1 **Proposed ACGME Program Requirements for Graduate Medical Education**
2 **in Medical Biochemical Genetics**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

<p>Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.</p>

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

- 48
49 Int.B.1. Medical biochemical geneticists are physicians who provide comprehensive
50 diagnostic, management, and genetic counseling services for patients with inborn
51 errors of metabolism. They focus on the treatment of genetic disorders of
52 intermediary metabolism, lysosomal storage diseases, disorders of energy
53 metabolism, and related disorders.
54
- 55 Int.B.2. Medical biochemical geneticists:
- 56
- 57 Int.B.2.a) diagnose and provide acute management of inborn errors of
58 metabolism;
- 59
- 60 Int.B.2.b) provide long-term management, including nutritional
61 recommendations for chronic management of inborn errors of
62 metabolism;
- 63
- 64 Int.B.2.c) provide genetic counseling, including assessment of mode of
65 inheritance, recurrence risk, and information about natural history
66 of disease;
- 67
- 68 Int.B.2.d) use their knowledge of heterogeneity, variability and natural
69 history of inborn errors of metabolism in patient-care decision
70 making;
- 71
- 72 Int.B.2.e) elicit and interpret individual and family medical histories;
- 73
- 74 Int.B.2.f) order and interpret specialized laboratory testing;
- 75
- 76 Int.B.2.g) interact with other health-care professionals, especially
77 nutritionists, in the provision of services for patients with genetic
78 disorders of intermediary metabolism; and,
- 79
- 80 Int.B.2.h) identify emerging and experimental therapeutics for patients.

81
82 **Int.C. Length of Educational Program**

83
84 The educational program in medical biochemical genetics must be 12 months in
85 length. ^{(Core)*}

86
87 **I. Oversight**

88
89 **I.A. Sponsoring Institution**

90
91 ***The Sponsoring Institution is the organization or entity that assumes the
92 ultimate financial and academic responsibility for a program of graduate
93 medical education consistent with the ACGME Institutional Requirements.***

94
95 ***When the Sponsoring Institution is not a rotation site for the program, the
96 most commonly utilized site of clinical activity for the program is the
97 primary clinical site.***

98

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

99

100 **I.A.1. The program must be sponsored by one ACGME-accredited**
101 **Sponsoring Institution. (Core)**

102

103 **I.B. Participating Sites**

104

105 *A participating site is an organization providing educational experiences or*
106 *educational assignments/rotations for fellows.*

107

108 **I.B.1. The program, with approval of its Sponsoring Institution, must**
109 **designate a primary clinical site. (Core)**

110

111 **I.B.1.a)** Institutions sponsoring medical biochemical genetics programs
112 must also sponsor ACGME-accredited programs in medical
113 genetics and genomics. (Core)

114

115 **I.B.1.b)** Institutions sponsoring medical biochemical genetics programs
116 should sponsor ACGME-accredited programs in pediatrics and
117 internal medicine. (Detail) †

118

119 **I.B.2. There must be a program letter of agreement (PLA) between the**
120 **program and each participating site that governs the relationship**
121 **between the program and the participating site providing a required**
122 **assignment. (Core)**

123

124 **I.B.2.a) The PLA must:**

125

126 **I.B.2.a).(1) be renewed at least every 10 years; and, (Core)**

127

128 **I.B.2.a).(2) be approved by the designated institutional official**
129 **(DIO). (Core)**

130

131 **I.B.3. The program must monitor the clinical learning and working**
132 **environment at all participating sites. (Core)**

133

134 **I.B.3.a) At each participating site there must be one faculty member,**
135 **designated by the program director, who is accountable for**
136 **fellow education for that site, in collaboration with the**
137 **program director. (Core)**

138

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical

settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Directors' Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

139
140
141
142
143
144
145
146
147
148
149
150

I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the ACGME's Accreditation Data System (ADS). ^(Core)

I.C. The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. ^(Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

151
152
153
154
155
156
157
158
159
160
161
162
163
164

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. ^(Core)

I.D.1.a) Participating sites must have a medical biochemical genetics laboratory which provides an appropriate volume and variety of biochemical genetics-related services and has an adequate number of qualified staff members, which must include a laboratory director certified in biochemical genetics by the American Board of Medical Genetics and Genomics. ^(Core)

- 165 I.D.1.b) Participating sites must provide a sufficient number and variety of
 166 inpatients and outpatients to permit fellows to gain experience with
 167 the presentation, natural history, and chronic treatment of a wide
 168 range of inborn errors of metabolism. ^(Core)
 169
 170 I.D.1.c) Adequate space and equipment must be available to meet the
 171 educational goals of the program. ^(Core)
 172
 173 I.D.1.c).(1) In addition to space for patient care activities, this requires
 174 meeting rooms, classrooms, office space, research
 175 facilities, and facilities for record storage and retrieval. ^(Detail)
 176
 177 I.D.1.c).(2) Office and laboratory space must be provided for the
 178 fellows for both patient-care work and participation in
 179 scholarly activities. ^(Core)
 180
 181 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
 182 **ensure healthy and safe learning and working environments that**
 183 **promote fellow well-being and provide for:** ^(Core)
 184
 185 **I.D.2.a) access to food while on duty;** ^(Core)
 186
 187 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
 188 **and accessible for fellows with proximity appropriate for safe**
 189 **patient care;** ^(Core)
 190

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

- 191
 192 I.D.2.c) clean and private facilities for lactation that have refrigeration
 193 capabilities, with proximity appropriate for safe patient care;
 194 ^(Core)
 195

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

- 196
 197 I.D.2.d) security and safety measures appropriate to the participating
 198 site; and, ^(Core)
 199

- 200 I.D.2.e) accommodations for fellows with disabilities consistent with
 201 the Sponsoring Institution's policy. ^(Core)
 202
- 203 I.D.3. Fellows must have ready access to subspecialty-specific and other
 204 appropriate reference material in print or electronic format. This
 205 must include access to electronic medical literature databases with
 206 full text capabilities. ^(Core)
 207
- 208 I.D.4. The program's educational and clinical resources must be adequate
 209 to support the number of fellows appointed to the program. ^(Core)
 210
- 211 I.D.4.a) The number and variety of patients available to the program, in
 212 both inpatient and outpatient settings, must be sufficient to allow
 213 fellows to develop an understanding of the wide variety of inborn
 214 errors of metabolism. ^(Core)
 215
- 216 I.E. *A fellowship program usually occurs in the context of many learners and
 217 other care providers and limited clinical resources. It should be structured
 218 to optimize education for all learners present.*
 219
- 220 I.E.1. Fellows should contribute to the education of residents in core
 221 programs, if present. ^(Core)
 222

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

- 223
- 224 II. Personnel
- 225
- 226 II.A. Program Director
- 227
- 228 II.A.1. There must be one faculty member appointed as program director
 229 with authority and accountability for the overall program, including
 230 compliance with all applicable program requirements. ^(Core)
 231
- 232 II.A.1.a) The Sponsoring Institution's Graduate Medical Education
 233 Committee (GMEC) must approve a change in program
 234 director. ^(Core)
 235
- 236 II.A.1.b) Final approval of the program director resides with the
 237 Review Committee. ^(Core)
 238

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the

ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

239
240
241
242
243
244
245
246
247

II.A.2. The program director must be provided with support adequate for administration of the program based upon its size and configuration.
(Core)

II.A.2.a) At a minimum, the program director must be provided with the salary support required to devote 10 percent FTE of non-clinical time to the administration of the program. (Core)

Background and Intent: Ten percent FTE is defined as one half day per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

248
249
250
251
252
253
254
255
256
257
258

II.A.3. Qualifications of the program director:

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; (Core)

II.A.3.a).(1) The program director should have at least three years of active participation as a specialist in biochemical genetics following completion of all graduate medical education.
(Detail)

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Medical Genetics and Genomics (ABMGG) or subspecialty qualifications that are acceptable to the Review Committee;
(Core)

[Note that while the Common Program Requirements deem certification by a certifying board of the American Osteopathic Association (AOA) acceptable, there is no AOA board that offers certification in this subspecialty]

II.A.3.b).(1) The Review Committee will also accept current ABMGG certification in either clinical genetics and genomics or clinical biochemical genetics. (Core)

II.A.3.b).(2) The program director must be actively participating in the ABMGG's Continuing Certification. (Core)

II.A.3.c) must include current medical licensure and appropriate medical staff appointment; and, (Core)

II.A.3.d) must include ongoing clinical activity. (Core)

281
282
283
284
285
286
287
288
289
290
291
292
293

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. ^(Core)

II.A.4.a) The program director must:

II.A.4.a).(1) be a role model of professionalism; ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

294
295
296
297
298
299

II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

300
301
302
303
304

II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

305
306
307
308
309
310

II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)

- 311 **II.A.4.a).(5)** have the authority to approve program faculty
312 members for participation in the fellowship program
313 education at all sites; ^(Core)
314
- 315 **II.A.4.a).(6)** have the authority to remove program faculty
316 members from participation in the fellowship program
317 education at all sites; ^(Core)
318
- 319 **II.A.4.a).(7)** have the authority to remove fellows from supervising
320 interactions and/or learning environments that do not
321 meet the standards of the program; ^(Core)
322

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 323
- 324 **II.A.4.a).(8)** submit accurate and complete information required
325 and requested by the DIO, GMEC, and ACGME; ^(Core)
326
- 327 **II.A.4.a).(9)** provide applicants who are offered an interview with
328 information related to the applicant's eligibility for the
329 relevant subspecialty board examination(s); ^(Core)
330
- 331 **II.A.4.a).(10)** provide a learning and working environment in which
332 fellows have the opportunity to raise concerns and
333 provide feedback in a confidential manner as
334 appropriate, without fear of intimidation or retaliation;
335 ^(Core)
336
- 337 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring
338 Institution's policies and procedures related to
339 grievances and due process; ^(Core)
340
- 341 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring
342 Institution's policies and procedures for due process
343 when action is taken to suspend or dismiss, not to
344 promote, or not to renew the appointment of a fellow;
345 ^(Core)
346

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

347

- 348 II.A.4.a).(13) ensure the program's compliance with the Sponsoring
349 Institution's policies and procedures on employment
350 and non-discrimination; (Core)
351
352 II.A.4.a).(13).(a) Fellows must not be required to sign a non-
353 competition guarantee or restrictive covenant.
354 (Core)
355
356 II.A.4.a).(14) document verification of program completion for all
357 graduating fellows within 30 days; (Core)
358
359 II.A.4.a).(15) provide verification of an individual fellow's
360 completion upon the fellow's request, within 30 days;
361 and, (Core)
362

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 363
364 II.A.4.a).(16) obtain review and approval of the Sponsoring
365 Institution's DIO before submitting information or
366 requests to the ACGME, as required in the Institutional
367 Requirements and outlined in the ACGME Program
368 Directors' Guide to the Common Program
369 Requirements. (Core)
370

371 **II.B. Faculty**

372
373 *Faculty members are a foundational element of graduate medical education*
374 *– faculty members teach fellows how to care for patients. Faculty members*
375 *provide an important bridge allowing fellows to grow and become practice*
376 *ready, ensuring that patients receive the highest quality of care. They are*
377 *role models for future generations of physicians by demonstrating*
378 *compassion, commitment to excellence in teaching and patient care,*
379 *professionalism, and a dedication to lifelong learning. Faculty members*
380 *experience the pride and joy of fostering the growth and development of*
381 *future colleagues. The care they provide is enhanced by the opportunity to*
382 *teach. By employing a scholarly approach to patient care, faculty members,*
383 *through the graduate medical education system, improve the health of the*
384 *individual and the population.*

385
386 *Faculty members ensure that patients receive the level of care expected*
387 *from a specialist in the field. They recognize and respond to the needs of*
388 *the patients, fellows, community, and institution. Faculty members provide*
389 *appropriate levels of supervision to promote patient safety. Faculty*
390 *members create an effective learning environment by acting in a*
391 *professional manner and attending to the well-being of the fellows and*
392 *themselves.*

393

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

394

II.B.1. For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. (Core)

395

396

397

398

II.B.2. Faculty members must:

399

400

II.B.2.a) be role models of professionalism; (Core)

401

402

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; (Core)

403

404

405

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

406

II.B.2.c) demonstrate a strong interest in the education of fellows; (Core)

407

408

II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; (Core)

409

410

411

II.B.2.e) administer and maintain an educational environment conducive to educating fellows; (Core)

412

413

414

II.B.2.f) regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; and, (Core)

415

416

417

II.B.2.g) pursue faculty development designed to enhance their skills at least annually. (Core)

418

419

420

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

421

II.B.3. Faculty Qualifications

422

423

II.B.3.a) Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments. (Core)

424

425

426

427

428 **II.B.3.b) Subspecialty physician faculty members must:**
429
430 **II.B.3.b).(1) have current certification in the subspecialty by the**
431 **American Board of Medical Genetics and Genomics or**
432 **possess qualifications judged acceptable to the**
433 **Review Committee. (Core)**

[Note that while the Common Program Requirements deem certification by a certifying board of the American Osteopathic Association (AOA) acceptable, there is no AOA board that offers certification in this subspecialty]

440 **II.B.3.b).(1).(a) The Review Committee will also accept current**
441 **ABMGG certification in either clinical genetics and**
442 **genomics or clinical biochemical genetics. (Core)**
443

444 **II.B.3.c) Any non-physician faculty members who participate in**
445 **fellowship program education must be approved by the**
446 **program director. (Core)**
447

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

448
449 **II.B.3.d) Any other specialty physician faculty members must have**
450 **current certification in their specialty by the appropriate**
451 **American Board of Medical Specialties (ABMS) member**
452 **board or American Osteopathic Association (AOA) certifying**
453 **board, or possess qualifications judged acceptable to the**
454 **Review Committee. (Core)**
455

456 **II.B.4. Core Faculty**
457
458 **Core faculty members must have a significant role in the education**
459 **and supervision of fellows and must devote a significant portion of**
460 **their entire effort to fellow education and/or administration, and**
461 **must, as a component of their activities, teach, evaluate, and provide**
462 **formative feedback to fellows. (Core)**
463

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

464

- 465 **II.B.4.a)** **Core faculty members must be designated by the program**
466 **director.** ^(Core)
467
- 468 **II.B.4.b)** **Core faculty members must complete the annual ACGME**
469 **Faculty Survey.** ^(Core)
470
- 471 **II.B.4.c)** There must be at least three FTE core faculty members, including
472 the program director, with current ABMGG certification in medical
473 biochemical genetics, clinical genetics and genomics, or clinical
474 biochemical genetics. ^(Core)
475
- 476 **II.C. Program Coordinator**
- 477
- 478 **II.C.1.** **There must be a program coordinator.** ^(Core)
479
- 480 **II.C.2.** **The program coordinator must be provided with support adequate**
481 **for administration of the program based upon its size and**
482 **configuration.** ^(Core)
483

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

- 484
- 485 **II.D. Other Program Personnel**
- 486
- 487 **The program, in partnership with its Sponsoring Institution, must jointly**
488 **ensure the availability of necessary personnel for the effective**
489 **administration of the program.** ^(Core)
490

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

491
492 II.D.1. Fellows must have regular opportunities to work with genetic counselors,
493 nurses, and nutritionists who are involved in the provision of clinical
494 metabolic disease services. ^(Core)
495

496 **III. Fellow Appointments**

497
498 **III.A. Eligibility Criteria**

499
500 **III.A.1. Eligibility Requirements – Fellowship Programs**

501
502 **All required clinical education for entry into ACGME-accredited**
503 **fellowship programs must be completed in an ACGME-accredited**
504 **residency program, an AOA-approved residency program, a**
505 **program with ACGME International (ACGME-I) Advanced Specialty**
506 **Accreditation, or a Royal College of Physicians and Surgeons of**
507 **Canada (RCPSC)-accredited or College of Family Physicians of**
508 **Canada (CFPC)-accredited residency program located in Canada.**
509 ^(Core)
510

<p>Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).</p>

511
512 **III.A.1.a) Fellowship programs must receive verification of each**
513 **entering fellow’s level of competence in the required field,**
514 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
515 **Milestones evaluations from the core residency program.** ^(Core)
516

517 **III.A.1.b)** Prior to appointment in the program, fellows must have
518 successfully completed a program in medical genetics and
519 genomics that satisfies the requirements in III.A.1. ^(Core)
520

521 **III.A.1.c) Fellow Eligibility Exception**

522
523 **The Review Committee for Medical Genetics and Genomics will**
524 **allow the following exception to the fellowship eligibility**
525 **requirements:**
526

527 **III.A.1.c).(1) An ACGME-accredited fellowship program may accept**
528 **an exceptionally qualified international graduate**
529 **applicant who does not satisfy the eligibility**
530 **requirements listed in III.A.1., but who does meet all of**
531 **the following additional qualifications and conditions:**
532 ^(Core)
533

534 **III.A.1.c).(1).(a) evaluation by the program director and**
535 **fellowship selection committee of the**
536 **applicant’s suitability to enter the program,**
537 **based on prior training and review of the**

- 538 summative evaluations of training in the core
539 specialty; and, ^(Core)
540
541 **III.A.1.c).(1).(b)** review and approval of the applicant’s
542 exceptional qualifications by the GMEC; and,
543 ^(Core)
544
545 **III.A.1.c).(1).(c)** verification of Educational Commission for
546 Foreign Medical Graduates (ECFMG)
547 certification. ^(Core)
548
549 **III.A.1.c).(2)** Applicants accepted through this exception must have
550 an evaluation of their performance by the Clinical
551 Competency Committee within 12 weeks of
552 matriculation. ^(Core)
553

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

- 554
555 **III.B.** The program director must not appoint more fellows than approved by the
556 Review Committee. ^(Core)
557
558 **III.B.1.** All complement increases must be approved by the Review
559 Committee. ^(Core)
560
561 **III.C.** Fellow Transfers
562
563 The program must obtain verification of previous educational experiences
564 and a summative competency-based performance evaluation prior to
565 acceptance of a transferring fellow, and Milestones evaluations upon
566 matriculation. ^(Core)
567
568 **IV. Educational Program**
569
570 *The ACGME accreditation system is designed to encourage excellence and*
571 *innovation in graduate medical education regardless of the organizational*
572 *affiliation, size, or location of the program.*

601
602
603
604
605
606

The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for example, it is expected that a program aiming to prepare physician-scientists will have a different curriculum from one focusing on community health.

IV.A. The curriculum must contain the following educational components: (Core)

IV.A.1. a set of program aims consistent with the Sponsoring Institution’s mission, the needs of the community it serves, and the desired distinctive capabilities of its graduates; (Core)

IV.A.1.a) The program’s aims must be made available to program applicants, fellows, and faculty members. (Core)

IV.A.2. competency-based goals and objectives for each educational experience designed to promote progress on a trajectory to autonomous practice in their subspecialty. These must be distributed, reviewed, and available to fellows and faculty members; (Core)

IV.A.3. delineation of fellow responsibilities for patient care, progressive responsibility for patient management, and graded supervision in their subspecialty; (Core)

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

607
608
609
610

IV.A.4. structured educational activities beyond direct patient care; and, (Core)

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

611

612 IV.A.5. advancement of fellows' knowledge of ethical principles
613 foundational to medical professionalism. ^(Core)

614
615 IV.B. ACGME Competencies
616

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

617
618 IV.B.1. The program must integrate the following ACGME Competencies
619 into the curriculum: ^(Core)

620
621 IV.B.1.a) Professionalism

622
623 Fellows must demonstrate a commitment to professionalism
624 and an adherence to ethical principles. ^(Core)

625
626 IV.B.1.b) Patient Care and Procedural Skills
627

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

628
629 IV.B.1.b).(1) Fellows must be able to provide patient care that is
630 compassionate, appropriate, and effective for the
631 treatment of health problems and the promotion of
632 health. ^(Core)

633
634 IV.B.1.b).(1).(a) Fellows must demonstrate competence in:

635
636 IV.B.1.b).(1).(a).(i) gathering essential and accurate
637 information about the patient using the
638 following clinical skills: ^(Core)

639
640 IV.B.1.b).(1).(a).(i).(a) medical interviewing, including the
641 taking and interpretation of a
642 complete family history (to include
643 construction of a pedigree); ^(Core)
644

645	IV.B.1.b).(1).(a).(i).(b)	physical examination; and, ^(Core)
646		
647	IV.B.1.b).(1).(a).(i).(c)	diagnostic studies, including the
648		interpretation of laboratory data
649		generated from biochemical and
650		molecular genetic analyses. ^(Core)
651		
652	IV.B.1.b).(1).(a).(ii)	making informed decisions about diagnostic
653		and therapeutic interventions based on
654		patient and family information and
655		preferences, up-to-date scientific evidence,
656		and clinical judgment by: ^(Core)
657		
658	IV.B.1.b).(1).(a).(ii).(a)	demonstrating effective and
659		appropriate clinical problem-solving
660		skills; ^(Core)
661		
662	IV.B.1.b).(1).(a).(ii).(b)	understanding the limits of one's
663		knowledge and expertise; and, ^(Core)
664		
665	IV.B.1.b).(1).(a).(ii).(c)	appropriate use of consultants and
666		referrals. ^(Core)
667		
668	IV.B.1.b).(1).(a).(iii)	developing and carrying out patient
669		management plans, including description of
670		medication, dietary supplements, and other
671		dietary plans. ^(Core)
672		
673	IV.B.1.b).(2)	Fellows must be able to perform all medical,
674		diagnostic, and surgical procedures considered
675		essential for the area of practice. ^(Core)
676		
677	IV.B.1.c)	Medical Knowledge
678		
679		Fellows must demonstrate knowledge of established and
680		evolving biomedical, clinical, epidemiological and social-
681		behavioral sciences, as well as the application of this
682		knowledge to patient care. ^(Core)
683		
684	IV.B.1.c).(1)	Fellows must demonstrate competence in:
685		
686	IV.B.1.c).(1).(a)	their knowledge of inborn errors of metabolism
687		(IEM), including: ^(Core)
688		
689	IV.B.1.c).(1).(a).(i)	the genetic basis of disease and their
690		patterns of inheritance; ^(Core)
691		
692	IV.B.1.c).(1).(a).(ii)	the principles of diagnosis based on
693		appropriate use of clinical laboratory testing;
694		^(Core)
695		

696	IV.B.1.c).(1).(a).(iii)	the molecular and metabolic mechanisms of disease; ^(Core)
697		
698		
699	IV.B.1.c).(1).(a).(iv)	the rational principles of treatment based on knowledge of the mechanisms of disease to include: ^(Core)
700		
701		
702		
703	IV.B.1.c).(1).(a).(iv).(a)	management of acute metabolic crises; ^(Core)
704		
705		
706	IV.B.1.c).(1).(a).(iv).(b)	long term care with emphasis on reduction of metabolic injury and nutritional imbalances; ^(Core)
707		
708		
709		
710	IV.B.1.c).(1).(a).(iv).(c)	enzyme replacement and organ transplant therapies; and, ^(Core)
711		
712		
713	IV.B.1.c).(1).(a).(iv).(d)	newborn screening for metabolic disorders. ^(Core)
714		
715		
716	IV.B.1.c).(1).(a).(v)	the genetic epidemiology of inborn errors of metabolism and the application of that knowledge to newborn screening; ^(Core)
717		
718		
719		
720	IV.B.1.c).(1).(a).(vi)	principles of operation in clinical biochemical genetics diagnostic laboratories; and, ^(Core)
721		
722		
723		
724	IV.B.1.c).(1).(a).(vii)	the limits of current knowledge about IEM and the general strategies for biomedical research on these disorders. ^(Core)
725		
726		
727		
728	IV.B.1.d)	Practice-based Learning and Improvement
729		
730		Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. ^(Core)
731		
732		
733		
734		

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

735		
736	IV.B.1.e)	Interpersonal and Communication Skills
737		

738		Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. ^(Core)
739		
740		
741		
742		
743	IV.B.1.f)	Systems-based Practice
744		
745		Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health care, including the social determinants of health, as well as the ability to call effectively on other resources to provide optimal health care. ^(Core)
746		
747		
748		
749		
750		
751	IV.C.	Curriculum Organization and Fellow Experiences
752		
753	IV.C.1.	The curriculum must be structured to optimize fellow educational experiences, the length of these experiences, and supervisory continuity. ^(Core)
754		
755		
756		
757	IV.C.1.a)	The program must ensure:
758		
759	IV.C.1.a).(1)	adequate supervision during times of rotational transition and hand-offs; ^(Core)
760		
761		
762	IV.C.1.a).(2)	continuity of supervision at all participating sites; and, ^(Core)
763		
764	IV.C.1.a).(3)	that fellows have exposure to and sufficient time in specialty clinics. ^(Core)
765		
766		
767	IV.C.2.	The program must provide instruction and experience in pain management if applicable for the subspecialty, including recognition of the signs of addiction. ^(Core)
768		
769		
770		
771	IV.C.3.	The 12 months of medical biochemical genetics education must include 11 months of broad-based, clinically-oriented medical biochemical genetics activities and one month of activities in a medical biochemical genetics diagnostic laboratory. ^(Core)
772		
773		
774		
775		
776	IV.C.4.	The program must possess a well-organized and effective curriculum, both didactic and clinical. ^(Core)
777		
778		
779	IV.C.5.	The curriculum must provide fellows with direct experience in progressive responsibility for patient management. ^(Core)
780		
781		
782	IV.C.6.	The fellowship must be organized to provide a well-structured, integrated, and progressive educational experience in medical biochemical genetics. ^(Core)
783		
784		
785		
786	IV.C.7.	Fellows must have the opportunity to develop the abilities to diagnose IEM, counsel patients, and manage the broad range of clinical problems that are encompassed by biochemical genetics. ^(Core)
787		
788		

789		
790	IV.C.8.	As medical biochemical genetics increasingly involves diagnosis and
791		long-term management of adults, fellows must be competent to work with
792		patients of all ages. ^(Core)
793		
794	IV.C.9.	Programs must provide:
795		
796	IV.C.9.a)	clinical teaching conferences for the fellows. ^(Core)
797		
798	IV.C.9.a).(1)	Attendance by the fellows and the faculty members must
799		be documented. ^(Detail)
800		
801	IV.C.9.a).(2)	These conferences must be distinct from the basic science
802		lectures and didactic sessions. ^(Detail)
803		
804	IV.C.9.b)	structured education, including formal coursework in the basic
805		sciences and clinical areas pertinent to biochemical genetics, to
806		include
807		
808	IV.C.9.b).(1)	amino acids; ^(Core)
809		
810	IV.C.9.b).(2)	carbohydrates; ^(Core)
811		
812	IV.C.9.b).(3)	cofactors; ^(Core)
813		
814	IV.C.9.b).(4)	creatine; ^(Core)
815		
816	IV.C.9.b).(5)	lipids; ^(Core)
817		
818	IV.C.9.b).(6)	lysosomes; ^(Core)
819		
820	IV.C.9.b).(7)	metals; ^(Core)
821		
822	IV.C.9.b).(8)	mitochondria; ^(Core)
823		
824	IV.C.9.b).(9)	neurotransmitters; ^(Core)
825		
826	IV.C.9.b).(10)	organic acids; ^(Core)
827		
828	IV.C.9.b).(11)	peroxisomes; ^(Core)
829		
830	IV.C.9.b).(12)	urines and pyrimidines; and, ^(Core)
831		
832	IV.C.9.b).(13)	transport. ^(Core)
833		
834	IV.C.9.c)	mentored clinical education in the practice of biochemical genetics
835		in both outpatient and inpatient settings; ^(Core)
836		
837	IV.C.9.d)	basic instruction in medical biochemical genetic laboratory testing;
838		^(Core)
839		

- 840 IV.C.9.e) basic instruction in clinical research; and, ^(Core)
841
842 IV.C.9.f) advanced instruction in the interpretation of biochemical laboratory
843 test results. ^(Core)
844
845 IV.C.10. Fellows must spend a minimum of four continuous weeks in the
846 laboratory so that they will be able to develop their abilities to understand
847 an appropriate variety of laboratory methods. ^(Core)
848
849 IV.C.10.a) Fellows' education must include participation in the working
850 conferences of laboratories, as well as ongoing discussion of
851 laboratory data during other clinical conferences. ^(Core)
852
853 IV.C.10.b) The medical biochemical genetics laboratory must be an integral
854 component of each program. ^(Core)
855
856 IV.C.11. Fellows must participate formally, through lectures or other didactic
857 sessions, in the equivalent of a one-semester graduate-level course in
858 biochemical genetics. ^(Core)
859
860 **IV.D. Scholarship**
861
862 ***Medicine is both an art and a science. The physician is a humanistic***
863 ***scientist who cares for patients. This requires the ability to think critically,***
864 ***evaluate the literature, appropriately assimilate new knowledge, and***
865 ***practice lifelong learning. The program and faculty must create an***

867 ***participation in scholarly activities as defined in the subspecialty-specific***
868 ***Program Requirements. Scholarly activities may include discovery,***
869 ***integration, application, and teaching.***
870
871 ***The ACGME recognizes the diversity of fellowships and anticipates that***
872 ***programs prepare physicians for a variety of roles, including clinicians,***
873 ***scientists, and educators. It is expected that the program's scholarship will***
874 ***reflect its mission(s) and aims, and the needs of the community it serves.***
875 ***For example, some programs may concentrate their scholarly activity on***
876 ***quality improvement, population health, and/or teaching, while other***
877 ***programs might choose to utilize more classic forms of biomedical***
878 ***research as the focus for scholarship.***
879
880 **IV.D.1. Program Responsibilities**
881
882 **IV.D.1.a) The program must demonstrate evidence of scholarly**
883 **activities, consistent with its mission(s) and aims. ^(Core)**
884
885 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
886 **must allocate adequate resources to facilitate fellow and**
887 **faculty involvement in scholarly activities. ^(Core)**
888
889 **IV.D.2. Faculty Scholarly Activity**
890

891 **IV.D.2.a)** **Among their scholarly activity, programs must demonstrate**
892 **accomplishments in at least three of the following domains:**
893 **(Core)**

- 894
- 895 • **Research in basic science, education, translational**
- 896 **science, patient care, or population health**
- 897 • **Peer-reviewed grants**
- 898 • **Quality improvement and/or patient safety initiatives**
- 899 • **Systematic reviews, meta-analyses, review articles,**
- 900 **chapters in medical textbooks, or case reports**
- 901 • **Creation of curricula, evaluation tools, didactic**
- 902 **educational activities, or electronic educational**
- 903 **materials**
- 904 • **Contribution to professional committees, educational**
- 905 **organizations, or editorial boards**
- 906 • **Innovations in education**

907

908 **IV.D.2.b)** **The program must demonstrate dissemination of scholarly**
909 **activity within and external to the program by the following**
910 **methods:**
911

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

912

913 **IV.D.2.b).(1)** **faculty participation in grand rounds, posters,**
914 **workshops, quality improvement presentations,**
915 **podium presentations, grant leadership, non-peer-**
916 **reviewed print/electronic resources, articles or**
917 **publications, book chapters, textbooks, webinars,**
918 **service on professional committees, or serving as a**
919 **journal reviewer, journal editorial board member, or**
920 **editor; (Outcome)‡**

921

922 **IV.D.2.b).(2)** **peer-reviewed publication. (Outcome)**

923

924 **IV.D.3. Fellow Scholarly Activity**

925

926 **IV.D.3.a)** **The curriculum must advance fellows’ knowledge of the basic**
927 **principles of research, including how research is conducted,**
928 **evaluated, explained to patients, and applied to patient care. (Core)**

929

930 **IV.D.3.b)** **Fellows must participate in scholarly activity. (Core)**

931

Background and Intent: Fellows who have previously completed residency programs have demonstrated sufficient competence to enter autonomous practice within their core specialty. This option is designed to enhance fellows' maturation and competence in their core specialty. This enables fellows to occupy a dual role in the health system: as learners in their subspecialty, and as credentialed practitioners in their core specialty. Hours worked in independent practice during fellowship still fall under the clinical and educational work hour limits. See Program Director Guide for more details.

932
933
934
935
936
937
938

V. Evaluation

V.A. Fellow Evaluation

V.A.1. Feedback and Evaluation

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

939
940
941
942
943

- V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)**

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive

to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

- 944
945 **V.A.1.b)** Evaluation must be documented at the completion of the
946 assignment. ^(Core)
947
- 948 **V.A.1.b).(1)** For block rotations of greater than three months in
949 duration, evaluation must be documented at least
950 every three months. ^(Core)
951
- 952 **V.A.1.b).(2)** Longitudinal experiences such as continuity clinic in
953 the context of other clinical responsibilities must be
954 evaluated at least every three months and at
955 completion. ^(Core)
956
- 957 **V.A.1.c)** The program must provide an objective performance
958 evaluation based on the Competencies and the subspecialty-
959 specific Milestones, and must: ^(Core)
960
- 961 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,
962 patients, self, and other professional staff members);
963 and, ^(Core)
964
- 965 **V.A.1.c).(2)** provide that information to the Clinical Competency
966 Committee for its synthesis of progressive fellow
967 performance and improvement toward unsupervised
968 practice. ^(Core)
969

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 970
971 **V.A.1.d)** The program director or their designee, with input from the
972 Clinical Competency Committee, must:
973
- 974 **V.A.1.d).(1)** meet with and review with each fellow their
975 documented semi-annual evaluation of performance,
976 including progress along the subspecialty-specific
977 Milestones. ^(Core)
978
- 979 **V.A.1.d).(2)** assist fellows in developing individualized learning
980 plans to capitalize on their strengths and identify areas
981 for growth; and, ^(Core)
982

983 V.A.1.d).(3) develop plans for fellows failing to progress, following
984 institutional policies and procedures. (Core)
985

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

986
987 V.A.1.e) At least annually, there must be a summative evaluation of
988 each fellow that includes their readiness to progress to the
989 next year of the program, if applicable. (Core)
990

991 V.A.1.f) The evaluations of a fellow's performance must be accessible
992 for review by the fellow. (Core)
993

994 V.A.2. Final Evaluation
995

996 V.A.2.a) The program director must provide a final evaluation for each
997 fellow upon completion of the program. (Core)
998

999 V.A.2.a).(1) The subspecialty-specific Milestones, and when
1000 applicable the subspecialty-specific Case Logs, must
1001 be used as tools to ensure fellows are able to engage
1002 in autonomous practice upon completion of the
1003 program. (Core)
1004

1005 V.A.2.a).(2) The final evaluation must:

1006
1007 V.A.2.a).(2).(a) become part of the fellow's permanent record
1008 maintained by the institution, and must be
1009 accessible for review by the fellow in
1010 accordance with institutional policy; (Core)
1011

1012 V.A.2.a).(2).(b) verify that the fellow has demonstrated the
1013 knowledge, skills, and behaviors necessary to
1014 enter autonomous practice; (Core)
1015

- 1016 V.A.2.a).(2).(c) consider recommendations from the Clinical
1017 Competency Committee; and, ^(Core)
1018
- 1019 V.A.2.a).(2).(d) be shared with the fellow upon completion of
1020 the program. ^(Core)
1021
- 1022 V.A.3. A Clinical Competency Committee must be appointed by the
1023 program director. ^(Core)
1024
- 1025 V.A.3.a) At a minimum the Clinical Competency Committee must
1026 include three members, at least one of whom is a core faculty
1027 member. Members must be faculty members from the same
1028 program or other programs, or other health professionals
1029 who have extensive contact and experience with the
1030 program's fellows. ^(Core)
1031
- 1032 V.A.3.b) The Clinical Competency Committee must:
- 1033
- 1034 V.A.3.b).(1) review all fellow evaluations at least semi-annually;
1035 ^(Core)
1036
- 1037 V.A.3.b).(2) determine each fellow's progress on achievement of
1038 the subspecialty-specific Milestones; and, ^(Core)
1039
- 1040 V.A.3.b).(3) meet prior to the fellows' semi-annual evaluations and
1041 advise the program director regarding each fellow's
1042 progress. ^(Core)
1043
- 1044 V.B. Faculty Evaluation
- 1045
- 1046 V.B.1. The program must have a process to evaluate each faculty
1047 member's performance as it relates to the educational program at
1048 least annually. ^(Core)
1049

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information.

The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1050
1051 V.B.1.a) This evaluation must include a review of the faculty member's
1052 clinical teaching abilities, engagement with the educational
1053 program, participation in faculty development related to their
1054 skills as an educator, clinical performance, professionalism,
1055 and scholarly activities. (Core)
1056
1057 V.B.1.b) This evaluation must include written, confidential evaluations
1058 by the fellows. (Core)
1059
1060 V.B.2. Faculty members must receive feedback on their evaluations at least
1061 annually. (Core)
1062
1063 V.B.3. Results of the faculty educational evaluations should be
1064 incorporated into program-wide faculty development plans. (Core)
1065

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1066
1067 V.C. Program Evaluation and Improvement
1068
1069 V.C.1. The program director must appoint the Program Evaluation
1070 Committee to conduct and document the Annual Program
1071 Evaluation as part of the program's continuous improvement
1072 process. (Core)
1073
1074 V.C.1.a) The Program Evaluation Committee must be composed of at
1075 least two program faculty members, at least one of whom is a
1076 core faculty member, and at least one fellow. (Core)
1077
1078 V.C.1.b) Program Evaluation Committee responsibilities must include:
1079
1080 V.C.1.b).(1) acting as an advisor to the program director, through
1081 program oversight; (Core)
1082
1083 V.C.1.b).(2) review of the program's self-determined goals and
1084 progress toward meeting them; (Core)
1085
1086 V.C.1.b).(3) guiding ongoing program improvement, including
1087 development of new goals, based upon outcomes;
1088 and, (Core)
1089
1090 V.C.1.b).(4) review of the current operating environment to identify
1091 strengths, challenges, opportunities, and threats as
1092 related to the program's mission and aims. (Core)

1093

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

1094

1095

V.C.1.c) The Program Evaluation Committee should consider the following elements in its assessment of the program:

1096

1097

1098

V.C.1.c).(1) curriculum; (Core)

1099

1100

V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s); (Core)

1101

1102

1103

V.C.1.c).(3) ACGME letters of notification, including citations, Areas for Improvement, and comments; (Core)

1104

1105

1106

V.C.1.c).(4) quality and safety of patient care; (Core)

1107

1108

V.C.1.c).(5) aggregate fellow and faculty:

1109

1110

V.C.1.c).(5).(a) well-being; (Core)

1111

1112

V.C.1.c).(5).(b) recruitment and retention; (Core)

1113

1114

V.C.1.c).(5).(c) workforce diversity; (Core)

1115

1116

V.C.1.c).(5).(d) engagement in quality improvement and patient safety; (Core)

1117

1118

1119

V.C.1.c).(5).(e) scholarly activity; (Core)

1120

1121

V.C.1.c).(5).(f) ACGME Resident/Fellow and Faculty Surveys (where applicable); and, (Core)

1122

1123

1124

V.C.1.c).(5).(g) written evaluations of the program. (Core)

1125

1126

V.C.1.c).(6) aggregate fellow:

1127

1128

V.C.1.c).(6).(a) achievement of the Milestones; (Core)

1129

1130

V.C.1.c).(6).(b) in-training examinations (where applicable); (Core)

1131

1132

1133

V.C.1.c).(6).(c) board pass and certification rates; and, (Core)

1134

1135

V.C.1.c).(6).(d) graduate performance. (Core)

1136

1137

V.C.1.c).(7) aggregate faculty:

- 1138
 1139 V.C.1.c).(7).(a) evaluation; and, (Core)
 1140
 1141 V.C.1.c).(7).(b) professional development (Core)
 1142
 1143 V.C.1.d) The Program Evaluation Committee must evaluate the
 1144 program's mission and aims, strengths, areas for
 1145 improvement, and threats. (Core)
 1146
 1147 V.C.1.e) The annual review, including the action plan, must:
 1148
 1149 V.C.1.e).(1) be distributed to and discussed with the members of
 1150 the teaching faculty and the fellows; and, (Core)
 1151
 1152 V.C.1.e).(2) be submitted to the DIO. (Core)
 1153
 1154 V.C.2. The program must participate in a Self-Study prior to its 10-Year
 1155 Accreditation Site Visit. (Core)
 1156
 1157 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
 1158 (Core)
 1159

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1160
 1161 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
 1162 *who seek and achieve board certification. One measure of the*
 1163 *effectiveness of the educational program is the ultimate pass rate.*
 1164
 1165 *The program director should encourage all eligible program*
 1166 *graduates to take the certifying examination offered by the*
 1167 *applicable American Board of Medical Specialties (ABMS) member*
 1168 *board or American Osteopathic Association (AOA) certifying board.*
 1169
 1170 V.C.3.a) For subspecialties in which the ABMS member board and/or
 1171 AOA certifying board offer(s) an annual written exam, in the
 1172 preceding three years, the program's aggregate pass rate of
 1173 those taking the examination for the first time must be higher
 1174 than the bottom fifth percentile of programs in that
 1175 subspecialty. (Outcome)
 1176

- 1177 **V.C.3.b)** For subspecialties in which the ABMS member board and/or
 1178 AOA certifying board offer(s) a biennial written exam, in the
 1179 preceding six years, the program’s aggregate pass rate of
 1180 those taking the examination for the first time must be higher
 1181 than the bottom fifth percentile of programs in that
 1182 subspecialty. *(Outcome)*
 1183
- 1184 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
 1185 AOA certifying board offer(s) an annual oral exam, in the
 1186 preceding three years, the program’s aggregate pass rate of
 1187 those taking the examination for the first time must be higher
 1188 than the bottom fifth percentile of programs in that
 1189 subspecialty. *(Outcome)*
 1190
- 1191 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
 1192 AOA certifying board offer(s) a biennial oral exam, in the
 1193 preceding six years, the program’s aggregate pass rate of
 1194 those taking the examination for the first time must be higher
 1195 than the bottom fifth percentile of programs in that
 1196 subspecialty. *(Outcome)*
 1197
- 1198 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
 1199 whose graduates over the time period specified in the
 1200 requirement have achieved an 80 percent pass rate will have
 1201 met this requirement, no matter the percentile rank of the
 1202 program for pass rate in that subspecialty. *(Outcome)*
 1203

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1204
 1205 **V.C.3.f)** Programs must report, in ADS, board certification status
 1206 annually for the cohort of board-eligible fellows that
 1207 graduated seven years earlier. *(Core)*
 1208

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too

fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.
(Core)

VI.A.1.a).(1).(b) The program must have a structure that promotes safe, interprofessional, team-based care. (Core)

VI.A.1.a).(2) Education on Patient Safety

1278
1279
1280
1281

Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. ^(Core)

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

VI.A.1.a).(3)

Patient Safety Events

Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.

VI.A.1.a).(3).(a)

Residents, fellows, faculty members, and other clinical staff members must:

VI.A.1.a).(3).(a).(i)

know their responsibilities in reporting patient safety events at the clinical site; ^(Core)

VI.A.1.a).(3).(a).(ii)

know how to report patient safety events, including near misses, at the clinical site; and, ^(Core)

VI.A.1.a).(3).(a).(iii)

be provided with summary information of their institution's patient safety reports. ^(Core)

VI.A.1.a).(3).(b)

Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. ^(Core)

VI.A.1.a).(4)

Fellow Education and Experience in Disclosure of Adverse Events

Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.

1326	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. ^(Core)
1327		
1328		
1329

1373		
1374		
1375		
1376		

1377 *and monitor a structured chain of responsibility and*
1378 *accountability as it relates to the supervision of all patient*
1379 *care.*

1380
1381 *Supervision in the setting of graduate medical education*
1382 *provides safe and effective care to patients; ensures each*
1383 *fellow's development of the skills, knowledge, and attitudes*
1384 *required to enter the unsupervised practice of medicine; and*
1385 *establishes a foundation for continued professional growth.*

1386
1387 **VI.A.2.a).(1)** **Each patient must have an identifiable and**
1388 **appropriately-credentialed and privileged attending**
1389 **physician (or licensed independent practitioner as**
1390 **specified by the applicable Review Committee) who is**
1391 **responsible and accountable for the patient's care.**
1392 **(Core)**

1393
1394 Licensed independent practitioners who have primary
1395 responsibility for patient care must be physicians. **(Core)**
1396

1397 **VI.A.2.a).(1).(a)** **This information must be available to fellows,**
1398 **faculty members, other members of the health**
1399 **care team, and patients. (Core)**

1400
1401 **VI.A.2.a).(1).(b)** **Fellows and faculty members must inform each**
1402 **patient of their respective roles in that patient's**
1403 **care when providing direct patient care. (Core)**
1404

1405 **VI.A.2.b)** ***Supervision may be exercised through a variety of methods.***
1406 ***For many aspects of patient care, the supervising physician***
1407 ***may be a more advanced fellow. Other portions of care***
1408 ***provided by the fellow can be adequately supervised by the***
1409 ***appropriate availability of the supervising faculty member or***
1410 ***fellow, either on site or by means of telecommunication***
1411 ***technology. Some activities require the physical presence of***
1412 ***the supervising faculty member. In some circumstances,***
1413 ***supervision may include post-hoc review of fellow-delivered***
1414 ***care with feedback.***
1415

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1416
1417 **VI.A.2.b).(1)** **The program must demonstrate that the appropriate**
1418 **level of supervision in place for all fellows is based on**

1419		each fellow's level of training and ability, as well as
1420		patient complexity and acuity. Supervision may be
1421		exercised through a variety of methods, as appropriate
1422		to the situation. ^(Core)
1423		
1424	VI.A.2.b).(2)	The program must define when physical presence of a
1425		supervising physician is required. ^(Core)
1426		
1427	VI.A.2.c)	Levels of Supervision
1428		
1429		To promote appropriate fellow supervision while providing
1430		for graded authority and responsibility, the program must use
1431		the following classification of supervision: ^(Core)
1432		
1433	VI.A.2.c).(1)	Direct Supervision:
1434		
1435	VI.A.2.c).(1).(a)	the supervising physician is physically present
1436		with the fellow during the key portions of the
1437		patient interaction; or, ^(Core)
1438		
1439	VI.A.2.c).(1).(a).(i)	<u>Fellow performance of procedures must be</u>
1440		<u>done under direct supervision where the</u>
1441		<u>supervising physician is physically present.</u>
1442		^(Core)
1443		
1444	VI.A.2.c).(1).(b)	the supervising physician and/or patient is not
1445		physically present with the fellow and the
1446		supervising physician is concurrently
1447		monitoring the patient care through appropriate
1448		telecommunication technology. ^(Core)
1449		
1450	VI.A.2.c).(1).(b).(i)	<u>Direct supervision through appropriate</u>
1451		<u>telecommunication technology must be</u>
1452		<u>limited to history-taking and patient</u>
1453		<u>examination, assessment, and counseling.</u>
1454		^(Core)
1455		
1456	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not
1457		providing physical or concurrent visual or audio
1458		supervision but is immediately available to the fellow
1459		for guidance and is available to provide appropriate
1460		direct supervision. ^(Core)
1461		
1462	VI.A.2.c).(3)	Oversight – the supervising physician is available to
1463		provide review of procedures/encounters with
1464		feedback provided after care is delivered. ^(Core)
1465		
1466	VI.A.2.d)	The privilege of progressive authority and responsibility,
1467		conditional independence, and a supervisory role in patient
1468		care delegated to each fellow must be assigned by the
1469		program director and faculty members. ^(Core)

- 1470
1471 **VI.A.2.d).(1)** **The program director must evaluate each fellow’s**
1472 **abilities based on specific criteria, guided by the**
1473 **Milestones.** ^(Core)
1474
1475 **VI.A.2.d).(2)** **Faculty members functioning as supervising**
1476 **physicians must delegate portions of care to fellows**
1477 **based on the needs of the patient and the skills of**
1478 **each fellow.** ^(Core)
1479
1480 **VI.A.2.d).(3)** **Fellows should serve in a supervisory role to junior**
1481 **fellows and residents in recognition of their progress**
1482 **toward independence, based on the needs of each**
1483 **patient and the skills of the individual resident or**
1484 **fellow.** ^(Detail)
1485
1486 **VI.A.2.e)** **Programs must set guidelines for circumstances and events**
1487 **in which fellows must communicate with the supervising**
1488 **faculty member(s).** ^(Core)
1489
1490 **VI.A.2.e).(1)** **Each fellow must know the limits of their scope of**
1491 **authority, and the circumstances under which the**
1492 **fellow is permitted to act with conditional**
1493 **independence.** ^(Outcome)
1494

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1495
1496 **VI.A.2.f)** **Faculty supervision assignments must be of sufficient**
1497 **duration to assess the knowledge and skills of each fellow**
1498 **and to delegate to the fellow the appropriate level of patient**
1499 **care authority and responsibility.** ^(Core)
1500
1501 **VI.B. Professionalism**
1502
1503 **VI.B.1.** **Programs, in partnership with their Sponsoring Institutions, must**
1504 **educate fellows and faculty members concerning the professional**
1505 **responsibilities of physicians, including their obligation to be**
1506 **appropriately rested and fit to provide the care required by their**
1507 **patients.** ^(Core)
1508
1509 **VI.B.2.** **The learning objectives of the program must:**
1510
1511 **VI.B.2.a)** **be accomplished through an appropriate blend of supervised**
1512 **patient care responsibilities, clinical teaching, and didactic**
1513 **educational events;** ^(Core)
1514
1515 **VI.B.2.b)** **be accomplished without excessive reliance on fellows to**
1516 **fulfill non-physician obligations; and,** ^(Core)
1517

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1518
1519
1520

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1521
1522
1523
1524
1525
1526
1527
1528
1529
1530
1531
1532
1533
1534

VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. (Core)

VI.B.4. Fellows and faculty members must demonstrate an understanding of their personal role in the:

VI.B.4.a) provision of patient- and family-centered care; (Outcome)

VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; (Outcome)

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1535
1536
1537

VI.B.4.c) assurance of their fitness for work, including: (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1538
1539
1540
1541

VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, (Outcome)

- 1542 VI.B.4.c).(2) recognition of impairment, including from illness,
 1543 fatigue, and substance use, in themselves, their peers,
 1544 and other members of the health care team. (Outcome)
 1545
 1546 VI.B.4.d) commitment to lifelong learning; (Outcome)
 1547
 1548 VI.B.4.e) monitoring of their patient care performance improvement
 1549 indicators; and, (Outcome)
 1550
 1551 VI.B.4.f) accurate reporting of clinical and educational work hours,
 1552 patient outcomes, and clinical experience data. (Outcome)
 1553
 1554 VI.B.5. All fellows and faculty members must demonstrate responsiveness
 1555 to patient needs that supersedes self-interest. This includes the
 1556 recognition that under certain circumstances, the best interests of
 1557 the patient may be served by transitioning that patient's care to
 1558 another qualified and rested provider. (Outcome)
 1559
 1560 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
 1561 provide a professional, equitable, respectful, and civil environment
 1562 that is free from discrimination, sexual and other forms of
 1563 harassment, mistreatment, abuse, or coercion of students, fellows,
 1564 faculty, and staff. (Core)
 1565
 1566 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
 1567 have a process for education of fellows and faculty regarding
 1568 unprofessional behavior and a confidential process for reporting,
 1569 investigating, and addressing such concerns. (Core)
 1570
 1571 VI.C. Well-Being
 1572
 1573 *Psychological, emotional, and physical well-being are critical in the*
 1574 *development of the competent, caring, and resilient physician and require*
 1575 *proactive attention to life inside and outside of medicine. Well-being*
 1576 *requires that physicians retain the joy in medicine while managing their*
 1577 *own real life stresses. Self-care and responsibility to support other*
 1578 *members of the health care team are important components of*
 1579 *professionalism; they are also skills that must be modeled, learned, and*
 1580 *nurtured in the context of other aspects of fellowship training.*
 1581
 1582 *Fellows and faculty members are at risk for burnout and depression.*
 1583 *Programs, in partnership with their Sponsoring Institutions, have the same*
 1584 *responsibility to address well-being as other aspects of resident*
 1585 *competence. Physicians and all members of the health care team share*
 1586 *responsibility for the well-being of each other. For example, a culture which*
 1587 *encourages covering for colleagues after an illness without the expectation*
 1588 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
 1589 *clinical learning environment models constructive behaviors, and prepares*
 1590 *fellows with the skills and attitudes needed to thrive throughout their*
 1591 *careers.*
 1592

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1608
1609

- VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:**
- VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; (Core)**
- VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; (Core)**
- VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; (Core)**

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1610
1611
1612
1613

- VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, (Core)**

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1614
1615
1616
1617
1618
1619

- VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. (Core)**

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1620
1621 VI.C.1.e) attention to fellow and faculty member burnout, depression,
1622 and substance abuse. The program, in partnership with its
1623 Sponsoring Institution, must educate faculty members and
1624 fellows in identification of the symptoms of burnout,
1625 depression, and substance abuse, including means to assist
1626 those who experience these conditions. Fellows and faculty
1627 members must also be educated to recognize those
1628 symptoms in themselves and how to seek appropriate care.
1629 The program, in partnership with its Sponsoring Institution,
1630 must: ^(Core)
1631

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1632
1633 VI.C.1.e).(1) encourage fellows and faculty members to alert the
1634 program director or other designated personnel or
1635 programs when they are concerned that another
1636 fellow, resident, or faculty member may be displaying
1637 signs of burnout, depression, substance abuse,
1638 suicidal ideation, or potential for violence; ^(Core)
1639

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1640
1641 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1642 and, ^(Core)
1643
1644 VI.C.1.e).(3) provide access to confidential, affordable mental
1645 health assessment, counseling, and treatment,

1646
1647
1648

including access to urgent and emergent care 24 hours a day, seven days a week. ^(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1649
1650
1651
1652
1653
1654
1655
1656
1657
1658
1659
1660
1661
1662

VI.C.2. There are circumstances in which fellows may be unable to attend work, including but not limited to fatigue, illness, family emergencies, and parental leave. Each program must allow an appropriate length of absence for fellows unable to perform their patient care responsibilities. ^(Core)

VI.C.2.a) The program must have policies and procedures in place to ensure coverage of patient care. ^(Core)

VI.C.2.b) These policies must be implemented without fear of negative consequences for the fellow who is or was unable to provide the clinical work. ^(Core)

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

VI.D. Fatigue Mitigation

VI.D.1. Programs must:

VI.D.1.a) educate all faculty members and fellows to recognize the signs of fatigue and sleep deprivation; ^(Core)

VI.D.1.b) educate all faculty members and fellows in alertness management and fatigue mitigation processes; and, ^(Core)

VI.D.1.c) encourage fellows to use fatigue mitigation processes to manage the potential negative effects of fatigue on patient care and learning. ^(Detail)

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation

processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

VI.D.2. Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2–VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue. *(Core)*

VI.D.3. The program, in partnership with its Sponsoring Institution, must ensure adequate sleep facilities and safe transportation options for fellows who may be too fatigued to safely return home. *(Core)*

VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care

VI.E.1. Clinical Responsibilities

The clinical responsibilities for each fellow must be based on PGY level, patient safety, fellow ability, severity and complexity of patient illness/condition, and available support services. *(Core)*

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

VI.E.2. Teamwork

Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system. *(Core)*

VI.E.2.a) Genetic counselors, laboratory directors, metabolic dietitians, nurses, and technologists must be part of interprofessional teams. *(Core)*

- 1709 VI.E.2.a).(1) Other providers and allied health professionals, such as
 1710 pediatricians and social workers, should be part of
 1711 interprofessional teams. ^(Core)
 1712
- 1713 **VI.E.3. Transitions of Care**
 1714
- 1715 **VI.E.3.a) Programs must design clinical assignments to optimize**
 1716 **transitions in patient care, including their safety, frequency,**
 1717 **and structure. ^(Core)**
 1718
- 1719 **VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,**
 1720 **must ensure and monitor effective, structured hand-over**
 1721 **processes to facilitate both continuity of care and patient**
 1722 **safety. ^(Core)**
 1723
- 1724 **VI.E.3.c) Programs must ensure that fellows are competent in**
 1725 **communicating with team members in the hand-over process.**
 1726 **^(Outcome)**
 1727
- 1728 **VI.E.3.d) Programs and clinical sites must maintain and communicate**
 1729 **schedules of attending physicians and fellows currently**
 1730 **responsible for care. ^(Core)**
 1731
- 1732 **VI.E.3.e) Each program must ensure continuity of patient care,**
 1733 **consistent with the program’s policies and procedures**
 1734 **referenced in VI.C.2-VI.C.2.b), in the event that a fellow may**
 1735 **be unable to perform their patient care responsibilities due to**
 1736 **excessive fatigue or illness, or family emergency. ^(Core)**
 1737
- 1738 **VI.F. Clinical Experience and Education**
 1739
 1740 *Programs, in partnership with their Sponsoring Institutions, must design*
 1741 *an effective program structure that is configured to provide fellows with*
 1742 *educational and clinical experience opportunities, as well as reasonable*
 1743 *opportunities for rest and personal activities.*
 1744

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

- 1745
- 1746 **VI.F.1. Maximum Hours of Clinical and Educational Work per Week**
 1747
 1748 **Clinical and educational work hours must be limited to no more than**
 1749 **80 hours per week, averaged over a four-week period, inclusive of all**
 1750 **in-house clinical and educational activities, clinical work done from**
 1751 **home, and all moonlighting. ^(Core)**
 1752

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the

accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)

VI.F.2.b).(1) There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1771
1772
1773
1774

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. ^(Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1775
1776
1777
1778
1779

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. ^(Core)

1780

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows’ preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a “golden weekend,” meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

1795

- VI.F.3. Maximum Clinical Work and Education Period Length**
- VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. (Core)**
- VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. (Core)**
- VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. (Core)**

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- VI.F.4. Clinical and Educational Work Hour Exceptions**
- VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:**
- VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; (Detail)**
- VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, (Detail)**

1810 VI.F.4.a).(3) to attend unique educational events. (Detail)

1811
1812 VI.F.4.b) These additional hours of care or education will be counted
1813 toward the 80-hour weekly limit. (Detail)

1814

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1815
1816 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
1817 for up to 10 percent or a maximum of 88 clinical and
1818 educational work hours to individual programs based on a
1819 sound educational rationale.

1820
1821 The Review Committee for Medical Genetics and Genomics will
1822 not consider requests for exceptions to the 80-hour limit to the
1823 residents' work week.

1824
1825 VI.F.4.c).(1) In preparing a request for an exception, the program
1826 director must follow the clinical and educational work
1827 hour exception policy from the *ACGME Manual of*
1828 *Policies and Procedures.* (Core)

1829
1830 VI.F.4.c).(2) Prior to submitting the request to the Review
1831 Committee, the program director must obtain approval
1832 from the Sponsoring Institution's GMEC and DIO. (Core)

1833

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

1834
1835 VI.F.5. Moonlighting

1836
1837 VI.F.5.a) Moonlighting must not interfere with the ability of the fellow
1838 to achieve the goals and objectives of the educational
1839 program, and must not interfere with the fellow's fitness for
1840 work nor compromise patient safety. (Core)

1842 VI.F.5.b) Time spent by fellows in internal and external moonlighting
1843 (as defined in the ACGME Glossary of Terms) must be
1844 counted toward the 80-hour maximum weekly limit. ^(Core)
1845

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1846
1847 VI.F.6. In-House Night Float
1848
1849 Night float must occur within the context of the 80-hour and one-
1850 day-off-in-seven requirements. ^(Core)
1851

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

1852
1853 VI.F.7. Maximum In-House On-Call Frequency
1854
1855 Fellows must be scheduled for in-house call no more frequently than
1856 every third night (when averaged over a four-week period). ^(Core)
1857

1858 VI.F.8. At-Home Call
1859

1860 VI.F.8.a) Time spent on patient care activities by fellows on at-home
1861 call must count toward the 80-hour maximum weekly limit.
1862 The frequency of at-home call is not subject to the every-
1863 third-night limitation, but must satisfy the requirement for one
1864 day in seven free of clinical work and education, when
1865 averaged over four weeks. ^(Core)
1866

1867 VI.F.8.a).(1) At-home call must not be so frequent or taxing as to
1868 preclude rest or reasonable personal time for each
1869 fellow. ^(Core)
1870

1871 VI.F.8.b) Fellows are permitted to return to the hospital while on at-
1872 home call to provide direct care for new or established
1873 patients. These hours of inpatient patient care must be
1874 included in the 80-hour maximum weekly limit. ^(Detail)
1875

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
