ACGME Program Requirements for Graduate Medical Education in Medical Microbiology

Common Program Requirements (Fellowship) are in BOLD

Where applicable, text in italics describes the underlying philosophy of the requirements in that section. These philosophic statements are not program requirements and are therefore not citable.

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

Introduction

Int.A.

Fellowship is advanced graduate medical education beyond a core residency program for physicians who desire to enter more specialized practice. Fellowship-trained physicians serve the public by providing subspecialty care, which may also include core medical care, acting as a community resource for expertise in their field, creating and integrating new knowledge into practice, and educating future generations of physicians. Graduate medical education values the strength that a diverse group of physicians brings to medical care.

Fellows who have completed residency are able to practice independently in their core specialty. The prior medical experience and expertise of fellows distinguish them from physicians entering into residency training. The fellow's care of patients within the subspecialty is undertaken with appropriate faculty supervision and conditional independence. Faculty members serve as role models of excellence, compassion, professionalism, and scholarship. The fellow develops deep medical knowledge, patient care skills, and expertise applicable to their focused area of practice. Fellowship is an intensive program of subspecialty clinical and didactic education that focuses on the multidisciplinary care of patients. Fellowship education is often physically, emotionally, and intellectually demanding, and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, residents, fellows, faculty members, students, and all members of the health care team.

 In addition to clinical education, many fellowship programs advance fellows' skills as physician-scientists. While the ability to create new knowledge within medicine is not exclusive to fellowship-educated physicians, the fellowship experience expands a physician's abilities to pursue hypothesis-driven scientific inquiry that results in contributions to the medical literature and patient care. Beyond the clinical subspecialty expertise achieved, fellows develop mentored relationships built on an infrastructure that promotes collaborative research.

Int.B. Definition of Subspecialty

Medical microbiology is the subspecialty of pathology concerned primarily with the laboratory diagnosis, treatment, and control of infectious diseases. Practitioners of medical microbiology provide: medical, scientific, and administrative direction for diagnostic microbiology laboratories; consultations regarding the pathologic/microbiologic diagnosis of infectious diseases; and clinical consultations regarding the selection and interpretation of medical microbiology tests. In addition to these activities, medical microbiologists may direct the infection control program of a health care organization, and participate on or direct an antibiotic formulary committee to optimize the wise use of antimicrobial agents and minimize the emergence of resistance toward these compounds.

Int.C. Length of Educational Program

The educational program in medical microbiology must be 12 months in length. (Core)*

I. Oversight

I.A. Sponsoring Institution

The Sponsoring Institution is the organization or entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education consistent with the ACGME Institutional Requirements.

When the Sponsoring Institution is not a rotation site for the program, the most commonly utilized site of clinical activity for the program is the primary clinical site.

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

I.A.1. The program must be sponsored by one ACGME-accredited Sponsoring Institution. (Core)

I.B. Participating Sites

A participating site is an organization providing educational experiences or educational assignments/rotations for fellows.

 I.B.1. The program, with approval of its Sponsoring Institution, must designate a primary clinical site. (Core)

90	I.B.2.	There must be a program letter of agreement (PLA) between the
91		program and each participating site that governs the relationship
92		between the program and the participating site providing a required
93		assignment. (Core)
94		
95	I.B.2.a)	The PLA must:
96	•	
97	I.B.2.a).(1)	be renewed at least every 10 years; and, (Core)
98	, , ,	
99	I.B.2.a).(2)	be approved by the designated institutional official
100		(DIO). (Core)
101		
102	I.B.3.	The program must monitor the clinical learning and working
103		environment at all participating sites. (Core)
104		
105	I.B.3.a)	At each participating site there must be one faculty member,
106		designated by the program director, who is accountable for
107		fellow education for that site, in collaboration with the
108		program director. (Core)
109		

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

110		
111	I.B.4.	The program director must submit any additions or deletions of
112		participating sites routinely providing an educational experience,
113		required for all fellows, of one month full time equivalent (FTE) or
114		more through the ACGME's Accreditation Data System (ADS). (Core)
115		
116	I.C.	The program, in partnership with its Sponsoring Institution, must engage in
117		practices that focus on mission-driven, ongoing, systematic recruitment
118		and retention of a diverse and inclusive workforce of residents (if present),

fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. (Core)

121

122

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

122		
123	I.D.	Resources
124		
125	I.D.1.	The program, in partnership with its Sponsoring Institution, must
126		ensure the availability of adequate resources for fellow education.
127		(Core)
128		
129	I.D.1.a)	There must be office space, meeting rooms, and laboratory space
130		to support patient care-related teaching, educational, and
131		research activities, and clinical service work. (Core) [Moved from
132		II.D.1.]
133		
134	I.D.1.b)	Clinical material related to the subspecialty area of the fellowship
135		must be provided. (Core) [Moved from II.D.2.]
136		
137	I.D.1.b).(1)	Clinical material must be indexed so as to permit retrieval
138		of archived records in a timely manner. (Core) [Moved from
139		II.D.2.a)]
140		
141	I.D.2.	The program, in partnership with its Sponsoring Institution, must
142		ensure healthy and safe learning and working environments that
143		promote fellow well-being and provide for: (Core)
144		
145	I.D.2.a)	access to food while on duty; (Core)
146		
147	I.D.2.b)	safe, quiet, clean, and private sleep/rest facilities available
148		and accessible for fellows with proximity appropriate for safe
149		patient care; ^(Core)
150		

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

151
 152 I.D.2.c) clean and private facilities for lactation that have refrigeration
 153 capabilities, with proximity appropriate for safe patient care;
 (Core) (Core)

179 180

181 182

183 184

185 186

187

188 189 Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

156 157 I.D.2.d) security and safety measures appropriate to the participating site; and, (Core) 158 159 160 I.D.2.e) accommodations for fellows with disabilities consistent with 161 the Sponsoring Institution's policy. (Core) 162 163 I.D.3. Fellows must have ready access to subspecialty-specific and other 164 appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with 165 full text capabilities. (Core) 166 167 I.D.4. The program's educational and clinical resources must be adequate 168 to support the number of fellows appointed to the program. (Core) 169 170 171 I.E. A fellowship program usually occurs in the context of many learners and 172 other care providers and limited clinical resources. It should be structured 173 to optimize education for all learners present. 174 I.E.1. Fellows should contribute to the education of residents in core 175 programs, if present. (Core) 176 177 I.E.1.a) 178 The education of other learners must not dilute the educational

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core

experience of the program's fellows. (Core) [Moved from III.B.2.]

residents' education.

II. Personnel

II.A. Program Director

II.A.1. There must be one faculty member appointed as program director with authority and accountability for the overall program, including compliance with all applicable program requirements. (Core)

190	II.A.1.a)	The Sponsoring Institution's Graduate Medical Education
191		Committee (GMEC) must approve a change in program
192		director. (Core)
193		
194	II.A.1.b)	Final approval of the program director resides with the
195		Review Committee. (Core)
196		

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

197 198 199 200 201	II.A.2.	The program director must be provided with support adequate for administration of the program based upon its size and configuration. (Core)
202 203		[The Review Committee must further specify]
204 205 206		[The Review Committee's specification will be included in an upcoming focused revision to the Medical Microbiology Program Requirements]
207 208	II.A.3.	Qualifications of the program director:
209 210 211	II.A.3.a)	must include subspecialty expertise and qualifications acceptable to the Review Committee; and, (Core)
212 213 214 215 216 217	II.A.3.b)	must include current certification in the subspecialty for which they are the program director by the American Board of Pathology (ABPath) or by the American Osteopathic Board of, or subspecialty qualifications that are acceptable to the Review Committee. (Core)
218 219 220 221 222		[Note that while the Common Program Requirements deem certification by a certifying board of the American Osteopathic Association (AOA) acceptable, there is no AOA board that offers certification in this specialty/subspecialty]
222 223 224 225 226	II.A.3.c)	must include at least three years of active participation as a specialist in medical microbiology following completion of all graduate medical education. (Core) [Moved from II.A.2.d)]
227	II.A.4.	Program Director Responsibilities
228 229 230 231		The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and

232 promotion of fellows, and disciplinary action; supervision of fellows; 233 and fellow education in the context of patient care. (Core) 234 235 II.A.4.a) The program director must: 236 be a role model of professionalism; (Core) 237 II.A.4.a).(1) 238 Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience. 239 240 II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the 241 242 mission(s) of the Sponsoring Institution, and the mission(s) of the program; (Core) 243 244 Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities. 245 246 II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the 247 **ACGME Competency domains**; (Core) 248 249 Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and nonphysician personnel with varying levels of education, training, and experience. 250 251 II.A.4.a).(4) develop and oversee a process to evaluate candidates 252 prior to approval as program faculty members for 253 participation in the fellowship program education and 254 at least annually thereafter, as outlined in V.B.; (Core) 255 256 II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program 257 education at all sites; (Core) 258 259 260 II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program 261 education at all sites: (Core) 262

263 264 II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not 265 meet the standards of the program; (Core) 266 267 Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met. There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents. 268 269 II.A.4.a).(8) submit accurate and complete information required 270 and requested by the DIO, GMEC, and ACGME; (Core) 271 272 provide applicants who are offered an interview with II.A.4.a).(9) 273 information related to the applicant's eligibility for the 274 relevant subspecialty board examination(s); (Core) 275 276 II.A.4.a).(10) provide a learning and working environment in which fellows have the opportunity to raise concerns and 277 provide feedback in a confidential manner as 278 279 appropriate, without fear of intimidation or retaliation; 280 281 282 II.A.4.a).(11) ensure the program's compliance with the Sponsoring Institution's policies and procedures related to 283 grievances and due process; (Core) 284 285 ensure the program's compliance with the Sponsoring 286 II.A.4.a).(12) 287 Institution's policies and procedures for due process 288 when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a fellow; 289 290 291 Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows. 292 293 II.A.4.a).(13) ensure the program's compliance with the Sponsoring 294 Institution's policies and procedures on employment and non-discrimination; (Core) 295 296 297 II.A.4.a).(13).(a) Fellows must not be required to sign a non-

(Core)

298

299 300 competition guarantee or restrictive covenant.

301	II.A.4.a).(14)	document verification of program completion for all
302		graduating fellows within 30 days; (Core)
303		
304	II.A.4.a).(15)	provide verification of an individual fellow's
305		completion upon the fellow's request, within 30 days;
306		and, ^(Core)
307		

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

II.A.4.a).(16) obtain review and approval of the Sponsoring Institution's DIO before submitting information or requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program **Director's Guide to the Common Program** Requirements. (Core) II.A.4.a).(17) prepare and implement a supervision policy that specifies fellow and faculty member lines of responsibility; and, (Core) [Moved from II.A.3.e)] II.A.4.a).(18) devote a minimum of 10 hours per week of his or her time,

averaged over four weeks, to the fellowship program, to include clinical work with fellows, teaching, research, and fellowship-related administration. (Core) [Moved from II.A.3.f)]

II.B. Faculty

Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a

345 professional manner and attending to the well-being of the fellows and 346 themselves. 347 Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment or salary support. 348 349 II.B.1. For each participating site, there must be a sufficient number of 350 faculty members with competence to instruct and supervise all fellows at that location. (Core) 351 352 353 II.B.1.a) In addition to the program director, the faculty must include at 354 least one core faculty member with demonstrated expertise in 355 medical microbiology with either medical microbiology certification by the ABPath or possess qualifications judged acceptable to the 356 Review Committee. (Core) [Moved from II.B.1.a)] 357 358 359 II.B.1.a).(1) The program director or at least one core faculty member 360 must be certified in medical microbiology by the ABPath American Board of Pathology. (Core) [Moved from 361 362 II.B.1.a).(1)] 363 364 II.B.2. **Faculty members must:** 365 366 be role models of professionalism; (Core) II.B.2.a) 367 demonstrate commitment to the delivery of safe, quality, 368 II.B.2.b) 369 cost-effective, patient-centered care; (Core) 370 Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve. 371 demonstrate a strong interest in the education of fellows; (Core) 372 II.B.2.c) 373 374 II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; (Core) 375 376 377 administer and maintain an educational environment II.B.2.e) conducive to educating fellows; (Core) 378 379 380 regularly participate in organized clinical discussions, II.B.2.f) rounds, journal clubs, and conferences; and, (Core) 381 382 pursue faculty development designed to enhance their skills 383 II.B.2.g) at least annually. (Core) 384

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

	reported for the	renowship program faculty in the aggregate.
386		
387	II.B.2.h)	The faculty, including the program director, must, in aggregate,
388		devote at least 20 hours per week to fellowship-related clinical
389		work and teaching. (Core) [Moved from II.B.2.a)]
		work and teaching. (1997) [ivioved from fr.b.2.a)]
390		
391	II.B.3.	Faculty Qualifications
392		
393	II.B.3.a)	Faculty members must have appropriate qualifications in
394		their field and hold appropriate institutional appointments.
395		(Core)
396		
397	II.B.3.b)	Subspecialty physician faculty members must:
398	11.0.0.0)	oubspecially physician racting members must.
399	II D 2 h) /4\	have current cartification in the cubence alty by the
	II.B.3.b).(1)	have current certification in the subspecialty by the
400		American Board of Pathology or the American
401		Osteopathic Board of, or possess qualifications
402		judged acceptable to the Review Committee. (Core)
403		
404		Note that while the Common Program Requirements
405		deem certification by a certifying board of the American
406		Osteopathic Association (AOA) acceptable, there is no
407		
		AOA board that offers certification in this
408		specialty/subspecialty]
409		
410	II.B.3.b).(1).(a)	Core physician faculty members who are not
411		currently certified in medical microbiology must
412		have either completed a fellowship or have three
413		years of practice experience in the subspecialty.
414		(Core) [Moved from II.B.3.a)]
415		[
416	II.B.3.c)	Any non-physician faculty members who participate in
417	II.D.J.J.	fellowship program education must be approved by the
417		program director. (Core)
_		program director. (50.0)
419		

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

421 422	II.B.3.d)	Any other specialty physician faculty members must have current certification in their specialty by the appropriate
423		American Board of Medical Specialties (ABMS) member
424		board or American Osteopathic Association (AOA) certifying
425		board of American Osteopatric Association (AOA) certifying board, or possess qualifications judged acceptable to the
426		Review Committee. (Core)
427		
428	II.B.4.	Core Faculty
429		
430		Core faculty members must have a significant role in the education
431		and supervision of fellows and must devote a significant portion of
432		their entire effort to fellow education and/or administration, and
433		must, as a component of their activities, teach, evaluate, and provide
434		formative feedback to fellows. (Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

435

	0.10.10.0.0	me program, morataming comprehensive and annual recome reasonly can regr
436	-

440 441	II.B.4.b)	Core faculty members must complete the annual ACGME Faculty Survey. (Core)
441 442		Faculty Survey.
443		[The Review Committee must specify the minimum number of core
444		faculty and/or the core faculty-fellow ratio
445		racting and or the core racting renow ratio
446		[The Review Committee's specification will be included in an upcoming
447		focused revision to the Medical Microbiology Program Requirements]
448		3, 3 i i
449	II.C.	Program Coordinator
450		
451	II.C.1.	There must be a program coordinator. (Core)
452		
453	II.C.2.	The program coordinator must be provided with support adequate
454		for administration of the program based upon its size and
455		configuration. (Core)
456		

Background and Intent: Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge

of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. (Core)

II.D.1.

There must be a program coordinator and qualified laboratory technical personnel to support the clinical, teaching, educational, and research activities of the fellowship. (Core) [Moved from II.C.1.]

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada.

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

III.A.1.a)

Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. (Core)

490 491 492	III.A.1.b)	Prior to appointment in the program, fellows must have one of the following:
493 494 495 496 497	III.A.1.b).(1)	successful completion of a residency in anatomic and clinical pathology that satisfies the requirements in III.A.1. accredited by the ACGME, or a program located in Canada and accredited by the RCPSC; (Core)
498 499 500	III.A.1.b).(2)	ABPath or American Osteopathic Board of Pathology certification in clinical pathology; (Core)
501 502 503 504 505	III.A.1.b).(3)	completion of both an ACGME-accredited residency program in internal medicine and an ACGME-accredited or RCPSC-accredited-fellowship in infectious diseases that satisfy the requirements in III.A.1.; or, (Core)
506 507 508 509 510	III.A.1.b).(4)	completion of an ACGME-accredited residency program in pediatrics and an ACGME-accredited fellowship in pediatric infectious diseases that satisfy the requirements in III.A.1. (Core) [Moved from III.A.]
511	III.A.1.c)	Fellow Eligibility Exception
512 513 514		The Review Committee for Pathology will allow the following exception to the fellowship eligibility requirements:
		exception to the lenowship engininty requirements.
515 516 517 518 519 520 521	III.A.1.c).(1)	An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions:
515 516 517 518 519 520 521 522 523 524 525 526 527 528	III.A.1.c).(1)	An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions:
515 516 517 518 519 520 521 522 523 524 525 526 527 528 529 530 531 532		An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions: (Core) evaluation by the program director and fellowship selection committee of the applicant's suitability to enter the program, based on prior training and review of the summative evaluations of training in the core
515 516 517 518 519 520 521 522 523 524 525 526 527 528 529 530 531	III.A.1.c).(1).(a)	An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions: (Core) evaluation by the program director and fellowship selection committee of the applicant's suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and, (Core) review and approval of the applicant's exceptional qualifications by the GMEC; and,

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

III.B. The program director must not appoint more fellows than approved by the Review Committee. (Core)

III.B.1. All complement increases must be approved by the Review Committee. (Core)

III.C. Fellow Transfers

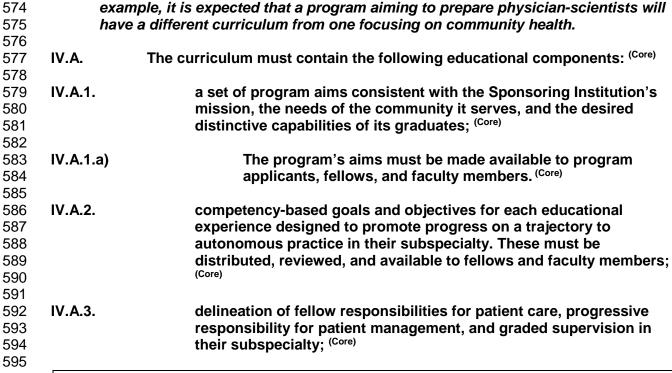

The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring fellow, and Milestones evaluations upon matriculation. (Core)

IV. Educational Program

The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

 The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

IV.A.4. structured educational activities beyond direct patient care; and,

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. (Core)

IV.B. ACGME Competencies

596 597

598 599

600 601

602 603 604

605

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus

in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

606		
607	IV.B.1.	The program must integrate the following ACGME Competencies
608		into the curriculum: (Core)
609		
610	IV.B.1.a)	Professionalism
611		
612		Fellows must demonstrate a commitment to professionalism
613		and an adherence to ethical principles. (Core)
614		
615	IV.B.1.a).(1)	Fellows must interact professionally when communicating
616		with clinicians regarding inappropriate and rejected
617		specimens, and requests for inappropriate testing. (Outcome)
618		[Moved from IV.A.2.e).(1)]
619		
620	IV.B.1.b)	Patient Care and Procedural Skills
621		

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s Crossing the Quality Chasm: A New Health System for the 21st Century, 2001 and Berwick D, Nolan T, Whittington J. The Triple Aim: care, cost, and quality. Health Affairs. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

622		
623	IV.B.1.b).(1)	Fellows must be able to provide patient care that is
624		compassionate, appropriate, and effective for the
625 626		treatment of health problems and the promotion of health. (Core)
627		neatti.
628		[The Review Committee must further specify]

698 699 700 701 702 703 704	IV.B.1.c).(1).(c)	budgeting, epidemiology as related to the hospital and public health issues, hospital infection control, laboratory safety, personnel supervision, principles of disinfection and sterilization, quality control, and workload accounting; (Core)(Outcome) [Moved from IV.A.2.b).(1).(c)]
704 705 706 707 708 709	IV.B.1.c).(1).(d)	the role of the microbiology laboratory in the context of the hospital health care system and community medicine, including: (Core)(Outcome) [Moved from IV.A.2.b).(1).(d)]
710 711 712 713 714 715	IV.B.1.c).(1).(d).(i)	infection control methods to prevent the spread of antimicrobial resistant microorganisms throughout the hospital and the health care system; (Core)(Outcome) [Moved from IV.A.2.b).(1).(d).(i)]
716 717 718 719 720 721 722	IV.B.1.c).(1).(d).(ii)	interactions of the medical microbiology laboratory with the public health system for the detection and submission of microorganisms so as to aid in the containment of infectious diseases; and, (Core)(Outcome) [Moved from IV.A.2.b).(1).(d).(ii)]
723 724 725 726 727	IV.B.1.c).(1).(d).(iii)	public health implications of specific microorganisms and means for their control. (Core)(Outcome) [Moved from IV.A.2.b).(1).(d).(iii)]
727 728 729 730 731 732 733 734 735	IV.B.1.c).(1).(d).(iii).(a)	For tests sent to a reference laboratory facility, fellows should demonstrate knowledge of the methods used to perform the assays and the interpretation of test results. (Core)(Outcome) [Moved from IV.A.2.b).(1).(d).(iii).(a)]
736 737 738 739 740 741 742	IV.B.1.c).(2)	Fellows should demonstrate in-depth knowledge of histopathologic and clinical correlation of microbiologic data, activity and pharmacokinetics of antimicrobial agents, microscopic examination of specimens, principles and interpretation of antimicrobial susceptibility testing and antimicrobial assays, specimen collection, and transport and processing. (Core)(Outcome) [Moved from IV.A.2.b).(2)]
743 744 745	IV.B.1.d)	Practice-based Learning and Improvement

746 747		Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate
748		scientific evidence, and to continuously improve patient care
749		based on constant self-evaluation and lifelong learning. (Core)
750		
751	IV.B.1.d).(1)	independently evaluate and solve problem situations
752		identified by the medical and laboratory staff relating to
753		medical microbiology, infectious diseases, and
754		epidemiology. (Outcome) [Moved from IV.A.2.c).(3)]
755		

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

756		
757	IV.B.1.e)	Interpersonal and Communication Skills
758 750		
759 760		Fellows must demonstrate interpersonal and communication
760 761		skills that result in the effective exchange of information and
761 762		collaboration with patients, their families, and health
762 763		professionals. ^(Core)
763 764	IV D 1 a) (1)	Follows must demonstrate competence in providing
764 765	IV.B.1.e).(1)	Fellows must demonstrate competence in providing appropriate and effective consultations to other physicians
766		and health professionals, both intra- and inter-
766 767		departmental. (Outcome)-[Moved from IV.A.2.d).(1)]
767 768		departmental. \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \
769	IV.B.1.e).(1).(a)	Consultations should include providing medical
709 770	1v.b.1.e).(1).(a)	advice on specimen selection, collection, transport,
771		and the diagnosis, treatment, and control of
772		infectious diseases. (Detail) [Moved from
773		IV.A.2.d).(1).(a)]
774		17.7.2.07.(17.(0)]
775	IV.B.1.e).(2)	Fellows must demonstrate competence in educating others
776		in the knowledge, skills, and abilities related to medical
777		microbiology. (Outcome) [Moved from IV.A.2.d).(2)]
778		[
779	IV.B.1.f)	Systems-based Practice
780	•	•
781		Fellows must demonstrate an awareness of and
782		responsiveness to the larger context and system of health
783		care, including the social determinants of health, as well as
784		the ability to call effectively on other resources to provide
785		optimal health care. ^(Core)
786		
787	IV.B.1.f).(1)	Fellows must demonstrate the ability to:
788		

789 790 791 792	IV.B.1.f).(1).(a)	work effectively in a variety of health care delivery settings and systems relevant to pathology; (Outcome) [Moved from IV.A.2.f).(1)]
793 794 795 796	IV.B.1.f).(1).(b)	incorporate cost considerations and risk-benefit analysis in patient and population-based care; (Outcome) [Moved from IV.A.2.f).(2)]
797 798 799 800	IV.B.1.f).(1).(c)	participate in identifying system errors and implementing potential systems solutions; and, (Outcome) [Moved from IV.A.2.f).(3)]
801 802 803	IV.B.1.f).(1).(d)	advocate for quality patient care and optimal patient care systems. (Outcome) [Moved from IV.A.2.f).(4)]
804 805	IV.C. Cur	riculum Organization and Fellow Experiences
805 806 807 808 809	IV.C.1.	The curriculum must be structured to optimize fellow educational experiences, the length of these experiences, and supervisory continuity. (Core)
810 811		[The Review Committee must further specify]
812 813 814 815 816 817 818		[The Review Committee's specification will be included in an upcoming focused revision to the Medical Microbiology Program Requirements]
	IV.C.2.	The program must provide instruction and experience in pain management if applicable for the subspecialty, including recognition of the signs of addiction. (Core)
819	IV.C.3.	Fellows' clinical experience must include: [Moved from IV.A.3.a)]
820 821 822 823 824 825 826 827 828 829 830 831 832	IV.C.3.a)	supervision of trainees and/or laboratory personnel, and graded responsibility, including independent diagnoses and decision-making; and, (Core) [Moved from IV.A.3.a).(1)]
	IV.C.3.b)	educational activities specific to medical microbiology, review of the medical literature in the subspecialty area, and use of study sets of unusual cases. (Core) [Moved from IV.A.3.a).(2)]
	IV.C.4.	Fellows must have structured education and experience in the administration, management, and direction of a medical microbiology laboratory, including quality assurance, safety regulations, and use of laboratory and hospital information systems. (Core) [Moved from IV.A.3.b)]
833 834 835 836 837	IV.C.5.	Fellows must have experiences providing medical, scientific, and administrative direction in the diagnostic microbiology laboratory. [Moved from IV.A.3.c)]

838 839 840 841	IV.C.6.	Fellows must participate in financial and/or operational decisions relating to the diagnosis, management, treatment, control, and prevention of infectious diseases. (Core) [Moved from IV.A.3.d)]
842 843 844 845 846 847	IV.C.7.	The didactic curriculum must include teaching conferences in medical microbiology, journal clubs, and joint conferences with the Pathology Department, as well as with clinical services involved in the patient diagnosis and management utilizing medical microbiology. (Core) [Moved from IV.A.3.e)]
848 849 850 851	IV.C.7.a)	Fellows must participate in conferences, on average, at least once per month, and must give a minimum of two presentations per year. (Core) [Moved from IV.A.3.e).(1)]
852 853 854 855	IV.C.7.b)	Didactic topics must include medical microbiology, the infectious disease aspects of pathology, and the clinical and epidemiologic aspects of infectious diseases. (Core) [Moved from IV.A.3.e).(2)]
856 857	IV.D.	Scholarship
858 859 860 861 862 863 864 865 866		Medicine is both an art and a science. The physician is a humanistic scientist who cares for patients. This requires the ability to think critically, evaluate the literature, appropriately assimilate new knowledge, and practice lifelong learning. The program and faculty must create an environment that fosters the acquisition of such skills through fellow participation in scholarly activities as defined in the subspecialty-specific Program Requirements. Scholarly activities may include discovery, integration, application, and teaching.
867 868 869 870 871 872 873 874 875		The ACGME recognizes the diversity of fellowships and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program's scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other programs might choose to utilize more classic forms of biomedical research as the focus for scholarship.
876 877	IV.D.1.	Program Responsibilities
878 879 880	IV.D.1.a)	The program must demonstrate evidence of scholarly activities, consistent with its mission(s) and aims. (Core)
881 882 883 884	IV.D.1.b)	The program in partnership with its Sponsoring Institution, must allocate adequate resources to facilitate fellow and faculty involvement in scholarly activities. (Core)
885 886	IV.D.2.	Faculty Scholarly Activity

887 888 889 890	IV.D.2.a)	Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains: (Core)
891		 Research in basic science, education, translational
892		science, patient care, or population health
893		Peer-reviewed grants
894		 Quality improvement and/or patient safety initiatives
895		 Systematic reviews, meta-analyses, review articles,
896		chapters in medical textbooks, or case reports
897		 Creation of curricula, evaluation tools, didactic
898		educational activities, or electronic educational
899		materials
900		Contribution to professional committees, educational
901		organizations, or editorial boards
902		 Innovations in education
903		
904	IV.D.2.b)	The program must demonstrate dissemination of scholarly
905		activity within and external to the program by the following
906		methods:
907		

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

900		
909 910	IV.D.2.b).(1)	faculty participation in grand rounds, posters, workshops, quality improvement presentations,
911		podium presentations, grant leadership, non-peer-
912		reviewed print/electronic resources, articles or
913		publications, book chapters, textbooks, webinars,
914		service on professional committees, or serving as a
915		journal reviewer, journal editorial board member, or
916		editor; (Outcome)‡
917		ound,
918	IV D 2 b) (2)	peer-reviewed publication. (Outcome)
	IV.D.2.b).(2)	peer-reviewed publication.
919		
920	IV.D.3.	Fellow Scholarly Activity
921		
922	IV.D.3.a)	Each fellow must participate in scholarly activity, including at least
923	,	one of the following: (Core) [Moved from IV.B.1.]
924		5 1
925	IV.D.3.a).(1)	evidence-based presentations at journal club or meetings

948

V.A. Fellow Evaluation

V.A.1. Feedback and Evaluation

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

practice option should be permitted, that decision will be subject to public

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is evaluating a fellow's learning by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

950 951	V.A.1.a)	Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during
952		each rotation or similar educational assignment. (Core)
953		
954	V.A.1.a).(1)	Faculty members must evaluate fellow performance at
955		least semi-annually. (Core) [Moved from V.A.2.a).(1)]
956		

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

		order may recommand poor minar recommend or an accommend
957 958	V.A.1.b)	Evaluation must be documented at the completion of the
959	V.A.1.b)	assignment. (Core)
960		
961	V.A.1.b).(1)	For block rotations of greater than three months in
962		duration, evaluation must be documented at least
963		every three months. (Core)
964		
965	V.A.1.b).(2)	Longitudinal experiences such as continuity clinic in
966		the context of other clinical responsibilities must be
967		evaluated at least every three months and at
968		completion. (Core)
969		
970	V.A.1.c)	The program must provide an objective performance
971		evaluation based on the Competencies and the subspecialty-
972		specific Milestones, and must: (Core)
973		
974	V.A.1.c).(1)	use multiple evaluators (e.g., faculty members, peers,
975		patients, self, and other professional staff members);
976		and, ^(Core)
977	V A 4 a) (2)	nunvide that information to the Clinical Compatency
978	V.A.1.c).(2)	provide that information to the Clinical Competency
979 980		Committee for its synthesis of progressive fellow performance and improvement toward unsupervised
981		practice. (Core)
982		ρι αστισ σ. Υ
302		

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

984 985	V.A.1.d)	The program director or their designee, with input from the Clinical Competency Committee, must:
986		
987	V.A.1.d).(1)	meet with and review with each fellow their
988		documented semi-annual evaluation of performance,
989		including progress along the subspecialty-specific
990		Milestones. (Core)
991		
992	V.A.1.d).(2)	assist fellows in developing individualized learning
993	, , ,	
994		
995		3 , ,
	V.A.1.d).(3)	develop plans for fellows failing to progress, following
	V.A.1.d).(3)	plans to capitalize on their strengths and identify areas for growth; and, (Core) develop plans for fellows failing to progress, following institutional policies and procedures. (Core)

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

999		
1000	V.A.1.e)	At least annually, there must be a summative evaluation of
1001		each fellow that includes their readiness to progress to the
1002		next year of the program, if applicable. (Core)
1003		
1004	V.A.1.f)	The evaluations of a fellow's performance must be accessible
1005		for review by the fellow. (Core)
1006		·
1007	V.A.2.	Final Evaluation
1008		
1009	V.A.2.a)	The program director must provide a final evaluation for each
1010	,	fellow upon completion of the program. (Core)
1011		
1012	V.A.2.a).(1)	The subspecialty-specific Milestones, and when
1013	, , ,	applicable the subspecialty-specific Case Logs, must
1014		be used as tools to ensure fellows are able to engage
1015		in autonomous practice upon completion of the
1016		program. (Core)
1017		. •

1018 1019	V.A.2.a).(2)	The final evaluation must:	
1020 1021 1022 1023 1024	V.A.2.a).(2).(a	become part of the fellow's permanent record maintained by the institution, and must be accessible for review by the fellow in accordance with institutional policy; (Core)	
1025 1026 1027 1028	V.A.2.a).(2).(b	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; (Core)	
1029 1030 1031	V.A.2.a).(2).(0	consider recommendations from the Clinical Competency Committee; and, (Core)	
1032 1033 1034	V.A.2.a).(2).(d	be shared with the fellow upon completion of the program. (Core)	
1035 1036 1037	V.A.3.	A Clinical Competency Committee must be appointed by the program director. (Core)	
1038 1039 1040 1041 1042 1043 1044	V.A.3.a)	At a minimum the Clinical Competency Committee must include three members, at least one of whom is a core faculty member. Members must be faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program's fellows. (Core)	
1045 1046	V.A.3.b)	The Clinical Competency Committee must:	
1047 1048 1049	V.A.3.b).(1)	review all fellow evaluations at least semi-annually; (Core)	
1050 1051 1052	V.A.3.b).(2)	determine each fellow's progress on achievement of the subspecialty-specific Milestones; and, (Core)	
1053 1054 1055 1056	V.A.3.b).(3)	meet prior to the fellows' semi-annual evaluations and advise the program director regarding each fellow's progress. (Core)	
1057 1058	V.B.	Faculty Evaluation	
1059 1060 1061 1062	V.B.1.	The program must have a process to evaluate each faculty member's performance as it relates to the educational program at least annually. (Core)	

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work

opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1000		
1064	V.B.1.a)	This evaluation must include a review of the faculty member's
1065		clinical teaching abilities, engagement with the educational
1066		program, participation in faculty development related to their
1067		skills as an educator, clinical performance, professionalism,
1068		and scholarly activities. (Core)
1069		, and the second
1070	V.B.1.b)	This evaluation must include written, confidential evaluations
1071	·	by the fellows. (Core)
1072		·
1073	V.B.2.	Faculty members must receive feedback on their evaluations at least
1074		annually. (Core)
1075		· · · · · · · · · · · · · · · · · · ·
1076	V.B.3.	Results of the faculty educational evaluations should be
1077	112101	incorporated into program-wide faculty development plans. (Core)
1078		

1063

1070

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1079		
1080	V.C.	Program Evaluation and Improvement
1081		
1082	V.C.1.	The program director must appoint the Program Evaluation
1083		Committee to conduct and document the Annual Program
1084		Evaluation as part of the program's continuous improvement
1085		process. (Core)
1086		
1087	V.C.1.a)	The Program Evaluation Committee must be composed of at
1088		least two program faculty members, at least one of whom is a
1089		core faculty member, and at least one fellow. (Core)
1090		
1091	V.C.1.b)	Program Evaluation Committee responsibilities must include:
1092		
1093	V.C.1.b).(1)	acting as an advisor to the program director, through
1094		program oversight; ^(Core)

1095		
1096	V.C.1.b).(2)	review of the program's self-determined goals and
1097		progress toward meeting them; (Core)
1098		
1099	V.C.1.b).(3)	guiding ongoing program improvement, including
1100		development of new goals, based upon outcomes;
1101		and, ^(Core)
1102		
1103	V.C.1.b).(4)	review of the current operating environment to identify
1104		strengths, challenges, opportunities, and threats as
1105		related to the program's mission and aims. (Core)
1106		

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

V.C.1.c). The Program Evaluation Committee should consider the following elements in its assessment of the program: V.C.1.c).(1) curriculum; (Core) V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s); (Core) V.C.1.c).(3) ACGME letters of notification, including citations, Areas for Improvement, and comments; (Core) V.C.1.c).(4) quality and safety of patient care; (Core) V.C.1.c).(5) aggregate fellow and faculty: V.C.1.c).(5).(a) well-being; (Core) V.C.1.c).(5).(b) recruitment and retention; (Core) V.C.1.c).(5).(c) workforce diversity; (Core) V.C.1.c).(5).(d) engagement in quality improvement and patient safety; (Core) V.C.1.c).(5).(e) scholarly activity; (Core) V.C.1.c).(5).(f) ACGME Resident/Fellow and Faculty Surveys (where applicable); and, (Core) V.C.1.c).(5).(g) written evaluations of the program. 1155	V.O.1.0).(1).(D)	professional development
1156	V.C.1.d)	The Program Evaluation Committee must evaluate the
1157	,	program's mission and aims, strengths, areas for
1158		improvement, and threats. (Core)
1159		•
1160	V.C.1.e)	The annual review, including the action plan, must:
1161		
1162	V.C.1.e).(1)	be distributed to and discussed with the members of
1163		the teaching faculty and the fellows; and, (Core)
1164		
1165	V.C.1.e).(2)	be submitted to the DIO. (Core)
1166		
1167	V.C.2.	The program must participate in a Self-Study prior to its 10-Year
1168		Accreditation Site Visit. (Core)
1169	V C 2 a)	A common of the Calf Cturb month by submitted to the DIO
1170	V.C.2.a)	A summary of the Self-Study must be submitted to the DIO.
1171		()

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the ACGME Manual of Policies and Procedures. Additionally, a description of the Self-Study process, as well as information on how to prepare for the 10-Year Accreditation Site Visit, is available on the ACGME website.

1173
 1174 V.C.3. One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.
 1176 The program director should encourage all eligible program graduates to take the certifying examination offered by the

1180		applicable American Board of Medical Specialties (ABMS) member
1181 1182		board or American Osteopathic Association (AOA) certifying board.
1183	V.C.3.a)	For subspecialties in which the ABMS member board and/or
1184	v.C.J.a)	AOA certifying board offer(s) an annual written exam, in the
1185		preceding three years, the program's aggregate pass rate of
1186		those taking the examination for the first time must be higher
1187		than the bottom fifth percentile of programs in that
1188		subspecialty. (Outcome)
1189		Subspecialty.
1190	V.C.3.b)	For subspecialties in which the ABMS member board and/or
1191	V.O.O.D)	AOA certifying board offer(s) a biennial written exam, in the
1192		preceding six years, the program's aggregate pass rate of
1193		those taking the examination for the first time must be higher
1194		than the bottom fifth percentile of programs in that
1195		subspecialty. (Outcome)
1196		outopoolsy.
1197	V.C.3.c)	For subspecialties in which the ABMS member board and/or
1198	,	AOA certifying board offer(s) an annual oral exam, in the
1199		preceding three years, the program's aggregate pass rate of
1200		those taking the examination for the first time must be higher
1201		than the bottom fifth percentile of programs in that
1202		subspecialty. (Outcome)
1203		
1204	V.C.3.d)	For subspecialties in which the ABMS member board and/or
1205		AOA certifying board offer(s) a biennial oral exam, in the
1206		preceding six years, the program's aggregate pass rate of
1207		those taking the examination for the first time must be higher
1208		than the bottom fifth percentile of programs in that
1209		subspecialty. (Outcome)
1210		
1211	V.C.3.e)	For each of the exams referenced in V.C.3.a)-d), any program
1212		whose graduates over the time period specified in the
1213		requirement have achieved an 80 percent pass rate will have
1214		met this requirement, no matter the percentile rank of the
1215		program for pass rate in that subspecialty. (Outcome)
1216		

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1217
1218 V.C.3.f)
Programs must report, in ADS, board certification status
annually for the cohort of board-eligible fellows that
graduated seven years earlier. (Core)

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1222 1223 V.C.3.g) At least 60 percent of a program's graduates from the preceding five years who have taken the ABP certifying examination for 1224 1225 medical microbiology must pass on the first attempt. [Moved from 1226 V.C.4.1 1227 1228 V.C.3.h) For programs with fewer than five graduates in the preceding five years, three of the five (60 percent) most recent program 1229 graduates, who have taken the ABP certifying examination for 1230

[Moved from V.C.5.]

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

Excellence in the safety and quality of care rendered to patients by fellows today

medical microbiology must pass on the first attempt. (Outcome)

- Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice
- Excellence in professionalism through faculty modeling of:
 - the effacement of self-interest in a humanistic environment that supports the professional development of physicians
 - the joy of curiosity, problem-solving, intellectual rigor, and discovery
- Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more

1231 1232

1233 1234

1235 1236

1237

1238 1239

discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

1284 1285 1286 1287 1288 1289 1290		A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.
1291 1292 1293 1294 1295	VI.A.1.a).(1).(a)	The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.
1296 1297 1298 1299	VI.A.1.a).(1).(b)	The program must have a structure that promotes safe, interprofessional, team-based care. (Core)
1300 1301	VI.A.1.a).(2)	Education on Patient Safety
1302 1303 1304 1305		Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. (Core)
1303	Background and Intent: Optima interprofessional learning and	al patient safety occurs in the setting of a coordinated

1513		patients.
1514	VI.B.2.	The learning objectives of the program must:
1516	·	ouriming objectives of the program made
1517	VI.B.2.a)	be accomplished through an appropriate blend of supervised
1518	,	patient care responsibilities, clinical teaching, and didactic
1519		educational events; (Core)
1520		•
1521	VI.B.2.b)	be accomplished without excessive reliance on fellows to
1522	-	fulfill non-physician obligations; and, (Core)
1523		

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these

things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1524 1525 1526

VI.B.4.b)

VI.B.4.c)

ensure manageable patient care responsibilities. (Core)

Background and Intent: The Common Program Requirements do not define "manageable patient care responsibilities" as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

assurance of their fitness for work, including: (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1544

1547

1550

1555

1545 VI.B.4.c).(1) management of their time before, during, and after 1546

clinical assignments; and, (Outcome)

1548 VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, 1549

and other members of the health care team. (Outcome)

1551 commitment to lifelong learning; (Outcome) 1552 VI.B.4.d)

1553 1554 VI.B.4.e) monitoring of their patient care performance improvement

indicators; and, (Outcome)

1556 VI.B.4.f) accurate reporting of clinical and educational work hours, 1557 patient outcomes, and clinical experience data. (Outcome) 1558 1559 VI.B.5. All fellows and faculty members must demonstrate responsiveness 1560 to patient needs that supersedes self-interest. This includes the 1561 1562 recognition that under certain circumstances, the best interests of the patient may be served by transitioning that patient's care to 1563 another qualified and rested provider. (Outcome) 1564 1565 VI.B.6. 1566 Programs, in partnership with their Sponsoring Institutions, must 1567 provide a professional, equitable, respectful, and civil environment that is free from discrimination, sexual and other forms of 1568 harassment, mistreatment, abuse, or coercion of students, fellows, 1569 1570 faculty, and staff. (Core) 1571 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should 1572 have a process for education of fellows and faculty regarding 1573 unprofessional behavior and a confidential process for reporting, 1574 investigating, and addressing such concerns. (Core) 1575 1576 VI.C. 1577 Well-Being 1578 1579 Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require 1580 proactive attention to life inside and outside of medicine. Well-being 1581 1582 requires that physicians retain the joy in medicine while managing their 1583 own real life stresses. Self-care and responsibility to support other members of the health care team are important components of 1584 1585 professionalism; they are also skills that must be modeled, learned, and 1586 nurtured in the context of other aspects of fellowship training. 1587 1588 Fellows and faculty members are at risk for burnout and depression. 1589 Programs, in partnership with their Sponsoring Institutions, have the same 1590 responsibility to address well-being as other aspects of resident 1591 competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which 1592 encourages covering for colleagues after an illness without the expectation 1593 1594 of reciprocity reflects the ideal of professionalism. A positive culture in a 1595 clinical learning environment models constructive behaviors, and prepares 1596 fellows with the skills and attitudes needed to thrive throughout their

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

careers.

1597

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

-00		
599 600 601	VI.C.1.	The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:
602 603 604 605	VI.C.1.a)	efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations,
606 607 608		providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; (Core)
609 610 611 612	VI.C.1.b)	attention to scheduling, work intensity, and work compression that impacts fellow well-being; (Core)
613 614 615	VI.C.1.c)	evaluating workplace safety data and addressing the safety of fellows and faculty members; (Core)

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, (Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

VI.C.1.d).(1)

Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours.

(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1626
1627 VI.C.1.e) attention to fellow and faculty member burnout, depression, and substance abuse. The program, in partnership with its

1616 1617

1618 1619

1620 1621

1622

1623

Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout, depression, and substance abuse, including means to assist those who experience these conditions. Fellows and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: (Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Wellbeing section of the ACGME website (http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being).

VI.C.1.e).(1)

encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; (Core)

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

VI.C.1.e).(2)	provide access to appropriate tools for self-screening; and, $^{(\text{Core})}$
VI.C.1.e).(3)	provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. (Core)

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this

requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1000		
1656	VI.C.2.	There are circumstances in which fellows may be unable to attend
1657		work, including but not limited to fatigue, illness, family
1658		emergencies, and parental leave. Each program must allow an
1659		appropriate length of absence for fellows unable to perform their
1660		patient care responsibilities. (Core)
1661		·
1662	VI.C.2.a)	The program must have policies and procedures in place to
1663	•	ensure coverage of patient care. (Core)
1664		·
1665	VI.C.2.b)	These policies must be implemented without fear of negative
1666	•	consequences for the fellow who is or was unable to provide
1667		the clinical work. ^(Core)
1668		

1655

1669

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

1670	VI.D.	Fatigue Mitigation
1671		
1672	VI.D.1.	Programs must:
1673		
1674	VI.D.1.a)	educate all faculty members and fellows to recognize the
1675	,	signs of fatigue and sleep deprivation; (Core)
1676		
1677	VI.D.1.b)	educate all faculty members and fellows in alertness
1678	,	management and fatigue mitigation processes; and, (Core)
1679		
1680	VI.D.1.c)	encourage fellows to use fatigue mitigation processes to
1681	,	manage the potential negative effects of fatigue on patient
1682		care and learning. (Detail)
1683		3

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall

asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

VI.D.2.	Each program must ensure continuity of patient care, consistent
	with the program's policies and procedures referenced in VI.C.2-
	VI.C.2.b), in the event that a fellow may be unable to perform their
	patient care responsibilities due to excessive fatigue. (Core)
VI.D.3.	The program, in partnership with its Sponsoring Institution, must
	ensure adequate sleep facilities and safe transportation options for
	fellows who may be too fatigued to safely return home. (Core)
VI.E.	Clinical Responsibilities, Teamwork, and Transitions of Care
VI.E.1.	Clinical Responsibilities
	The clinical responsibilities for each fellow must be based on PGY
	level, patient safety, fellow ability, severity and complexity of patient
	illness/condition, and available support services. (Core)

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1702		
1703	VI.E.2.	Teamwork
1704		
1705		Fellows must care for patients in an environment that maximizes
1706		communication. This must include the opportunity to work as a
1707		member of effective interprofessional teams that are appropriate to
1708		the delivery of care in the subspecialty and larger health system.
1709		(Core)
1710		
1711	VI.E.2.a)	Medical laboratory professionals, members of clinical service
1712	,	teams, and other medical professionals may be included as part of
1713		an interprofessional team. (Detail)
1714		·
1715	VI.E.2.b)	Fellows must demonstrate the ability to work and communicate
1716	,	with health care professionals to provide effective, patient-focused
1717		care. (Outcome)
1718		
1719	VI.E.3.	Transitions of Care
1720		
1721	VI.E.3.a)	Programs must design clinical assignments to optimize
1722	-	transitions in patient care, including their safety, frequency,
1723		and structure. (Core)

1724		
1725	VI.E.3.b)	Programs, in partnership with their Sponsoring Institutions,
1726	·	must ensure and monitor effective, structured hand-over
1727		processes to facilitate both continuity of care and patient
1728		safety. (Core)
1729		·
1730	VI.E.3.c)	Programs must ensure that fellows are competent in
1731	·	communicating with team members in the hand-over process.
1732		(Outcome)
1733		
1734	VI.E.3.d)	Programs and clinical sites must maintain and communicate
1735		schedules of attending physicians and fellows currently
1736		responsible for care. (Core)
1737		
1738	VI.E.3.e)	Each program must ensure continuity of patient care,
1739		consistent with the program's policies and procedures
1740		referenced in VI.C.2-VI.C.2.b), in the event that a fellow may
1741		be unable to perform their patient care responsibilities due to
1742		excessive fatigue or illness, or family emergency. (Core)
1743		
1744	VI.F.	Clinical Experience and Education
1745		
1746		Programs, in partnership with their Sponsoring Institutions, must design
1747		an effective program structure that is configured to provide fellows with
1748		educational and clinical experience opportunities, as well as reasonable
1749		opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms "clinical experience and education," "clinical and educational work," and "clinical and educational work hours" replace the terms "duty hours," "duty periods," and "duty." These changes have been made in response to concerns that the previous use of the term "duty" in reference to number of hours worked may have led some to conclude that fellows' duty to "clock out" on time superseded their duty to their patients.

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. (Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

1750

1751 1752

1753 1754

1755

1756

1757

1758

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be

required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules

are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

g	
VI.F.2.	Mandatory Time Free of Clinical Work and Education
VI.F.2.a)	The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. (Core)
VI.F.2.b)	Fellows should have eight hours off between scheduled clinical work and education periods. (Detail)
VI.F.2.b).(1)	There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. (Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

VI.F.2.d)

Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two

1777 1778

1779

1780

1781 1782

1783

1784 1785

consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

4707		
1787 1788 1789	VI.F.3.	Maximum Clinical Work and Education Period Length
1790 1791 1792	VI.F.3.a)	Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. (Core)
1793 1794 1795 1796	VI.F.3.a).(1)	Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education.
1797 1798 1799 1800 1801	VI.F.3.a).(1).(a)	Additional patient care responsibilities must not be assigned to a fellow during this time. (Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

1002		
1803	VI.F.4.	Clinical and Educational Work Hour Exceptions
1804		
1805	VI.F.4.a)	In rare circumstances, after handing off all other
1806		responsibilities, a fellow, on their own initiative, may elect to
1807		remain or return to the clinical site in the following
1808		circumstances:
1809		
1810	VI.F.4.a).(1)	to continue to provide care to a single severely ill or
1811		unstable patient; (Detail)
1812		•
1813	VI.F.4.a).(2)	humanistic attention to the needs of a patient or
1814		family; or, (Detail)
1815		
1816	VI.F.4.a).(3)	to attend unique educational events. (Detail)
1817		·
1818	VI.F.4.b)	These additional hours of care or education will be counted
1819	•	toward the 80-hour weekly limit. (Detail)
1820		·

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in

the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1821		
1822	VI.F.4.c)	A Review Committee may grant rotation-specific exceptions
1823		for up to 10 percent or a maximum of 88 clinical and
1824		educational work hours to individual programs based on a
1825		sound educational rationale.
1826		
1827		The Review Committee for Pathology will not consider requests
1828		for exceptions to the 80-hour limit to the fellows' work week.
1829		
1830	VI.F.4.c).(1)	In preparing a request for an exception, the program
1831		director must follow the clinical and educational work
1832		hour exception policy from the ACGME Manual of
1833		Policies and Procedures. (Core)
1834		
1835	VI.F.4.c).(2)	Prior to submitting the request to the Review
1836		Committee, the program director must obtain approval
1837		from the Sponsoring Institution's GMEC and DIO. (Core)
1838		•

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

VI.F.5.	Moonlighting
VI.F.5.a)	Moonlighting must not interfere with the ability of the fellow
	to achieve the goals and objectives of the educational
	program, and must not interfere with the fellow's fitness for
	work nor compromise patient safety. (Core)
VI.F.5.b)	Time spent by fellows in internal and external moonlighting
·	(as defined in the ACGME Glossary of Terms) must be
	counted toward the 80-hour maximum weekly limit. (Core)
	VI.F.5.a)

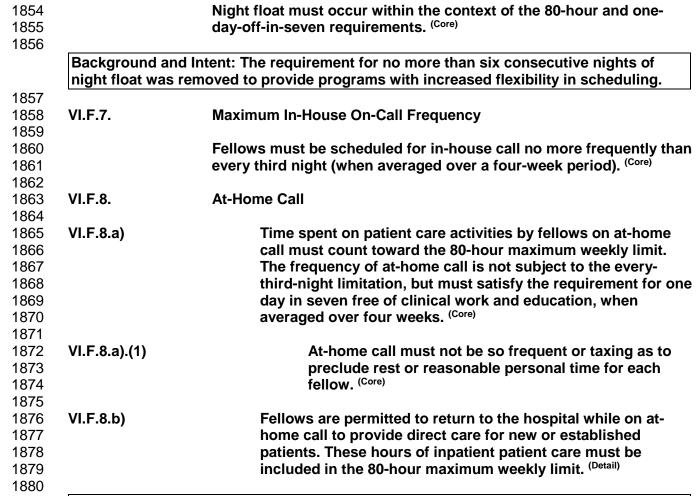

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements).

VI.F.6. In-House Night Float

1830

1851

1852

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
