\*It is important to note that many Review Committees have other requirements for the program director position in addition to certification. Those additional requirements may be published in Program Requirements, FAQs from the Review Committee (which can be found on the Review Committee web page), or both. As is currently the case, all program director appointments must be reviewed and approved by the Review Committee. If a Review Committee determines that the qualifications of the program director of an AOA-approved program seeking ACGME accreditation do not meet the Review Committee's expectations as defined in the Program Requirements and/or FAQs the program may be required to appoint a co-program director who possesses the requisite qualifications. Questions regarding program director qualifications should be directed to the Review Committee Executive Director.
