

ACGME Program Requirements for Graduate Medical Education in Medical Toxicology

Proposed focused revision; posted for review and comment November 23, 2020

A previous focused revision was posted for comment August 19, 2019. The Review Committee is in the process of reviewing comments received from the community from the August 19, 2019, proposed revision. Changes made during the August 19, 2019 revision are not yet approved and are shown in gray below. It is anticipated that all proposed changes will be reviewed at the ACGME June 2021 Board meeting.

Changes made as part of the November 23, 2020, revision are tracked in red. Only changes in red are subject to comment.

1 **Proposed ACGME Program Requirements for Graduate Medical Education**
2 **in Medical Toxicology**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 Medical toxicology is a clinical specialty that includes the monitoring, prevention,
50 evaluation, and treatment, in all age groups, of injury and illness due to
51 occupational and environmental exposures, pharmaceutical agents, and
52 unintentional and intentional poisoning. A medical toxicology fellowship provides
53 fellows with experience in the clinical practice of medical toxicology and prepares
54 physicians as practitioners, educators, researchers, and administrators capable
55 of practicing medical toxicology in academic and clinical settings.
56

57 **Int.C. Length of Educational Program**

58
59 The educational program in medical toxicology must be 24 months in length. (Core)*
60

61 **I. Oversight**

62
63 **I.A. Sponsoring Institution**

64
65 *The Sponsoring Institution is the organization or entity that assumes the*
66 *ultimate financial and academic responsibility for a program of graduate*
67 *medical education consistent with the ACGME Institutional Requirements.*
68

69 *When the Sponsoring Institution is not a rotation site for the program, the*
70 *most commonly utilized site of clinical activity for the program is the*
71 *primary clinical site.*
72

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

73
74 **I.A.1. The program must be sponsored by one ACGME-accredited**
75 **Sponsoring Institution. (Core)**
76

77 **I.B. Participating Sites**

78
79 *A participating site is an organization providing educational experiences or*
80 *educational assignments/rotations for fellows.*
81

82 **I.B.1. The program, with approval of its Sponsoring Institution, must**
83 **designate a primary clinical site. (Core)**
84

85 **I.B.1.a) The Sponsoring Institution must also sponsor an Accreditation**
86 **Council for Graduate Medical Education (ACGME)-accredited**
87 **residency program in emergency medicine or preventive**
88 **medicine. (Core)**
89

- 90 **I.B.2.** There must be a program letter of agreement (PLA) between the
91 program and each participating site that governs the relationship
92 between the program and the participating site providing a required
93 assignment. ^(Core)
94
- 95 **I.B.2.a)** The PLA must:
96
- 97 **I.B.2.a).(1)** be renewed at least every 10 years; and, ^(Core)
98
- 99 **I.B.2.a).(2)** be approved by the designated institutional official
100 **(DIO).** ^(Core)
101
- 102 **I.B.3.** The program must monitor the clinical learning and working
103 environment at all participating sites. ^(Core)
104
- 105 **I.B.3.a)** At each participating site there must be one faculty member,
106 designated by the program director, who is accountable for
107 fellow education for that site, in collaboration with the
108 program director. ^(Core)
109

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

- 110
- 111 **I.B.4.** The program director must submit any additions or deletions of
112 participating sites routinely providing an educational experience,
113 required for all fellows, of one month full time equivalent (FTE) or
114 more through the ACGME's Accreditation Data System (ADS). ^(Core)
115
- 116 **I.B.5.** Programs using multiple participating sites must ensure the provision of a
117 unified educational experience for the fellows. ^(Core)
118
- 119 **I.B.5.a)** An acceptable educational rationale must be provided for each

- 120 participating site. ^(Core)
- 121
- 122 I.B.6. Any medical toxicology experience not available at the primary clinical
- 123 site or sponsoring institution must be provided through an affiliation with a
- 124 participating site. ^(Core)
- 125
- 126 I.B.7. Participating sites, including a poison center, should be in close physical
- 127 proximity to the primary clinical site unless they provide special resources
- 128 that are not available at the primary clinical site. ^{(Detail)†}
- 129
- 130 I.B.8. The primary clinical site must be a primary hospital (hereafter referred to
- 131 as the primary clinical site) or a poison center. ^(Core)
- 132
- 133 I.B.8.a) If the primary clinical site is a poison center, the program must
- 134 identify a hospital where the clinical experience will take place.
- 135 ^(Core)
- 136
- 137 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
- 138 **practices that focus on mission-driven, ongoing, systematic recruitment**
- 139 **and retention of a diverse and inclusive workforce of residents (if present),**
- 140 **fellows, faculty members, senior administrative staff members, and other**
- 141 **relevant members of its academic community.** ^(Core)
- 142

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

- 143
- 144 **I.D. Resources**
- 145
- 146 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
- 147 **ensure the availability of adequate resources for fellow education.**
- 148 ^(Core)
- 149
- 150 I.D.1.a) Each participating site must provide appropriate support services,
- 151 personnel, and space to ensure that fellows have sufficient time to
- 152 carry out their clinical and educational functions. ^(Core)
- 153
- 154 I.D.1.b) There should be affiliations with the following to provide regular
- 155 didactic experience and consultation to the fellows: ^{(Core)(Detail)}
- 156
- 157 I.D.1.b).(1) a school of pharmacy or department of pharmacology;
- 158 ^{(Core)(Detail)}
- 159
- 160 I.D.1.b).(1).(a) In the absence of an affiliation with a school of
- 161 pharmacy or department of pharmacology, a Doctor
- 162 of Pharmacy or PhD pharmacologist should be
- 163 appointed to the teaching faculty. ^{(Core)(Detail)}
- 164

- 165 I.D.1.b).(1).(a).(i) Doctor of Pharmacy faculty members
 166 should be certified by either the Board of
 167 Pharmacy Specialties (BPS) or the
 168 American Board of Applied Toxicology
 169 (ABAT) or be ABAT/BPS-eligible. (Core)(Detail)
 170
- 171 I.D.1.b).(2) a school of public health, department of health, department
 172 of population health, department of community health, or
 173 similar institution. (Core)(Detail)
 174
- 175 I.D.1.c) The poison center or medical toxicology service must annually
 176 have at least 1,500 encounters from the community that require
 177 medical toxicologist consultation or intervention. (Core)
 178
- 179 I.D.1.d) The patient population must include patients of all ages and both
 180 genders, with a wide variety of clinical problems, and must be
 181 adequate in number and variety to meet the educational needs of
 182 the program. (Core)
 183
- 184 I.D.1.e) Resources must be available to support the provision of clinical
 185 experience in adult and pediatric critical care areas. (Core)
 186
- 187 I.D.1.e).(1) The following must be available at the primary clinical site
 188 or at an affiliated participating site:
 189
- 190 I.D.1.e).(1).(a) emergency services for both adult and pediatric
 191 patients; (Core)
 192
- 193 I.D.1.e).(1).(b) adult and pediatric inpatient facilities; (Core)
 194
- 195 I.D.1.e).(1).(c) adult and pediatric intensive care facilities; (Core)
 196
- 197 I.D.1.e).(1).(d) adult and pediatric outpatient facilities. (Core)
 198
- 199 I.D.1.e).(1).(e) toxicology laboratory services with 24-hour
 200 availability; and, (Core)
 201
- 202 I.D.1.e).(1).(f) renal dialysis services with 24-hour availability; (Core)
 203
- 204 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
 205 **ensure healthy and safe learning and working environments that**
 206 **promote fellow well-being and provide for:** (Core)
 207
- 208 **I.D.2.a) access to food while on duty;** (Core)
 209
- 210 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
 211 **and accessible for fellows with proximity appropriate for safe**
 212 **patient care;** (Core)
 213

<p>Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at</p>
--

their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

214
215
216
217
218

- I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care; (Core)

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

219
220
221
222
223
224
225
226
227
228
229
230
231
232
233
234
235
236
237
238
239
240

- I.D.2.d) security and safety measures appropriate to the participating site; and, (Core)

- I.D.2.e) accommodations for fellows with disabilities consistent with the Sponsoring Institution's policy. (Core)

- I.D.3. Fellows must have ready access to subspecialty-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities. (Core)

- I.D.4. The program's educational and clinical resources must be adequate to support the number of fellows appointed to the program. (Core)

- I.E. *A fellowship program usually occurs in the context of many learners and other care providers and limited clinical resources. It should be structured to optimize education for all learners present.*

- I.E.1. Fellows should contribute to the education of residents in core programs, if present. (Core)

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

241
242

II. Personnel

- 243
244 **II.A. Program Director**
245
246 **II.A.1. There must be one faculty member appointed as program director**
247 **with authority and accountability for the overall program, including**
248 **compliance with all applicable program requirements.** ^(Core)
249
250 **II.A.1.a) The Sponsoring Institution’s Graduate Medical Education**
251 **Committee (GMEC) must approve a change in program**
252 **director.** ^(Core)
253
254 **II.A.1.b) Final approval of the program director resides with the**
255 **Review Committee.** ^(Core)
256

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual’s responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director’s nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

- 257
258 **II.A.2. The program director must be provided with support adequate for**
259 **administration of the program based upon its size and configuration.**
260 ^(Core)
261
262 **II.A.2.a)** At a minimum, the program director must be provided with the
263 salary support required to devote 20 percent FTE of non-clinical
264 time to the administration of the program. Additional support must
265 be provided based on program size as follows: ^(Core)
266

<u>Number of approved fellow positions</u>	<u>Minimum Program Director FTE</u>
0-3	0.2
4-6	0.25
7-9	0.3
10 or more	0.35

- 267
Background and Intent: Twenty percent FTE is defined as one day per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

- 268
269 **II.A.3. Qualifications of the program director:**
270
271 **II.A.3.a) must include subspecialty expertise and qualifications**
272 **acceptable to the Review Committee;** ^(Core)

- 273
274 II.A.3.a).(1) This must include at least three years' experience as a
275 core physician faculty member in an ACGME-accredited
276 emergency medicine, pediatrics, preventive medicine, or
277 medical toxicology program; (Core)(Detail)
278
- 279 **II.A.3.b)** **must include current certification in the subspecialty for**
280 **which they are the program director by the American Board**
281 **of Emergency Medicine, the American Board of Pediatrics, or the**
282 **American Board of Preventive Medicine, or by the American**
283 **Osteopathic Board of Emergency Medicine, or subspecialty**
284 **qualifications that are acceptable to the Review Committee;**
285 **(Core)**
286
- 287 II.A.3.c) must include current clinical activity in the practice of medical
288 toxicology; (Core)
289
- 290 II.A.3.d) must include active involvement in scholarly activity; and, (Core)
291
- 292 II.A.3.e) ~~must include appropriate medical school faculty appointment; and,~~
293 (Core)
294
- 295 II.A.3.f) should include demonstrated participation in academic societies
296 and educational programs designed to enhance his or her
297 educational and administrative skills. (Core)(Detail)
298
- 299 **II.A.4. Program Director Responsibilities**
300
- 301 **The program director must have responsibility, authority, and**
302 **accountability for: administration and operations; teaching and**
303 **scholarly activity; fellow recruitment and selection, evaluation, and**
304 **promotion of fellows, and disciplinary action; supervision of fellows;**
305 **and fellow education in the context of patient care. (Core)**
306
- 307 **II.A.4.a) The program director must:**
308
- 309 **II.A.4.a).(1) be a role model of professionalism; (Core)**
310

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

- 311
312 **II.A.4.a).(2) design and conduct the program in a fashion**
313 **consistent with the needs of the community, the**
314 **mission(s) of the Sponsoring Institution, and the**
315 **mission(s) of the program; (Core)**

316

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

317
318
319
320
321

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; (Core)**

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

322
323
324
325
326
327
328
329
330
331
332
333
334
335
336
337
338
339

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; (Core)**
- II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; (Core)**
- II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; (Core)**
- II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; (Core)**

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

340
341
342
343
344
345
346

- II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; (Core)**
- II.A.4.a).(9) provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); (Core)**

- 347
348 **II.A.4.a).(10)** provide a learning and working environment in which
349 fellows have the opportunity to raise concerns and
350 provide feedback in a confidential manner as
351 appropriate, without fear of intimidation or retaliation;
352 (Core)
353
354 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring
355 Institution's policies and procedures related to
356 grievances and due process; (Core)
357
358 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring
359 Institution's policies and procedures for due process
360 when action is taken to suspend or dismiss, not to
361 promote, or not to renew the appointment of a fellow;
362 (Core)
363

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- 364
365 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring
366 Institution's policies and procedures on employment
367 and non-discrimination; (Core)
368
369 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-
370 competition guarantee or restrictive covenant.
371 (Core)
372
373 **II.A.4.a).(14)** document verification of program completion for all
374 graduating fellows within 30 days; (Core)
375
376 **II.A.4.a).(15)** provide verification of an individual fellow's
377 completion upon the fellow's request, within 30 days;
378 and, (Core)
379

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 380
381 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
382 Institution's DIO before submitting information or
383 requests to the ACGME, as required in the Institutional
384 Requirements and outlined in the ACGME Program
385 Director's Guide to the Common Program
386 Requirements. (Core)
387

388 **II.B. Faculty**

389
390 *Faculty members are a foundational element of graduate medical education*
391 *– faculty members teach fellows how to care for patients. Faculty members*
392 *provide an important bridge allowing fellows to grow and become practice*
393 *ready, ensuring that patients receive the highest quality of care. They are*
394 *role models for future generations of physicians by demonstrating*
395 *compassion, commitment to excellence in teaching and patient care,*
396 *professionalism, and a dedication to lifelong learning. Faculty members*
397 *experience the pride and joy of fostering the growth and development of*
398 *future colleagues. The care they provide is enhanced by the opportunity to*
399 *teach. By employing a scholarly approach to patient care, faculty members,*
400 *through the graduate medical education system, improve the health of the*
401 *individual and the population.*

402
403 *Faculty members ensure that patients receive the level of care expected*
404 *from a specialist in the field. They recognize and respond to the needs of*
405 *the patients, fellows, community, and institution. Faculty members provide*
406 *appropriate levels of supervision to promote patient safety. Faculty*
407 *members create an effective learning environment by acting in a*
408 *professional manner and attending to the well-being of the fellows and*
409 *themselves.*
410

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

411
412 **II.B.1. For each participating site, there must be a sufficient number of**
413 **faculty members with competence to instruct and supervise all**
414 **fellows at that location.** ^(Core)
415

416 II.B.1.a) There must be a minimum of two medical toxicology physician
417 faculty members based at the primary clinical site, including the
418 program director, who together devote a minimum of 10 hours per
419 week of direct instruction to the fellows, and who are readily
420 available to the fellows for consultations on cases. ^(Core)
421

422 II.B.1.b) Consultants from appropriate medical specialties must be
423 available for consultation and didactic sessions. ^(Core)
424

425 II.B.1.b).(1) Medical consultants should include, but not limited to,
426 individuals with special expertise in the following areas:
427 cardiology, dermatology, gastroenterology, hyperbaric
428 medicine, immunology, nephrology, ophthalmology,
429 pathology, pulmonary medicine, and surgical
430 subspecialties. ^(Detail)
431

432 **II.B.2. Faculty members must:**

433
434 **II.B.2.a) be role models of professionalism;** ^(Core)
435

436 **II.B.2.b)** demonstrate commitment to the delivery of safe, quality,
437 cost-effective, patient-centered care; ^(Core)
438

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

439
440 **II.B.2.c)** demonstrate a strong interest in the education of fellows; ^(Core)
441

442 **II.B.2.d)** devote sufficient time to the educational program to fulfill
443 their supervisory and teaching responsibilities; ^(Core)
444

445 **II.B.2.e)** administer and maintain an educational environment
446 conducive to educating fellows; ^(Core)
447

448 **II.B.2.f)** regularly participate in organized clinical discussions,
449 rounds, journal clubs, and conferences; ^(Core)
450

451 **II.B.2.g)** pursue faculty development designed to enhance their skills
452 at least annually; and, ^(Core)
453

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

454
455 **II.B.2.g).(1)** Faculty members should participate in faculty development
456 programs designed to enhance the effectiveness of their
457 teaching, evaluation, and feedback. ^{(Core)(Detail)}
458

459 **II.B.2.h)** supervise all fellows in their development of clinical, educational,
460 research, advocacy, and administrative skills. ^(Core)
461

462 **II.B.3. Faculty Qualifications**

463
464 **II.B.3.a)** Faculty members must have appropriate qualifications in
465 their field and hold appropriate institutional appointments.
466 ^(Core)
467

468 **II.B.3.b)** Subspecialty physician faculty members must:

469
470 **II.B.3.b).(1)** have current certification in the subspecialty by the
471 American Board of Emergency Medicine, the American
472 Board of Pediatrics, or the American Board of Preventive
473 Medicine, or the American Osteopathic Board of

474 Emergency Medicine, or possess qualifications judged
475 acceptable to the Review Committee. ^(Core)

476
477 **II.B.3.c) Any non-physician faculty members who participate in**
478 **fellowship program education must be approved by the**
479 **program director. ^(Core)**
480

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

481
482 **II.B.3.d) Any other specialty physician faculty members must have**
483 **current certification in their specialty by the appropriate**
484 **American Board of Medical Specialties (ABMS) member**
485 **board or American Osteopathic Association (AOA) certifying**
486 **board, or possess qualifications judged acceptable to the**
487 **Review Committee. ^(Core)**
488

489 **II.B.4. Core Faculty**
490
491 **Core faculty members must have a significant role in the education**
492 **and supervision of fellows and must devote a significant portion of**
493 **their entire effort to fellow education and/or administration, and**
494 **must, as a component of their activities, teach, evaluate, and provide**
495 **formative feedback to fellows. ^(Core)**
496

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

497
498 **II.B.4.a) Core faculty members must be designated by the program**
499 **director. ^(Core)**
500

501 **II.B.4.b) Core faculty members must complete the annual ACGME**
502 **Faculty Survey. ^(Core)**
503

504 **II.B.4.c) There must be a minimum of two medical toxicology core**
505 **physician faculty members based at the primary clinical site,**
506 **including the program director. ^(Core)**
507

508 **II.C. Program Coordinator**

509
510 **II.C.1. There must be a program coordinator. ^(Core)**

511
512 **II.C.2. The program coordinator must be provided with support adequate**
513 **for administration of the program based upon its size and**
514 **configuration.** ^(Core)

515
516 **II.C.2.a) At a minimum, the program coordinator(s) must be supported at**
517 **20 percent FTE for the administration of the program.** ^(Core)
518

Background and Intent: Twenty percent FTE is defined as one day per week.

The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

519
520 **II.D. Other Program Personnel**

521
522 **The program, in partnership with its Sponsoring Institution, must jointly**
523 **ensure the availability of necessary personnel for the effective**
524 **administration of the program.** ^(Core)

525
526 **II.D.1. Consultants from appropriate non-medical specialties must be available**
527 **for consultation and didactic sessions.** ^(Core)

528
529 **II.D.1.a) Non-medical consultants should include individuals with special**
530 **expertise in the following areas: biostatistics, botany, disaster and**
531 **mass casualty incident management, epidemiology,**
532 **environmental toxicology, forensic toxicology, hazardous**
533 **materials, herpetology, industrial hygiene, laboratory toxicology,**
534 **mycology, occupational toxicology, pharmacology, public health,**
535 **and zoology.** ^(Detail)
536

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the

program. These personnel may support more than one program in more than one discipline.

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada.
(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

553
554
555
556
557
558
559
560
561
562
563
564
565
566
567
568

III.A.1.a) Fellowship programs must receive verification of each entering fellow’s level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. (Core)

III.A.1.b) Prior to appointment in the program, fellows must have successfully completed a residency program that satisfies III.A.1., excluding transitional year programs. (Core)

III.A.1.c) Fellow Eligibility Exception

The Review Committees for Emergency Medicine and Preventive Medicine will allow the following exception to the fellowship eligibility requirements:

Specialty-Specific Background and Intent: When exercising the eligibility exception for an exceptionally qualified candidate who is seeking board certification, programs must be aware that completing an ACGME-accredited fellowship program may not by itself be sufficient to meet the eligibility requirements for subspecialty certification. Programs must contact the applicable certifying board directly to determine an applicant’s eligibility for certification.

569
570
571
572
573
574
575
576

III.A.1.c).(1) An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions:
(Core)

- 577 **III.A.1.c).(1).(a)** evaluation by the program director and
 578 fellowship selection committee of the
 579 applicant's suitability to enter the program,
 580 based on prior training and review of the
 581 summative evaluations of training in the core
 582 specialty; and, ^(Core)
 583
- 584 **III.A.1.c).(1).(b)** review and approval of the applicant's
 585 exceptional qualifications by the GMEC; and,
 586 ^(Core)
 587
- 588 **III.A.1.c).(1).(c)** verification of Educational Commission for
 589 Foreign Medical Graduates (ECFMG)
 590 certification. ^(Core)
 591
- 592 **III.A.1.c).(2)** Applicants accepted through this exception must have
 593 an evaluation of their performance by the Clinical
 594 Competency Committee within 12 weeks of
 595 matriculation. ^(Core)
 596

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

- 597
- 598 **III.B.** The program director must not appoint more fellows than approved by the
 599 Review Committee. ^(Core)
 600
- 601 **III.B.1.** All complement increases must be approved by the Review
 602 Committee. ^(Core)
 603
- 604 **III.C.** Fellow Transfers
 605
- 606 The program must obtain verification of previous educational experiences
 607 and a summative competency-based performance evaluation prior to
 608 acceptance of a transferring fellow, and Milestones evaluations upon
 609 matriculation. ^(Core)
 610

646
647
648
649

The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for example, it is expected that a program aiming to prepare physician-scientists will have a different curriculum from one focusing on community health.

IV.A. The curriculum must contain the following educational components: (Core)

IV.A.1. a set of program aims consistent with the Sponsoring Institution’s mission, the needs of the community it serves, and the desired distinctive capabilities of its graduates; (Core)

IV.A.1.a) The program’s aims must be made available to program applicants, fellows, and faculty members. (Core)

IV.A.2. competency-based goals and objectives for each educational experience designed to promote progress on a trajectory to autonomous practice in their subspecialty. These must be distributed, reviewed, and available to fellows and faculty members; (Core)

IV.A.3. delineation of fellow responsibilities for patient care, progressive responsibility for patient management, and graded supervision in their subspecialty; (Core)

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

IV.A.4. structured educational activities beyond direct patient care; and, (Core)

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the

650
651
652
653

patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

654
655
656
657
658
659

IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. ^(Core)

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

660
661
662
663
664
665
666
667
668
669
670

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: ^(Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. ^(Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

IV.B.1.d)

Practice-based Learning and Improvement

Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. ^(Core)

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

873
874 **IV.B.1.e)**

Interpersonal and Communication Skills

Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and

878		collaboration with patients, their families, and health
879		professionals. <small>(Core)</small>
880		
881	IV.B.1.f)	Systems-based Practice
882		
883		Fellows must demonstrate an awareness of and
884		responsiveness to the larger context and system of health
885		care, including the social determinants of health, as well as
886		the ability to call effectively on other resources to provide
887		optimal health care. <small>(Core)</small>
888		
889	IV.C.	Curriculum Organization and Fellow Experiences
890		
891	IV.C.1.	The curriculum must be structured to optimize fellow educational
892		experiences, the length of these experiences, and supervisory
893		continuity. <small>(Core)</small>
894		
895	IV.C.1.a)	<u>Clinical experiences should be structured to facilitate learning in a</u>
896		<u>manner that allows the fellows to function as part of an effective</u>
897		<u>interprofessional team that works together towards the shared</u>
898		<u>goals of patient safety and quality improvement.</u> <small>(Detail)</small>
899		
900	IV.C.1.b)	<u>The program director must determine the length of clinical</u>
901		<u>experiences for the fellows for any rotation.</u> <small>(Core)</small>
902		
903	IV.C.2.	The program must provide instruction and experience in pain
904		management if applicable for the subspecialty, including recognition
905		of the signs of addiction. <small>(Core)</small>
906		
907	IV.C.3.	Didactic Experiences
908		
909	IV.C.3.a)	The majority of didactic experiences should take place at the
910		primary clinical site. <small>(Core)(Detail)</small>
911		
912	IV.C.3.a).(1)	There must be at least four hours per week of planned
913		educational experiences focused on medical toxicology.
914		<small>(Core)</small>
915		
916	IV.C.3.a).(1).(a)	All planned didactic experiences must be
917		supervised by faculty members. <small>(Core)</small>
918		
919	IV.C.3.a).(1).(b)	Faculty members must present more than 50
920		percent of the planned didactic experiences.
921		<small>(Core)(Detail)</small>
922		
923	IV.C.3.a).(2)	Planned educational experiences should include
924		presentations based on the defined curriculum, morbidity
925		and mortality conferences, journal review, administrative
926		seminars, and research methods. <small>(Detail)</small>
927		
928	IV.C.3.a).(2).(a)	All planned didactic experiences should have an

929		evaluative component to measure fellow
930		participation and educational effectiveness,
931		including faculty-fellow interaction. ^(Detail)
932		
933	IV.C.3.a).(3)	The program must ensure that fellows assigned to
934		participating sites will participate in required conferences
935		and other didactic activities at the primary clinical site.
936		<u>(Core)</u> ^(Detail)
937		
938	IV.C.3.b)	Fellows must attend required seminars, conferences, and journal
939		clubs. ^(Core)
940		
941	IV.C.3.c)	Fellows must actively participate in the planning and delivery of
942		didactic sessions. ^(Core)
943		
944	IV.C.4.	Fellow Experiences and Clinical Content
945		
946	IV.C.4.a)	The curriculum must include the following medical toxicology core
947		content areas:
948		
949	IV.C.4.a).(1)	analytical and forensic toxicology; ^(Core)
950		
951	IV.C.4.a).(2)	assessment and population health; ^(Core)
952		
953	IV.C.4.a).(3)	clinical assessment; ^(Core)
954		
955	IV.C.4.a).(4)	principles of toxicology; ^(Core)
956		
957	IV.C.4.a).(5)	therapeutics; and, ^(Core)
958		
959	IV.C.4.a).(6)	toxins and toxicants. ^(Core)
960		
961	IV.C.4.b)	All educational components of the fellowship must be related to
962		program goals and objectives. ^(Core)
963		
964	IV.C.4.c)	Programs must provide fellows a broad education, including the
965		basic skills and knowledge in medical toxicology, so that they may
966		function as specialists competent in providing comprehensive
967		patient care in medical toxicology, research, and teaching. ^(Core)
968		
969	IV.C.4.d)	Fellows must have patient experience with a diverse clinical
970		spectrum of diagnoses, for patients of all ages and both genders,
971		that enables them to develop and demonstrate competencies in
972		medical toxicology. ^(Core)
973		
974		This must include diagnoses resulting from patient exposure to:
975		
976	IV.C.4.d).(1)	drugs; ^(Core)
977		
978	IV.C.4.d).(2)	industrial, household, and environmental toxicants; ^(Core)
979		

980	IV.C.4.d).(3)	natural products; and, ^(Core)
981		
982	IV.C.4.d).(4)	other xenobiotics. ^(Core)
983		
984	IV.C.4.e)	Fellows must be provided hyperbaric oxygen therapy education
985		and experience. ^(Core)
986		
987	IV.C.4.f)	Fellows without prior experience in adult and pediatric critical care
988		must have at least one month in an adult intensive care unit and
989		one month in a pediatric intensive care unit experience. ^(Core)
990		
991	IV.C.4.g)	Fellows must have a minimum of 12 months of clinical experience
992		as the primary or consulting physician responsible for providing
993		direct/bedside patient evaluation, management, screening, and
994		preventive services. ^(Core)
995		
996	IV.C.4.h)	Fellows must be provided with experience in evaluating and
997		managing patients with workplace and environmental exposures
998		and must have experience in workplace evaluation, as well as in
999		an occupational medicine or toxicology clinic. ^(Core)
1000		
1001	IV.C.4.i)	Clinical education must include experience in an industrial setting,
1002		an occupational medicine clinic, an outpatient medical toxicology
1003		setting, or a referral setting with access to occupational medicine
1004		patients. ^(Core)
1005		
1006	IV.C.4.i).(1)	Fellows must have the opportunity to evaluate and
1007		manage intoxicated patients in both industrial and referral
1008		settings, including responsibility for providing bedside
1009		evaluation, management, screening, and preventive
1010		services for a minimum of 12 months or its full-time
1011		equivalent; ^(Core)
1012		
1013	IV.C.4.j)	Fellows must have 24 months' experience with a referral
1014		population of poisoned patients under the supervision of a
1015		physician who is certified in medical toxicology, or who possess
1016		appropriate qualifications as determined by the Review
1017		Committee. ^(Core)
1018		
1019	IV.C.4.k)	The program must provide fellows with educational experiences in
1020		a regional poison center certified by the American Association of
1021		Poison Control Centers, or at a regional referral toxicology service
1022		that annually takes in at least 1500 calls that require physician
1023		telephone consultation or intervention. ^(Core)
1024		
1025	IV.C.4.l)	Fellows must be provided opportunities to teach and participate in
1026		undergraduate, graduate, and continuing education activities. ^(Core)
1027		
1028	IV.C.4.m)	Fellows must document required patient care experiences. ^(Core)
1029		
1030	IV.D.	Scholarship

1031
1032 **Medicine is both an art and a science. The physician is a humanistic**
1033 **scientist who cares for patients. This requires the ability to think critically,**
1034 **evaluate the literature, appropriately assimilate new knowledge, and**
1035 **practice lifelong learning. The program and faculty must create an**
1036 **environment that fosters the acquisition of such skills through fellow**
1037 **participation in scholarly activities as defined in the subspecialty-specific**
1038 **Program Requirements. Scholarly activities may include discovery,**
1039 **integration, application, and teaching.**

1040
1041 **The ACGME recognizes the diversity of fellowships and anticipates that**
1042 **programs prepare physicians for a variety of roles, including clinicians,**
1043 **scientists, and educators. It is expected that the program's scholarship will**
1044 **reflect its mission(s) and aims, and the needs of the community it serves.**
1045 **For example, some programs may concentrate their scholarly activity on**
1046 **quality improvement, population health, and/or teaching, while other**
1047 **programs might choose to utilize more classic forms of biomedical**
1048 **research as the focus for scholarship.**

1049
1050 **IV.D.1. Program Responsibilities**

1051
1052 **IV.D.1.a) The program must demonstrate evidence of scholarly**
1053 **activities, consistent with its mission(s) and aims. (Core)**

1054
1055 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
1056 **must allocate adequate resources to facilitate fellow and**
1057 **faculty involvement in scholarly activities. (Core)**

1058
1059 **IV.D.2. Faculty Scholarly Activity**

1060
1061 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
1062 **accomplishments in at least three of the following domains:**
1063 **(Core)**

- 1064
1065
 - 1066 • **Research in basic science, education, translational**
 - 1067 **science, patient care, or population health**
 - 1068 • **Peer-reviewed grants**
 - 1069 • **Quality improvement and/or patient safety initiatives**
 - 1070 • **Systematic reviews, meta-analyses, review articles,**
 - 1071 **chapters in medical textbooks, or case reports**
 - 1072 • **Creation of curricula, evaluation tools, didactic**
 - 1073 **educational activities, or electronic educational**
 - 1074 **materials**
 - 1075 • **Contribution to professional committees, educational**
 - 1076 **organizations, or editorial boards**
 - 1077 • **Innovations in education**

1078 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
1079 **activity within and external to the program by the following**
1080 **methods:**

1081

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1082

1083

IV.D.2.b).(1)

faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor; (Outcome)‡

1137

IV.D.3.c) Fellows must complete a scholarly project prior to graduation.
^(Outcome)

IV.E. *Fellowship programs may assign fellows to engage in the independent practice of their core specialty during their fellowship program.*

[The Review Committee’s proposal to allow the independent practice option is part of the focused revision and is subject to public comment.]

IV.E.1. If programs permit their fellows to utilize the independent practice option, it must not exceed 20 percent of their time per week or 10 weeks of an academic year. ^(Core)

Background and Intent: Fellows who have previously completed residency programs have demonstrated sufficient competence to enter autonomous practice within their core specialty. This option is designed to enhance fellows’ maturation and competence in their core specialty. This enables fellows to occupy a dual role in the health system: as learners in their subspecialty, and as credentialed practitioners in their core specialty. Hours worked in independent practice during fellowship still fall under the clinical and educational work hour limits. See Program Directors’ Guide for more details.

1138
1139
1140
1141
1142
1143
1144
1145

IV.E.2. Fellows should maintain their primary specialty Board skills during the fellowship. ^{(Core)(Detail)} [Moved from IV.C.5.]

IV.E.2.a) ~~Fellows should not provide more than 12 hours per week of clinical practice unrelated to medical toxicology averaged over four weeks.~~ ^(Detail) [Moved from IV.C.5.a)]

Specialty-Specific Background and Intent: The Review Committee for Emergency Medicine considers the requirements above to be exclusive of moonlighting. Additional time spent by the fellows in the engagement of independent practice of their core specialty beyond the maximum stated in the requirements will be considered moonlighting, and will be counted toward the 80-hour maximum clinical time per week.

1147
1148
1149
1150
1151
1152

V. Evaluation

V.A. Fellow Evaluation

V.A.1. Feedback and Evaluation

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1153
1154
1155
1156
1157

- V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1158
1159
1160
1161
1162
1163
1164
1165
1166
1167
1168
1169
1170
1171
1172
1173
1174

- V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

- V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)

- V.A.1.b).(2) Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. ^(Core)

- V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the subspecialty-specific Milestones, and must: ^(Core)

- 1175 V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers,
 1176 patients, self, and other professional staff members);
 1177 and, ^(Core)
 1178
- 1179 V.A.1.c).(2) provide that information to the Clinical Competency
 1180 Committee for its synthesis of progressive fellow
 1181 performance and improvement toward unsupervised
 1182 practice. ^(Core)
 1183

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1184
- 1185 V.A.1.d) The program director or their designee, with input from the
 1186 Clinical Competency Committee, must:
 1187
- 1188 V.A.1.d).(1) meet with and review with each fellow their
 1189 documented semi-annual evaluation of performance,
 1190 including progress along the subspecialty-specific
 1191 Milestones. ^(Core)
 1192
- 1193 V.A.1.d).(2) assist fellows in developing individualized learning
 1194 plans to capitalize on their strengths and identify areas
 1195 for growth; and, ^(Core)
 1196
- 1197 V.A.1.d).(3) develop plans for fellows failing to progress, following
 1198 institutional policies and procedures. ^(Core)
 1199

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow

progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1200
1201 **V.A.1.e)** At least annually, there must be a summative evaluation of
1202 each fellow that includes their readiness to progress to the
1203 next year of the program, if applicable. ^(Core)
1204
1205 **V.A.1.f)** The evaluations of a fellow's performance must be accessible
1206 for review by the fellow. ^(Core)
1207
1208 **V.A.2.** **Final Evaluation**
1209
1210 **V.A.2.a)** The program director must provide a final evaluation for each
1211 fellow upon completion of the program. ^(Core)
1212
1213 **V.A.2.a).(1)** The subspecialty-specific Milestones, and when
1214 applicable the subspecialty-specific Case Logs, must
1215 be used as tools to ensure fellows are able to engage
1216 in autonomous practice upon completion of the
1217 program. ^(Core)
1218
1219 **V.A.2.a).(2)** The final evaluation must:
1220
1221 **V.A.2.a).(2).(a)** become part of the fellow's permanent record
1222 maintained by the institution, and must be
1223 accessible for review by the fellow in
1224 accordance with institutional policy; ^(Core)
1225
1226 **V.A.2.a).(2).(b)** verify that the fellow has demonstrated the
1227 knowledge, skills, and behaviors necessary to
1228 enter autonomous practice; ^(Core)
1229
1230 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
1231 Competency Committee; and, ^(Core)
1232
1233 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of
1234 the program. ^(Core)
1235
1236 **V.A.3.** **A Clinical Competency Committee must be appointed by the**
1237 **program director.** ^(Core)
1238
1239 **V.A.3.a)** At a minimum the Clinical Competency Committee must
1240 include three members, at least one of whom is a core faculty
1241 member. Members must be faculty members from the same
1242 program or other programs, or other health professionals
1243 who have extensive contact and experience with the
1244 program's fellows. ^(Core)
1245
1246 **V.A.3.b)** The Clinical Competency Committee must:
1247

- 1248 V.A.3.b).(1) review all fellow evaluations at least semi-annually;
1249 (Core)
- 1250
- 1251 V.A.3.b).(2) determine each fellow's progress on achievement of
1252 the subspecialty-specific Milestones; and, (Core)
- 1253
- 1254 V.A.3.b).(3) meet prior to the fellows' semi-annual evaluations and
1255 advise the program director regarding each fellow's
1256 progress. (Core)
- 1257
- 1258 V.B. Faculty Evaluation
- 1259
- 1260 V.B.1. The program must have a process to evaluate each faculty
1261 member's performance as it relates to the educational program at
1262 least annually. (Core)
- 1263

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1264
- 1265 V.B.1.a) This evaluation must include a review of the faculty member's
1266 clinical teaching abilities, engagement with the educational
1267 program, participation in faculty development related to their
1268 skills as an educator, clinical performance, professionalism,
1269 and scholarly activities. (Core)
- 1270
- 1271 V.B.1.b) This evaluation must include written, confidential evaluations
1272 by the fellows. (Core)
- 1273
- 1274 V.B.2. Faculty members must receive feedback on their evaluations at least
1275 annually. (Core)
- 1276
- 1277 V.B.3. Results of the faculty educational evaluations should be
1278 incorporated into program-wide faculty development plans. (Core)
- 1279

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1280
1281 **V.C. Program Evaluation and Improvement**
1282
1283 **V.C.1. The program director must appoint the Program Evaluation**
1284 **Committee to conduct and document the Annual Program**
1285 **Evaluation as part of the program’s continuous improvement**
1286 **process. (Core)**
1287
1288 **V.C.1.a) The Program Evaluation Committee must be composed of at**
1289 **least two program faculty members, at least one of whom is a**
1290 **core faculty member, and at least one fellow. (Core)**
1291
1292 **V.C.1.b) Program Evaluation Committee responsibilities must include:**
1293

1300 **V.C.1.b).(3) guiding ongoing program improvement, including**
1301 **development of new goals, based upon outcomes;**
1302 **and, (Core)**
1303
1304 **V.C.1.b).(4) review of the current operating environment to identify**
1305 **strengths, challenges, opportunities, and threats as**
1306 **related to the program’s mission and aims. (Core)**
1307

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

- 1308
1309 **V.C.1.c) The Program Evaluation Committee should consider the**

1370
1371
1372
1373

V.C.2.a)

A summary of the Self-Study must be submitted to the DIO.
(Core)

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1408

V.C.3.

One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.

The program director should encourage all eligible program graduates to take the certifying examination offered by the applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.

V.C.3.a)

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)

V.C.3.b)

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)

V.C.3.c)

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)

V.C.3.d)

For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program's aggregate pass rate of those taking the examination for the first time must be higher

1409 than the bottom fifth percentile of programs in that
1410 subspecialty. ^(Outcome)
1411
1412 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1413 whose graduates over the time period specified in the
1414 requirement have achieved an 80 percent pass rate will have
1415 met this requirement, no matter the percentile rank of the
1416 program for pass rate in that subspecialty. ^(Outcome)
1417

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1418
1419 **V.C.3.f)** Programs must report, in ADS, board certification status
1420 annually for the cohort of board-eligible fellows that
1421 graduated seven years earlier. ^(Core)
1422

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1423
1424 **VI. The Learning and Working Environment**

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*

1434

1435
1436
1437
1438
1439
1440
1441
1442
1443
1444

- ***Excellence in professionalism through faculty modeling of:***
 - ***the effacement of self-interest in a humanistic environment that supports the professional development of physicians***
 - ***the joy of curiosity, problem-solving, intellectual rigor, and discovery***
- ***Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team***

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program’s accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an

1462 *active role in system improvement processes. Graduating fellows*
1463 *will apply these skills to critique their future unsupervised practice*
1464 *and effect quality improvement measures.*

1465
1466 *It is necessary for fellows and faculty members to consistently work*
1467 *in a well-coordinated manner with other health care professionals to*
1468 *achieve organizational patient safety goals.*

1470 **VI.A.1.a) Patient Safety**

1471
1472 **VI.A.1.a).(1) Culture of Safety**

1473
1474 *A culture of safety requires continuous identification*
1475 *of vulnerabilities and a willingness to transparently*
1476 *deal with them. An effective organization has formal*
1477 *mechanisms to assess the knowledge, skills, and*
1478 *attitudes of its personnel toward safety in order to*
1479 *identify areas for improvement.*

1480
1481 **VI.A.1.a).(1).(a)** The program, its faculty, residents, and fellows
1482 must actively participate in patient safety
1483 systems and contribute to a culture of safety.
1484 (Core)

1485
1486 **VI.A.1.a).(1).(b)** The program must have a structure that
1487 promotes safe, interprofessional, team-based
1488 care. (Core)

1489
1490 **VI.A.1.a).(2) Education on Patient Safety**

1491
1492 Programs must provide formal educational activities
1493 that promote patient safety-related goals, tools, and
1494 techniques. (Core)

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1496
1497 **VI.A.1.a).(3) Patient Safety Events**

1498
1499 *Reporting, investigation, and follow-up of adverse*
1500 *events, near misses, and unsafe conditions are pivotal*
1501 *mechanisms for improving patient safety, and are*
1502 *essential for the success of any patient safety*
1503 *program. Feedback and experiential learning are*
1504 *essential to developing true competence in the ability*
1505 *to identify causes and institute sustainable systems-*
1506 *based changes to ameliorate patient safety*
1507 *vulnerabilities.*

1508
1509 **VI.A.1.a).(3).(a)** Residents, fellows, faculty members, and other
1510 clinical staff members must:

1511		
1512	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site;
1513		(Core)
1514		
1515		
1516	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and,
1517		(Core)
1518		
1519		
1520	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution's patient safety reports.
1521		(Core)
1522		
1523		
1524	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions.

1595 ***Supervision in the setting of graduate medical education***
1596 ***provides safe and effective care to patients; ensures each***
1597 ***fellow's development of the skills, knowledge, and attitudes***
1598 ***required to enter the unsupervised practice of medicine; and***
1599 ***establishes a foundation for continued professional growth.***

1600
1601 **VI.A.2.a).(1)** **Each patient must have an identifiable and**
1602 **appropriately-credentialed and privileged attending**
1603 **physician (or licensed independent practitioner as**
1604 **specified by the applicable Review Committee) who is**
1605 **responsible and accountable for the patient's care.**
1606 **^(Core)**

1607
1608 **VI.A.2.a).(1).(a)** **This information must be available to fellows,**
1609 **faculty members, other members of the health**
1610 **care team, and patients. ^(Core)**
1611

1612 VI.A.2.a).(1).(b) Fellows and faculty members must inform each
1613 patient of their respective roles in that patient's
1614 care when providing direct patient care. ^(Core)
1615

1616 VI.A.2.b) ***Supervision may be exercised through a variety of methods.***
1617 ***For many aspects of patient care, the supervising physician***
1618 ***may be a more advanced fellow. Other portions of care***
1619 ***provided by the fellow can be adequately supervised by the***
1620 ***appropriate availability of the supervising faculty member or***
1621 ***fellow, either on site or by means of telecommunication***
1622 ***technology. Some activities require the physical presence of***
1623 ***the supervising faculty member. In some circumstances,***
1624 ***supervision may include post-hoc review of fellow-delivered***
1625 ***care with feedback.***
1626

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1627
1628 VI.A.2.b).(1) The program must demonstrate that the appropriate
1629 level of supervision in place for all fellows is based on
1630 each fellow's level of training and ability, as well as
1631 patient complexity and acuity. Supervision may be
1632 exercised through a variety of methods, as appropriate
1633 to the situation. ^(Core)
1634

1635 VI.A.2.b).(1).(a) Fellows must be provided with prompt, reliable
1636 systems for communication and interactions with
1637 supervisory physicians. ^(Core)
1638

1639 VI.A.2.b).(2) The program must define when physical presence of a
1640 supervising physician is required. ^(Core)
1641

1642 VI.A.2.c) Levels of Supervision

1643
1644 To promote appropriate fellow supervision while providing
1645 for graded authority and responsibility, the program must use
1646 the following classification of supervision: ^(Core)
1647

1648 VI.A.2.c).(1) Direct Supervision:

1649
1650 VI.A.2.c).(1).(a) the supervising physician is physically present
1651 with the fellow during the key portions of the
1652 patient interaction; or, ^(Core)
1653

1654 VI.A.2.c).(1).(b) the supervising physician and/or patient is not
1655 physically present with the fellow and the
1656 supervising physician is concurrently
1657 monitoring the patient care through appropriate
1658 telecommunication technology. ^(Core)
1659

1660 VI.A.2.c).(1).(b).(i) The program must have clear guidelines
1661 that delineate which Competencies must be
1662 met to determine when a fellow can
1663 progress to be supervised indirectly. ^(Core)
1664

Specialty-Specific Background and Intent: When delineating the Competencies necessary for fellow progression to be supervised indirectly, the Review Committee suggests the Competencies include Milestones or other program-derived assessments.

1665
1666 VI.A.2.c).(1).(b).(ii) The program director must ensure that clear
1667 expectations exist and are communicated to
1668 the fellows, and that these expectations
1669 outline specific situations in which a fellow
1670 would still require direct supervision. ^(Core)
1671

1672 VI.A.2.c).(2) Indirect Supervision: the supervising physician is not
1673 providing physical or concurrent visual or audio
1674 supervision but is immediately available to the fellow
1675 for guidance and is available to provide appropriate
1676 direct supervision. ^(Core)
1677

1678 VI.A.2.c).(3) Oversight – the supervising physician is available to
1679 provide review of procedures/encounters with
1680 feedback provided after care is delivered. ^(Core)
1681

1682 VI.A.2.d) The privilege of progressive authority and responsibility,
1683 conditional independence, and a supervisory role in patient
1684 care delegated to each fellow must be assigned by the
1685 program director and faculty members. ^(Core)
1686

1687 VI.A.2.d).(1) The program director must evaluate each fellow's
1688 abilities based on specific criteria, guided by the
1689 Milestones. ^(Core)
1690

1691 VI.A.2.d).(2) Faculty members functioning as supervising
1692 physicians must delegate portions of care to fellows
1693 based on the needs of the patient and the skills of
1694 each fellow. ^(Core)
1695

1696 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior
1697 fellows and residents in recognition of their progress
1698 toward independence, based on the needs of each
1699 patient and the skills of the individual resident or
1700 fellow. ^(Detail)
1701

1702 VI.A.2.e) Programs must set guidelines for circumstances and events
1703 in which fellows must communicate with the supervising
1704 faculty member(s). ^(Core)
1705

1706 VI.A.2.e).(1) Each fellow must know the limits of their scope of
1707 authority, and the circumstances under which the
1708 fellow is permitted to act with conditional
1709 independence. ^(Outcome)
1710

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1711
1712 VI.A.2.f) Faculty supervision assignments must be of sufficient
1713 duration to assess the knowledge and skills of each fellow
1714 and to delegate to the fellow the appropriate level of patient
1715 care authority and responsibility. ^(Core)
1716

1717 VI.B. Professionalism

1718
1719 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
1720 educate fellows and faculty members concerning the professional
1721 responsibilities of physicians, including their obligation to be
1722 appropriately rested and fit to provide the care required by their
1723 patients. ^(Core)
1724

1725 VI.B.2. The learning objectives of the program must:

1726
1727 VI.B.2.a) be accomplished through an appropriate blend of supervised
1728 patient care responsibilities, clinical teaching, and didactic
1729 educational events; ^(Core)
1730

1731 VI.B.2.b) be accomplished without excessive reliance on fellows to
1732 fulfill non-physician obligations; and, ^(Core)
1733

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1734
1735 VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)
1736

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY

level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1805 *clinical learning environment models constructive behaviors, and prepares*
1806 *fellows with the skills and attitudes needed to thrive throughout their*
1807 *careers.*

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1809

1810 VI.C.1. The responsibility of the program, in partnership with the
1811 Sponsoring Institution, to address well-being must include:

1812
1813 VI.C.1.a) efforts to enhance the meaning that each fellow finds in the
1814 experience of being a physician, including protecting time
1815 with patients, minimizing non-physician obligations,
1816 providing administrative support, promoting progressive
1817 autonomy and flexibility, and enhancing professional
1818 relationships; (Core)

1819
1820 VI.C.1.b) attention to scheduling, work intensity, and work
1821 compression that impacts fellow well-being; (Core)

1822
1823 VI.C.1.c) evaluating workplace safety data and addressing the safety of
1824 fellows and faculty members; (Core)

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1826
1827 VI.C.1.d) policies and programs that encourage optimal fellow and
1828 faculty member well-being; and, (Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1830
1831 VI.C.1.d).(1) Fellows must be given the opportunity to attend
1832 medical, mental health, and dental care appointments,
1833 including those scheduled during their working hours.
1834 (Core)

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1836
1837 VI.C.1.e) attention to fellow and faculty member burnout, depression,
1838 and substance abuse. The program, in partnership with its
1839 Sponsoring Institution, must educate faculty members and
1840 fellows in identification of the symptoms of burnout,
1841 depression, and substance abuse, including means to assist
1842 those who experience these conditions. Fellows and faculty
1843 members must also be educated to recognize those
1844 symptoms in themselves and how to seek appropriate care.

1845
1846
1847

The program, in partnership with its Sponsoring Institution, must: ^(Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1850
1851
1852
1853
1854
1855

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; ^(Core)

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1856
1857
1858
1859
1860
1861
1862
1863
1864

VI.C.1.e).(2) provide access to appropriate tools for self-screening; and, ^(Core)

VI.C.1.e).(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. ^(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1865

1866 VI.C.2. There are circumstances in which fellows may be unable to attend
1867 work, including but not limited to fatigue, illness, family
1868 emergencies, and parental leave. Each program must allow an
1869 appropriate length of absence for fellows unable to perform their
1870 patient care responsibilities. ^(Core)
1871

1872 VI.C.2.a) The program must have policies and procedures in place to
1873 ensure coverage of patient care. ^(Core)
1874

1875 VI.C.2.b) These policies must be implemented without fear of negative
1876 consequences for the fellow who is or was unable to provide
1877 the clinical work. ^(Core)
1878

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

1879 VI.D. Fatigue Mitigation
1880

1881 VI.D.1. Programs must:
1882

1883 VI.D.1.a) educate all faculty members and fellows to recognize the
1884 signs of fatigue and sleep deprivation; ^(Core)
1885

1886 VI.D.1.b) educate all faculty members and fellows in alertness
1887 management and fatigue mitigation processes; and, ^(Core)
1888

1889 VI.D.1.c) encourage fellows to use fatigue mitigation processes to
1890 manage the potential negative effects of fatigue on patient
1891 care and learning. ^(Detail)
1892
1893

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1894 VI.D.2. Each program must ensure continuity of patient care, consistent
1895 with the program's policies and procedures referenced in VI.C.2–
1896

- 1897 **VI.C.2.b), in the event that a fellow may be unable to perform their**
 1898 **patient care responsibilities due to excessive fatigue.** *(Core)*
 1899

 1905
 1906 **VI.E.1. Clinical Responsibilities**
 1907
 1908 **The clinical responsibilities for each fellow must be based on PGY**
 1909 **level, patient safety, fellow ability, severity and complexity of patient**
 1910 **illness/condition, and available support services.** *(Core)*
 1911
 1912 **VI.E.1.a) The program must provide progressive responsibility for and**
 1913 **experience in the management of clinical problems.** *(Core)*
 1914

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

- 1915
 1916 **VI.E.2. Teamwork**
 1917
 1918 **Fellows must care for patients in an environment that maximizes**
 1919 **communication. This must include the opportunity to work as a**

1953		
1954		
1955	VI.F.	Clinical Experience and Education
1956		
1957		<i>Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.</i>
1958		
1959		
1960		
1961		

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1962		
1963	VI.F.1.	Maximum Hours of Clinical and Educational Work per Week
1964		
1965		Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. (Core)
1966		
1967		
1968		
1969		

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to

work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1970
1971
1972

VI.F.2.

Mandatory Time Free of Clinical Work and Education

- 1973 VI.F.2.a) The program must design an effective program structure that
 1974 is configured to provide fellows with educational
 1975 opportunities, as well as reasonable opportunities for rest
 1976 and personal well-being. ^(Core)
 1977
- 1978 VI.F.2.b) Fellows should have eight hours off between scheduled
 1979 clinical work and education periods. ^(Detail)
 1980
- 1981 VI.F.2.b).(1) There may be circumstances when fellows choose to
 1982 stay to care for their patients or return to the hospital
 1983 with fewer than eight hours free of clinical experience
 1984 and education. This must occur within the context of
 1985 the 80-hour and the one-day-off-in-seven
 1986 requirements. ^(Detail)
 1987

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

- 1988
- 1989 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
 1990 education after 24 hours of in-house call. ^(Core)
 1991

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

- 1992
- 1993 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
 1994 seven free of clinical work and required education (when
 1995 averaged over four weeks). At-home call cannot be assigned
 1996 on these free days. ^(Core)
 1997

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is

defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. ^(Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. ^(Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. ^(Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

VI.F.4. Clinical and Educational Work Hour Exceptions

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; ^(Detail)

VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, ^(Detail)

VI.F.4.a).(3) to attend unique educational events. ^(Detail)

VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and

that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

VI.F.4.c) **A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.**

The Review Committees for Emergency Medicine or Preventive Medicine will not consider requests for exceptions to the 80-hour limit to the fellows' work week.

VI.F.4.c).(1) **In preparing a request for an exception, the program director must follow the clinical and educational work hour exception policy from the *ACGME Manual of Policies and Procedures*. ^(Core)**

VI.F.4.c).(2) **Prior to submitting the request to the Review Committee, the program director must obtain approval from the Sponsoring Institution's GMEC and DIO. ^(Core)**

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

VI.F.5. Moonlighting

VI.F.5.a) **Moonlighting must not interfere with the ability of the fellow to achieve the goals and objectives of the educational program, and must not interfere with the fellow's fitness for work nor compromise patient safety. ^(Core)**

VI.F.5.b) **Time spent by fellows in internal and external moonlighting (as defined in the ACGME Glossary of Terms) must be counted toward the 80-hour maximum weekly limit. ^(Core)**

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

VI.F.6. In-House Night Float

Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. ^(Core)

2068

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

2069

VI.F.7. Maximum In-House On-Call Frequency

2070

2071

2072

Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). (Core)

2073

2074

VI.F.8. At-Home Call

2075

2076

VI.F.8.a) Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. (Core)

2077

2078

2079

2080

2081

2082

2083

VI.F.8.a).(1) At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. (Core)

2084

2085

2086

2087

VI.F.8.b) Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. (Detail)

2088

2089

2090

2091

2092

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
