a)	This information must be available to fellows, faculty members, other members of the health care team, and patients. ^(Core)
1472		
1473		
1474		
1475	VI.A.2.a).(1).(b)	Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. ^(Core)
1476		
1477		
1478		
1479	VI.A.2.b)	<i>Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the immediate availability of the supervising faculty member or fellow, either on site or by means of telephonic and/or electronic modalities. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.</i>
1480		
1481

1483		
1484		
1485		
1486		
1487		
1488		
1489		
1490	VI.A.2.b).(1)	The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow's level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. ^(Core)
1491		
1492		
1493		
1494		
1495		
1496		
1497	VI.A.2.c)	Levels of Supervision
1498		
1499		To promote oversight of fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: ^(Core)
1500		
1501		
1502		
1503	VI.A.2.c).(1)	Direct Supervision – the supervising physician is physically present with the fellow and patient. ^(Core)
1504		
1505		
1506	VI.A.2.c).(2)	Indirect Supervision:
1507		
1508	VI.A.2.c).(2).(a)	with Direct Supervision immediately available – the supervising physician is physically within the hospital or other site of patient care, and is immediately available to provide Direct Supervision. ^(Core)
1509		
1510		
1511		
1512		
1513		
1514	VI.A.2.c).(2).(b)	with Direct Supervision available – the supervising physician is not physically present within the hospital or other site of patient care, but is immediately available by means of telephonic and/or electronic modalities, and is available to provide Direct Supervision. ^(Core)
1515		
1516		
1517		
1518		
1519		
1520		

- 1521 VI.A.2.c).(3) Oversight – the supervising physician is available to
- 1522 provide review of procedures/encounters with
- 1523 feedback provided after care is delivered. (Core)
- 1524
- 1525 VI.A.2.d) The privilege of progressive authority and responsibility,
- 1526 conditional independence, and a supervisory role in patient
- 1527 care delegated to each fellow must be assigned by the
- 1528 program director and faculty members. (Core)
- 1529
- 1530 VI.A.2.d).(1) The program director must evaluate each fellow’s
- 1531 abilities based on specific criteria, guided by the
- 1532 Milestones. (Core)
- 1533
- 1534 VI.A.2.d).(2) Faculty members functioning as supervising
- 1535 physicians must delegate portions of care to fellows
- 1536 based on the needs of the patient and the skills of
- 1537 each fellow. (Core)
- 1538
- 1539 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior
- 1540 fellows and residents in recognition of their progress
- 1541 toward independence, based on the needs of each
- 1542 patient and the skills of the individual resident or
- 1543 fellow. (Detail)
- 1544
- 1545 VI.A.2.e) Programs must set guidelines for circumstances and events
- 1546 in which fellows must communicate with the supervising
- 1547 faculty member(s). (Core)
- 1548
- 1549 VI.A.2.e).(1) Each fellow must know the limits of their scope of
- 1550 authority, and the circumstances under which the
- 1551 fellow is permitted to act with conditional
- 1552 independence. (Outcome)
- 1553

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1554
- 1555 VI.A.2.f) Faculty supervision assignments must be of sufficient
- 1556 duration to assess the knowledge and skills of each fellow
- 1557 and to delegate to the fellow the appropriate level of patient
- 1558 care authority and responsibility. (Core)
- 1559
- 1560 VI.B. Professionalism
- 1561
- 1562 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
- 1563 educate fellows and faculty members concerning the professional
- 1564 responsibilities of physicians, including their obligation to be
- 1565 appropriately rested and fit to provide the care required by their
- 1566 patients. (Core)
- 1567
- 1568 VI.B.2. The learning objectives of the program must:

- 1569
1570 VI.B.2.a) be accomplished through an appropriate blend of supervised
1571 patient care responsibilities, clinical teaching, and didactic
1572 educational events; ^(Core)
1573
1574 VI.B.2.b) be accomplished without excessive reliance on fellows to
1575 fulfill non-physician obligations; and, ^(Core)
1576

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

- 1577
1578 VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)
1579

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

- 1580
1581 VI.B.3. The program director, in partnership with the Sponsoring Institution,
1582 must provide a culture of professionalism that supports patient
1583 safety and personal responsibility. ^(Core)
1584
1585 VI.B.4. Fellows and faculty members must demonstrate an understanding
1586 of their personal role in the:
1587
1588 VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)
1589
1590 VI.B.4.b) safety and welfare of patients entrusted to their care,
1591 including the ability to report unsafe conditions and adverse
1592 events; ^(Outcome)
1593

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

- 1594
1595 VI.B.4.c) assurance of their fitness for work, including: ^(Outcome)
1596

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for

patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

- 1597
1598 VI.B.4.c).(1) management of their time before, during, and after
1599 clinical assignments; and, (Outcome)
1600
1601 VI.B.4.c).(2) recognition of impairment, including from illness,
1602 fatigue, and substance use, in themselves, their peers,
1603 and other members of the health care team. (Outcome)
1604
1605 VI.B.4.d) commitment to lifelong learning; (Outcome)
1606
1607 VI.B.4.e) monitoring of their patient care performance improvement
1608 indicators; and, (Outcome)
1609
1610 VI.B.4.f) accurate reporting of clinical and educational work hours,
1611 patient outcomes, and clinical experience data. (Outcome)
1612
1613 VI.B.5. All fellows and faculty members must demonstrate responsiveness
1614 to patient needs that supersedes self-interest. This includes the
1615 recognition that under certain circumstances, the best interests of
1616 the patient may be served by transitioning that patient's care to
1617 another qualified and rested provider. (Outcome)
1618
1619 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
1620 provide a professional, equitable, respectful, and civil environment
1621 that is free from discrimination, sexual and other forms of
1622 harassment, mistreatment, abuse, or coercion of students, fellows,
1623 faculty, and staff. (Core)
1624
1625 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1626 have a process for education of fellows and faculty regarding
1627 unprofessional behavior and a confidential process for reporting,
1628 investigating, and addressing such concerns. (Core)
1629
1630 VI.C. Well-Being
1631
1632 *Psychological, emotional, and physical well-being are critical in the*
1633 *development of the competent, caring, and resilient physician and require*
1634 *proactive attention to life inside and outside of medicine. Well-being*
1635 *requires that physicians retain the joy in medicine while managing their*
1636 *own real life stresses. Self-care and responsibility to support other*
1637 *members of the health care team are important components of*
1638 *professionalism; they are also skills that must be modeled, learned, and*
1639 *nurtured in the context of other aspects of fellowship training.*
1640
1641 *Fellows and faculty members are at risk for burnout and depression.*
1642 *Programs, in partnership with their Sponsoring Institutions, have the same*
1643 *responsibility to address well-being as other aspects of resident*

1644 *competence. Physicians and all members of the health care team share*
 1645 *responsibility for the well-being of each other. For example, a culture which*
 1646 *encourages covering for colleagues after an illness without the expectation*
 1647 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
 1648 *clinical learning environment models constructive behaviors, and prepares*
 1649 *fellows with the skills and attitudes needed to thrive throughout their*
 1650 *careers.*
 1651

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

- 1652
 1653 **VI.C.1.** **The responsibility of the program, in partnership with the**
 1654 **Sponsoring Institution, to address well-being must include:**
 1655
 1656 **VI.C.1.a)** **efforts to enhance the meaning that each fellow finds in the**
 1657 **experience of being a physician, including protecting time**
 1658 **with patients, minimizing non-physician obligations,**
 1659 **providing administrative support, promoting progressive**
 1660 **autonomy and flexibility, and enhancing professional**
 1661 **relationships; ^(Core)**
 1662
 1663 **VI.C.1.b)** **attention to scheduling, work intensity, and work**
 1664 **compression that impacts fellow well-being; ^(Core)**
 1665
 1666 **VI.C.1.c)** **evaluating workplace safety data and addressing the safety of**
 1667 **fellows and faculty members; ^(Core)**
 1668

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

- 1669
 1670 **VI.C.1.d)** **policies and programs that encourage optimal fellow and**
 1671 **faculty member well-being; and, ^(Core)**
 1672

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

VI.C.1.e)

attention to fellow and faculty member burnout, depression, and substance abuse. The program, in partnership with its Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout, depression, and substance abuse, including means to assist those who experience these conditions. Fellows and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: (Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1691

VI.C.1.e).(1)

encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; (Core)

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired

physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1699
1700 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1701 and, ^(Core)
1702
1703 VI.C.1.e).(3) provide access to confidential, affordable mental
1704 health assessment, counseling, and treatment,
1705 including access to urgent and emergent care 24
1706 hours a day, seven days a week. ^(Core)
1707

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1708
1709 VI.C.2. There are circumstances in which fellows may be unable to attend
1710 work, including but not limited to fatigue, illness, family
1711 emergencies, and parental leave. Each program must allow an
1712 appropriate length of absence for fellows unable to perform their
1713 patient care responsibilities. ^(Core)
1714
1715 VI.C.2.a) The program must have policies and procedures in place to
1716 ensure coverage of patient care. ^(Core)
1717
1718 VI.C.2.b) These policies must be implemented without fear of negative
1719 consequences for the fellow who is or was unable to provide
1720 the clinical work. ^(Core)
1721

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1722
1723 VI.D. Fatigue Mitigation
1724
1725 VI.D.1. Programs must:
1726
1727 VI.D.1.a) educate all faculty members and fellows to recognize the
1728 signs of fatigue and sleep deprivation; ^(Core)
1729
1730 VI.D.1.b) educate all faculty members and fellows in alertness
1731 management and fatigue mitigation processes; and, ^(Core)
1732

1733 VI.D.1.c) encourage fellows to use fatigue mitigation processes to
1734 manage the potential negative effects of fatigue on patient
1735 care and learning. ^(Detail)
1736

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1737
1738 VI.D.2. Each program must ensure continuity of patient care, consistent
1739 with the program’s policies and procedures referenced in VI.C.2–
1740 VI.C.2.b), in the event that a fellow may be unable to perform their
1741 patient care responsibilities due to excessive fatigue. ^(Core)
1742

1743 VI.D.3. The program, in partnership with its Sponsoring Institution, must
1744 ensure adequate sleep facilities and safe transportation options for
1745 fellows who may be too fatigued to safely return home. ^(Core)
1746

1747 VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care
1748

1749 VI.E.1. Clinical Responsibilities
1750

1751 The clinical responsibilities for each fellow must be based on PGY
1752 level, patient safety, fellow ability, severity and complexity of patient
1753 illness/condition, and available support services. ^(Core)
1754

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1755
1756 VI.E.2. Teamwork
1757

1758 Fellows must care for patients in an environment that maximizes
1759 communication. This must include the opportunity to work as a

1760 member of effective interprofessional teams that are appropriate to
1761 the delivery of care in the subspecialty and larger health system.
1762 (Core)

1763
1764 **VI.E.3. Transitions of Care**

1765
1766 **VI.E.3.a) Programs must design clinical assignments to optimize**
1767 **transitions in patient care, including their safety, frequency,**
1768 **and structure. (Core)**

1769
1770 **VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,**
1771 **must ensure and monitor effective, structured hand-over**
1772 **processes to facilitate both continuity of care and patient**
1773 **safety. (Core)**

1774
1775 **VI.E.3.c) Programs must ensure that fellows are competent in**
1776 **communicating with team members in the hand-over process.**
1777 **(Outcome)**

1778
1779 **VI.E.3.d) Programs and clinical sites must maintain and communicate**
1780 **schedules of attending physicians and fellows currently**
1781 **responsible for care. (Core)**

1782
1783 **VI.E.3.e) Each program must ensure continuity of patient care,**
1784 **consistent with the program’s policies and procedures**
1785 **referenced in VI.C.2-VI.C.2.b), in the event that a fellow may**
1786 **be unable to perform their patient care responsibilities due to**
1787 **excessive fatigue or illness, or family emergency. (Core)**

1788
1789 **VI.F. Clinical Experience and Education**

1790
1791 *Programs, in partnership with their Sponsoring Institutions, must design*
1792 *an effective program structure that is configured to provide fellows with*
1793 *educational and clinical experience opportunities, as well as reasonable*
1794 *opportunities for rest and personal activities.*

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1796
1797 **VI.F.1. Maximum Hours of Clinical and Educational Work per Week**

1798
1799 **Clinical and educational work hours must be limited to no more than**
1800 **80 hours per week, averaged over a four-week period, inclusive of all**
1801 **in-house clinical and educational activities, clinical work done from**
1802 **home, and all moonlighting. (Core)**

1803

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the

accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)

VI.F.2.b).(1) There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1822
1823
1824
1825

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. ^(Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1826
1827
1828
1829
1830

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. ^(Core)

1831

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1846

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. (Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. (Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. (Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

VI.F.4. Clinical and Educational Work Hour Exceptions

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; (Detail)

VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, (Detail)

1861 VI.F.4.a).(3) to attend unique educational events. (Detail)

1862
1863 VI.F.4.b) These additional hours of care or education will be counted
1864 toward the 80-hour weekly limit. (Detail)
1865

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1866
1867 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
1868 for up to 10 percent or a maximum of 88 clinical and
1869 educational work hours to individual programs based on a
1870 sound educational rationale.

1871
1872 The Review Committees for Emergency Medicine and Preventive
1873 Medicine will not consider requests for exceptions to the 80-hour
1874 limit to the fellows' work week.
1875

1876 VI.F.4.c).(1) In preparing a request for an exception, the program
1877 director must follow the clinical and educational work
1878 hour exception policy from the *ACGME Manual of*
1879 *Policies and Procedures.* (Core)

1880
1881 VI.F.4.c).(2) Prior to submitting the request to the Review
1882 Committee, the program director must obtain approval
1883 from the Sponsoring Institution's GMEC and DIO. (Core)
1884

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

1885
1886 VI.F.5. Moonlighting
1887

1888 VI.F.5.a) Moonlighting must not interfere with the ability of the fellow
1889 to achieve the goals and objectives of the educational
1890 program, and must not interfere with the fellow's fitness for
1891 work nor compromise patient safety. (Core)
1892

1893 VI.F.5.b) Time spent by fellows in internal and external moonlighting
1894 (as defined in the ACGME Glossary of Terms) must be
1895 counted toward the 80-hour maximum weekly limit. ^(Core)
1896

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1897
1898 VI.F.6. In-House Night Float
1899
1900 Night float must occur within the context of the 80-hour and one-
1901 day-off-in-seven requirements. ^(Core)
1902

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

1903
1904 VI.F.7. Maximum In-House On-Call Frequency
1905
1906 Fellows must be scheduled for in-house call no more frequently than
1907 every third night (when averaged over a four-week period). ^(Core)
1908

1909 VI.F.8. At-Home Call

1910
1911 VI.F.8.a) Time spent on patient care activities by fellows on at-home
1912 call must count toward the 80-hour maximum weekly limit.
1913 The frequency of at-home call is not subject to the every-
1914 third-night limitation, but must satisfy the requirement for one
1915 day in seven free of clinical work and education, when
1916 averaged over four weeks. ^(Core)
1917

1918 VI.F.8.a).(1) At-home call must not be so frequent or taxing as to
1919 preclude rest or reasonable personal time for each
1920 fellow. ^(Core)
1921

1922 VI.F.8.b) Fellows are permitted to return to the hospital while on at-
1923 home call to provide direct care for new or established
1924 patients. These hours of inpatient patient care must be
1925 included in the 80-hour maximum weekly limit. ^(Detail)
1926

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
