1 Proposed ACGME Program Requirements for Graduate Medical Education
2 in Abdominal Radiology

3
4 Common Program Requirements (Fellowship) are in BOLD

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 Introduction

12
13 **Int.A. *Fellowship is advanced graduate medical education beyond a core***
14 ***residency program for physicians who desire to enter more specialized***
15 ***practice. Fellowship-trained physicians serve the public by providing***
16 ***subspecialty care, which may also include core medical care, acting as a***
17 ***community resource for expertise in their field, creating and integrating***
18 ***new knowledge into practice, and educating future generations of***
19 ***physicians. Graduate medical education values the strength that a diverse***
20 ***group of physicians brings to medical care.***

21
22 ***Fellows who have completed residency are able to practice independently***
23 ***in their core specialty. The prior medical experience and expertise of***
24 ***fellows distinguish them from physicians entering into residency training.***
25 ***The fellow's care of patients within the subspecialty is undertaken with***
26 ***appropriate faculty supervision and conditional independence. Faculty***
27 ***members serve as role models of excellence, compassion,***
28 ***professionalism, and scholarship. The fellow develops deep medical***
29 ***knowledge, patient care skills, and expertise applicable to their focused***
30 ***area of practice. Fellowship is an intensive program of subspecialty clinical***
31 ***and didactic education that focuses on the multidisciplinary care of***
32 ***patients. Fellowship education is often physically, emotionally, and***
33 ***intellectually demanding, and occurs in a variety of clinical learning***
34 ***environments committed to graduate medical education and the well-being***
35 ***of patients, residents, fellows, faculty members, students, and all members***
36 ***of the health care team.***

37
38 ***In addition to clinical education, many fellowship programs advance***
39 ***fellows' skills as physician-scientists. While the ability to create new***
40 ***knowledge within medicine is not exclusive to fellowship-educated***
41 ***physicians, the fellowship experience expands a physician's abilities to***
42 ***pursue hypothesis-driven scientific inquiry that results in contributions to***
43 ***the medical literature and patient care. Beyond the clinical subspecialty***
44 ***expertise achieved, fellows develop mentored relationships built on an***
45 ***infrastructure that promotes collaborative research.***

46
47 **Int.B. Definition of Subspecialty**

48
49 Int.B.1. Diagnostic radiology subspecialty fellowship programs are designed to
50 develop advanced knowledge and skills in a specific clinical area. The
51 program design and/or structure must be approved by the Review
52 Committee as part of the regular review process.
53

54 Int.B.2. Abdominal radiology constitutes the application and interpretation of
55 conventional techniques and procedures as they apply to diseases
56 involving the gastrointestinal tract, genitourinary tract, and the
57 intraperitoneal and extra peritoneal abdominal organs. These techniques
58 and procedures include computed tomography (CT), ultrasonography,
59 magnetic resonance imaging (MRI), nuclear medicine, and fluoroscopy.
60

61 Int.B.3. The program must substantially enhance fellows' knowledge of all forms
62 of diagnostic imaging and interventional techniques as they apply to the
63 unique clinical and pathophysiologic problems encountered in diseases
64 affecting the gastrointestinal and genitourinary systems. Fellows should
65 have education in normal and pathologic anatomy and physiology of
66 gastrointestinal and genitourinary disease. The program should be
67 structured to develop expertise in the appropriate application of all forms
68 of diagnostic imaging and interventions to problems of the abdomen and
69 pelvis.
70

71 **Int.C. Length of Educational Program**
72

73 The educational program in abdominal diagnostic radiology subspecialties must
74 be at least 12 months in length. ^{(Core)*}
75

76 **I. Oversight**
77

78 **I.A. Sponsoring Institution**
79

80 *The Sponsoring Institution is the organization or entity that assumes the*
81 *ultimate financial and academic responsibility for a program of graduate*
82 *medical education consistent with the ACGME Institutional Requirements.*
83

84 *When the Sponsoring Institution is not a rotation site for the program, the*
85 *most commonly utilized site of clinical activity for the program is the*
86 *primary clinical site.*
87

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

88

- 89 I.A.1. The program must be sponsored by one ACGME-accredited
90 Sponsoring Institution. ^(Core)
91
- 92 I.B. Participating Sites
93
94 *A participating site is an organization providing educational experiences or*
95 *educational assignments/rotations for fellows.*
96
- 97 I.B.1. The program, with approval of its Sponsoring Institution, must
98 designate a primary clinical site. ^(Core)
99
- 100 I.B.1.a) ~~Close cooperation between the fellowship and residency program~~
101 ~~directors is required. The Sponsoring Institution must also sponsor~~
102 an ACGME-accredited program in diagnostic radiology. ^(Core)
103
- 104 I.B.1.b) There should be ~~an~~ ACGME-accredited ~~residency~~ residencies or
105 subspecialty programs available in gastroenterology, general
106 surgery, gastroenterology, obstetrics and gynecology, oncology,
107 pathology, and urology, gynecology, and pathology at the primary
108 clinical site. ^(Core)
109
- 110 I.B.2. There must be a program letter of agreement (PLA) between the
111 program and each participating site that governs the relationship
112 between the program and the participating site providing a required
113 assignment. ^(Core)
114
- 115 I.B.2.a) The PLA must:
116
- 117 I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)
118
- 119 I.B.2.a).(2) be approved by the designated institutional official
120 (DIO). ^(Core)
121
- 122 I.B.3. The program must monitor the clinical learning and working
123 environment at all participating sites. ^(Core)
124
- 125 I.B.3.a) At each participating site there must be one faculty member,
126 designated by the program director, who is accountable for
127 fellow education for that site, in collaboration with the
128 program director. ^(Core)
129

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

133
134
135
136
137
138
139
140
141

I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the ACGME's Accreditation Data System (ADS). ^(Core)

I.C. The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. ^(Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

160
161
162
163

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. ^(Core)

I.D.1.a) There must be adequate office space for abdominal radiology faculty members, program administration, and fellows. ^(Core)

I.D.1.b) The program must have appropriate facilities and space for the education of the fellows. ^(Core)

I.D.1.b).(1) There must be adequate study space, conference space, and access to computers. ^{(CoreDetail)†}

I.D.1.b).(2) Adequate space for image display, interpretation, and consultation with clinicians and referring physicians must be available. ^(Core)

I.D.1.c) All related equipment required for abdominal radiology education must be state-of-the-art and available. ^(Core)

164
165 I.D.1.d) ~~Modern imaging equipment and adequate space must be~~
166 ~~available to accomplish the overall educational program in~~
167 ~~abdominal radiology. There must be state-of-the-art equipment for~~
168 ~~conventional radiography, digital fluoroscopy, computed~~
169 ~~tomography, ultrasonography, nuclear medicine, and magnetic~~
170 ~~resonance imaging. Adequate laboratory and pathology services~~
171 ~~must be available adequate to support the educational experience~~
172 ~~in abdominal radiology. Adequate areas for display of images,~~
173 ~~interpretation of images, and consultation with clinicians must be~~
174 ~~available.~~ (Core)

175
176 I.D.2. **The program, in partnership with its Sponsoring Institution, must**
177 **ensure healthy and safe learning and working environments that**
178 **promote fellow well-being and provide for:** (Core)

179
180 I.D.2.a) **access to food while on duty;** (Core)

181
182 I.D.2.b) **safe, quiet, clean, and private sleep/rest facilities available**
183 **and accessible for fellows with proximity appropriate for safe**
184 **patient care;** (Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

186
187 I.D.2.c) **clean and private facilities for lactation that have refrigeration**
188 **capabilities, with proximity appropriate for safe patient care;**
189 (Core)

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

191
192 I.D.2.d) **security and safety measures appropriate to the participating**
193 **site; and,** (Core)

194
195 I.D.2.e) **accommodations for fellows with disabilities consistent with**
196 **the Sponsoring Institution's policy.** (Core)

197

198 I.D.3. Fellows must have ready access to subspecialty-specific and other
199 appropriate reference material in print or electronic format. This
200 must include access to electronic medical literature databases with
201 full text capabilities. (Core)
202

203 I.D.4. The program's educational and clinical resources must be adequate
204 to support the number of fellows appointed to the program. (Core)
205

206 I.D.4.a) The program must ensure there are ~~Fellows must have an~~
207 ~~adequate volume and variety of imaging studies and image-~~
208 ~~guided invasive procedures available for the fellows' education,~~
209 ~~and must be provided instruction in their indications, appropriate~~
210 ~~utilization, risks, and alternatives.~~ (Core)
211

212 I.E. *A fellowship program usually occurs in the context of many learners and*
213 *other care providers and limited clinical resources. It should be structured*
214 *to optimize education for all learners present.*
215

216 I.E.1. Fellows should contribute to the education of residents in core
217 programs, if present. (Core)
218

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

219
220 I.E.2. ~~The presence of other learners (including residents from other specialties,~~
221 ~~subspecialty fellows, PhD students, and nurse practitioners) in the~~
222 ~~program must not interfere with the appointed fellows' education.~~ (Detail)
223

224 I.E.3. The fellows must not dilute or detract from the educational opportunities
225 available to residents in the core diagnostic radiology residency program.
226 (CoreDetail)
227

228 I.E.4. Lines of responsibilities for the diagnostic radiology residents and the
229 abdominal radiology ~~subspecialty~~-fellows must be clearly defined. (Core)
230

Specialty-Specific Background and Intent: A close relationship and interaction between the fellowship program and the diagnostic radiology residency program will be essential in the management and oversight of the clinical environment to prevent dilution of education or training opportunities for either the fellows or residents.

231
232 II. Personnel
233

234 II.A. Program Director
235

236 II.A.1. There must be one faculty member appointed as program director
237 with authority and accountability for the overall program, including
238 compliance with all applicable program requirements. (Core)

239
240 II.A.1.a) The Sponsoring Institution’s Graduate Medical Education
241 Committee (GMEC) must approve a change in program
242 director. (Core)

243
244 II.A.1.b) Final approval of the program director resides with the
245 Review Committee. (Core)

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual’s responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director’s nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

247
248 II.A.2. The program director must be provided with support adequate for
249 administration of the program based upon its size and configuration.
250 (Core)

251
252 II.A.2.a) At a minimum, the program director must be provided with the
253 salary support required to devote 10 percent FTE of non-clinical
254 time to the administration of the program. Additional support must
255 be provided based on the program size as follows: (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE</u>
<u>1-4</u>	<u>0.1</u>
<u>5-7</u>	<u>0.2</u>
<u>8 or more</u>	<u>0.3</u>

257
Background and Intent: Ten percent FTE is defined as one half day per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

258
259 II.A.3. Qualifications of the program director:

260
261 II.A.3.a) must include subspecialty expertise and qualifications
262 acceptable to the Review Committee; (Core)

263
264 II.A.3.a).(1) post-residency experience in abdominal radiology ~~the~~
265 ~~subspecialty~~ area, including fellowship education and

266 training, or five years of ~~practice experience~~ in the
267 subspecialty ~~for those subspecialties in which no~~
268 ~~certification is offered;~~ ^(Core)

269
270 II.A.3.a).(2) experience as an educator and supervisor of fellows in
271 abdominal radiology; and, ^(Core)

272
273 II.A.3.a).(3) at least three years' experience as a faculty member in an
274 ACGME-accredited or AOA-approved diagnostic radiology
275 or interventional radiology residency, or abdominal
276 radiology fellowship program. ^(Core)

277
278 **II.A.3.b) must include current certification in the specialty by the**
279 **American Board of Radiology or by the American Osteopathic**
280 **Board of Radiology, or subspecialty qualifications that are**
281 **acceptable to the Review Committee; and,** ^(Core)

282
283 [Note that while the Common Program Requirements deem
284 certification by a certifying board of the American Board of Medical
285 Specialties (ABMS) or the American Osteopathic Association
286 (AOA) acceptable, there is no ABMS or AOA board that offers
287 certification in this subspecialty]

288
289 II.A.3.c) ~~must include devotion of at least 80% of his/her professional time~~
290 ~~in abdominal radiology, and devote sufficient time to fulfill all~~
291 ~~responsibilities inherent to meeting the educational goals of the~~
292 ~~program.~~ ^(Detail) must include devotion of at least 80 percent of
293 professional time in abdominal radiology, and devotion of
294 sufficient time to fulfill all responsibilities inherent to meeting the
295 educational goals of the program. ^(Core)

296
297 **II.A.4. Program Director Responsibilities**

298
299 **The program director must have responsibility, authority, and**
300 **accountability for: administration and operations; teaching and**
301 **scholarly activity; fellow recruitment and selection, evaluation, and**
302 **promotion of fellows, and disciplinary action; supervision of fellows;**
303 **and fellow education in the context of patient care.** ^(Core)

304
305 **II.A.4.a) The program director must:**

306
307 **II.A.4.a).(1) be a role model of professionalism;** ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

309
310 **II.A.4.a).(2)** design and conduct the program in a fashion
311 consistent with the needs of the community, the
312 mission(s) of the Sponsoring Institution, and the
313 mission(s) of the program; ^(Core)
314

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

315
316 **II.A.4.a).(3)** administer and maintain a learning environment
317 conducive to educating the fellows in each of the
318 ACGME Competency domains; ^(Core)
319

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

320
321 **II.A.4.a).(4)** develop and oversee a process to evaluate candidates
322 prior to approval as program faculty members for
323 participation in the fellowship program education and
324 at least annually thereafter, as outlined in V.B.; ^(Core)
325

326 **II.A.4.a).(5)** have the authority to approve program faculty
327 members for participation in the fellowship program
328 education at all sites; ^(Core)
329

330 **II.A.4.a).(6)** have the authority to remove program faculty
331 members from participation in the fellowship program
332 education at all sites; ^(Core)
333

334 **II.A.4.a).(7)** have the authority to remove fellows from supervising
335 interactions and/or learning environments that do not
336 meet the standards of the program; ^(Core)
337

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

338

- 339 **II.A.4.a).(8)** submit accurate and complete information required
340 and requested by the DIO, GMEC, and ACGME; ^(Core)
341
- 342 **II.A.4.a).(9)** provide applicants who are offered an interview with
343 information related to the applicant's eligibility for the
344 relevant subspecialty board examination(s); ^(Core)
345
- 346 **II.A.4.a).(10)** provide a learning and working environment in which
347 fellows have the opportunity to raise concerns and
348 provide feedback in a confidential manner as
349 appropriate, without fear of intimidation or retaliation;
350 ^(Core)
351
- 352 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring
353 Institution's policies and procedures related to
354 grievances and due process; ^(Core)
355
- 356 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring
357 Institution's policies and procedures for due process
358 when action is taken to suspend or dismiss, not to
359 promote, or not to renew the appointment of a fellow;
360 ^(Core)
361

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- 362
- 363 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring
364 Institution's policies and procedures on employment
365 and non-discrimination; ^(Core)
366
- 367 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-
368 competition guarantee or restrictive covenant.
369 ^(Core)
370
- 371 **II.A.4.a).(14)** document verification of program completion for all
372 graduating fellows within 30 days; ^(Core)
373
- 374 **II.A.4.a).(15)** provide verification of an individual fellow's
375 completion upon the fellow's request, within 30 days;
376 and, ^(Core)
377

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

378

379 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
380 Institution’s DIO before submitting information or
381 requests to the ACGME, as required in the Institutional
382 Requirements and outlined in the ACGME Program
383 Director’s Guide to the Common Program
384 Requirements. ^(Core)
385

386 **II.B. Faculty**

387
388 *Faculty members are a foundational element of graduate medical education*
389 *– faculty members teach fellows how to care for patients. Faculty members*
390 *provide an important bridge allowing fellows to grow and become practice*
391 *ready, ensuring that patients receive the highest quality of care. They are*
392 *role models for future generations of physicians by demonstrating*
393 *compassion, commitment to excellence in teaching and patient care,*
394 *professionalism, and a dedication to lifelong learning. Faculty members*
395 *experience the pride and joy of fostering the growth and development of*
396 *future colleagues. The care they provide is enhanced by the opportunity to*
397 *teach. By employing a scholarly approach to patient care, faculty members,*
398 *through the graduate medical education system, improve the health of the*
399 *individual and the population.*

400
401 *Faculty members ensure that patients receive the level of care expected*
402 *from a specialist in the field. They recognize and respond to the needs of*
403 *the patients, fellows, community, and institution. Faculty members provide*
404 *appropriate levels of supervision to promote patient safety. Faculty*
405 *members create an effective learning environment by acting in a*
406 *professional manner and attending to the well-being of the fellows and*
407 *themselves.*
408

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

409
410 **II.B.1. For each participating site, there must be a sufficient number of**
411 **faculty members with competence to instruct and supervise all**
412 **fellows at that location. ^(Core)**
413

414 **II.B.1.a)** ~~At a minimum, the program faculty must have two FTE faculty~~
415 ~~members dedicated to the program, including the program~~
416 ~~director. ^(Core)~~
417

418 **II.B.1.b)** ~~To ensure adequate supervision and evaluation of the fellows’~~
419 ~~academic progress, the faculty/fellow ratio should not be less than~~
420 ~~one faculty member to each fellow. To ensure adequate teaching,~~
421 ~~supervision, and evaluation of the fellows’ academic progress,~~
422 ~~there must be a ratio of at least one full-time faculty member for~~
423 ~~every fellow in the program. ^(Core)~~
424

425 **II.B.1.b).(1)** ~~Although it is desirable that abdominal radiologists~~
426 ~~supervise special imaging such as computed tomography,~~

427 ultrasonography, and magnetic resonance imaging, in
428 instances where they are not expert in a special imaging
429 technique, other radiologists who are specialists in these
430 areas must be part-time members of the abdominal
431 radiology faculty. ^(Detail)
432

433 **II.B.2. Faculty members must:**

434 **II.B.2.a) be role models of professionalism;** ^(Core)

435 **II.B.2.b) demonstrate commitment to the delivery of safe, quality,**
436 **cost-effective, patient-centered care;** ^(Core)
437
438
439

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

440 **II.B.2.c) demonstrate a strong interest in the education of fellows;** ^(Core)

441 **II.B.2.d) devote sufficient time to the educational program to fulfill**
442 **their supervisory and teaching responsibilities;** ^(Core)
443
444

445 **II.B.2.e) administer and maintain an educational environment**
446 **conducive to educating fellows;** ^(Core)
447
448

449 **II.B.2.f) regularly participate in organized clinical discussions,**
450 **rounds, journal clubs, and conferences;** ^(Core)
451

452 **II.B.2.g) pursue faculty development designed to enhance their skills**
453 **at least annually; and,** ^(Core)
454

455 **II.B.2.h) provide didactic teaching and supervision of the fellows'**
456 **performance and interpretation of all abdominal imaging**
457 **procedures.** ^(Core)
458

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

459 **II.B.3. Faculty Qualifications**

460 **II.B.3.a) Faculty members must have appropriate qualifications in**
461 **their field and hold appropriate institutional appointments.**
462 ^(Core)
463
464
465

466 **II.B.3.b) Subspecialty physician faculty members must:**
467
468 **II.B.3.b).(1) have current certification in the specialty by the**
469 **American Board of Radiology or the American**
470 **Osteopathic Board of Radiology, or possess**
471 **qualifications judged acceptable to the Review**
472 **Committee; and, ^(Core)**

473
474 [Note that while the Common Program Requirements
475 deem certification by a certifying board of the American
476 Board of Medical Specialties (ABMS) or the American
477 Osteopathic Association (AOA) acceptable, there is no
478 ABMS or AOA board that offers certification in this
479 subspecialty]

480
481 **II.B.3.b).(2) have post-residency experience in abdominal radiology,**
482 **including fellowship education. ^(Core)**

483
484 **II.B.3.c) Any non-physician faculty members who participate in**
485 **fellowship program education must be approved by the**
486 **program director. ^(Core)**
487

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

488
489 **II.B.3.d) Any other specialty physician faculty members must have**
490 **current certification in their specialty by the appropriate**
491 **American Board of Medical Specialties (ABMS) member**
492 **board or American Osteopathic Association (AOA) certifying**
493 **board, or possess qualifications judged acceptable to the**
494 **Review Committee. ^(Core)**

495
496 **II.B.4. Core Faculty**

497
498 **Core faculty members must have a significant role in the education**
499 **and supervision of fellows and must devote a significant portion of**
500 **their entire effort to fellow education and/or administration, and**
501 **must, as a component of their activities, teach, evaluate, and provide**
502 **formative feedback to fellows. ^(Core)**
503

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their

broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

504
505
506
507
508
509
510
511
512
513
514
515
516
517
518
519
520
521
522
523

- II.B.4.a) Core faculty members must be designated by the program director.** (Core)
- II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey.** (Core)
- II.B.4.c) The abdominal radiology faculty must have a minimum of two FTE core faculty members, which must include the program director and at least one other full-time radiologist specializing in abdominal radiology.** (Core)
- II.C. Program Coordinator**
- II.C.1. There must be a program coordinator.** (Core)
- II.C.2. The program coordinator must be provided with support adequate for administration of the program based upon its size and configuration.** (Core)

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

524
525
526
527
528
529
530

- II.D. Other Program Personnel**
- The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program.** (Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

531
532 **III. Fellow Appointments**

533
534 **III.A. Eligibility Criteria**

535
536 **III.A.1. Eligibility Requirements – Fellowship Programs**

537
538 **All required clinical education for entry into ACGME-accredited**
539 **fellowship programs must be completed in an ACGME-accredited**
540 **residency program, an AOA-approved residency program, a**
541 **program with ACGME International (ACGME-I) Advanced Specialty**
542 **Accreditation, or a Royal College of Physicians and Surgeons of**
543 **Canada (RCPSC)-accredited or College of Family Physicians of**
544 **Canada (CFPC)-accredited residency program located in Canada.**
545 **(Core)**

546

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

547
548 **III.A.1.a) Fellowship programs must receive verification of each**
549 **entering fellow’s level of competence in the required field,**
550 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
551 **Milestones evaluations from the core residency program. (Core)**

552
553 **III.A.1.b) Prerequisite experience-training for entry into a diagnostic**
554 **~~radiology subspecialty~~ the fellowship program should include the**
555 **satisfactory completion of a diagnostic radiology or interventional**
556 **radiology residency program that satisfies the requirements in**
557 **III.A.1. (Core)**

558
559 **III.A.1.c) Fellow Eligibility Exception**

560
561 **The Review Committee for Radiology will allow the following**
562 **exception to the fellowship eligibility requirements:**

563
564 **III.A.1.c).(1) An ACGME-accredited fellowship program may accept**
565 **an exceptionally qualified international graduate**
566 **applicant who does not satisfy the eligibility**
567 **requirements listed in III.A.1., but who does meet all of**
568 **the following additional qualifications and conditions:**
569 **(Core)**

570
571 **III.A.1.c).(1).(a) evaluation by the program director and**
572 **fellowship selection committee of the**
573 **applicant’s suitability to enter the program,**

- 574 based on prior training and review of the
 575 summative evaluations of training in the core
 576 specialty; and, ^(Core)
 577
 578 **III.A.1.c).(1).(b)** review and approval of the applicant’s
 579 exceptional qualifications by the GMEC; and,
 580 ^(Core)
 581
 582 **III.A.1.c).(1).(c)** verification of Educational Commission for
 583 Foreign Medical Graduates (ECFMG)
 584 certification. ^(Core)
 585
 586 **III.A.1.c).(2)** Applicants accepted through this exception must have
 587 an evaluation of their performance by the Clinical
 588 Competency Committee within 12 weeks of
 589 matriculation. ^(Core)
 590

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

- 591
 592 **III.B.** The program director must not appoint more fellows than approved by the
 593 Review Committee. ^(Core)
 594
 595 **III.B.1.** All complement increases must be approved by the Review
 596 Committee. ^(Core)
 597
 598 **III.B.1.a)** The total number of fellows in the program must be
 599 commensurate with the capacity of the program to offer an
 600 adequate educational experience in abdominal radiology. ^(Core)
 601
 602 ~~III.B.1.a).(1) The minimum number of fellows need not be greater than~~
 603 ~~one, but at least two fellows are desirable. ^(Detail)~~
 604
 605 **III.C.** Fellow Transfers
 606
 607 The program must obtain verification of previous educational experiences
 608 and a summative competency-based performance evaluation prior to

609 acceptance of a transferring fellow, and Milestones evaluations upon
610 matriculation. ^(Core)

611
612 **IV. Educational Program**

613
614 *The ACGME accreditation system is designed to encourage excellence and*
615 *innovation in graduate medical education regardless of the organizational*
616 *affiliation, size, or location of the program.*

617
618 *The educational program must support the development of knowledgeable, skillful*
619 *physicians who provide compassionate care.*

620
621 *In addition, the program is expected to define its specific program aims consistent*
622 *with the overall mission of its Sponsoring Institution, the needs of the community*
623 *it serves and that its graduates will serve, and the distinctive capabilities of*
624 *physicians it intends to graduate. While programs must demonstrate substantial*
625 *compliance with the Common and subspecialty-specific Program Requirements, it*
626 *is recognized that within this framework, programs may place different emphasis*
627 *on research, leadership, public health, etc. It is expected that the program aims*
628 *will reflect the nuanced program-specific goals for it and its graduates; for*
629 *example, it is expected that a program aiming to prepare physician-scientists will*
630 *have a different curriculum from one focusing on community health.*

631
632 **IV.A. The curriculum must contain the following educational components:** ^(Core)

633
634 **IV.A.1. a set of program aims consistent with the Sponsoring Institution’s**
635 **mission, the needs of the community it serves, and the desired**
636 **distinctive capabilities of its graduates;** ^(Core)

637
638 **IV.A.1.a) The program’s aims must be made available to program**
639 **applicants, fellows, and faculty members.** ^(Core)

640
641 **IV.A.2. competency-based goals and objectives for each educational**
642 **experience designed to promote progress on a trajectory to**
643 **autonomous practice in their subspecialty. These must be**
644 **distributed, reviewed, and available to fellows and faculty members;**
645 ^(Core)

646
647 **IV.A.3. delineation of fellow responsibilities for patient care, progressive**
648 **responsibility for patient management, and graded supervision in**
649 **their subspecialty;** ^(Core)

650

<p>Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.</p>

651
652 **IV.A.4. structured educational activities beyond direct patient care; and,**
653 ^(Core)

654

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

655

IV.A.5. advancement of fellows' knowledge of ethical principles
foundational to medical professionalism. *(Core)*

656

657

658

659

660

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

661

IV.B.1. The program must integrate the following ACGME Competencies
into the curriculum: *(Core)*

662

663

664

IV.B.1.a) Professionalism

665

666

667

Fellows must demonstrate a commitment to professionalism
and an adherence to ethical principles. *(Core)*

668

669

IV.B.1.b) Patient Care and Procedural Skills

670

671

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

672

IV.B.1.b).(1) Fellows must be able to provide patient care that is
compassionate, appropriate, and effective for the
treatment of health problems and the promotion of
health. *(Core)*

673

674

675

676

677

IV.B.1.b).(1).(a) Fellows must demonstrate competence in
providing consultation with referring physicians or

742		if formal responsibility for performing the
743		procedures may not be part of the program. ^(Core)
744		
745	IV.B.1.b).(2)	Fellows must be able to perform all medical,
746		diagnostic, and surgical procedures considered
747		essential for the area of practice. ^(Core)
748		
749	IV.B.1.b).(2).(a)	Fellows must <u>demonstrate competence in applying</u>
750		low dose radiation techniques for both adults and
751		children. ^(Core)
752		
753	IV.B.1.b).(2).(b)	Fellows must <u>demonstrate competence in the</u>
754		<u>performance of</u> all specified exams and/or invasive
755		studies under close, graded responsibility and
756		supervision. ^(Core)
757		
758	IV.B.1.c)	Medical Knowledge
759		
760		Fellows must demonstrate knowledge of established and
761		evolving biomedical, clinical, epidemiological and social-
762		behavioral sciences, as well as the application of this
763		knowledge to patient care. ^(Core)
764		
765	IV.B.1.c).(1)	Fellows must demonstrate a level of expertise in the
766		knowledge of those areas appropriate for an <u>abdominal</u>
767		radiology specialist. ^(Core)
768		
769	IV.B.1.c).(2)	<u>Fellows must demonstrate knowledge and understanding</u>
770		<u>of the indications and complications of percutaneous</u>
771		<u>nephrostomy, and transhepatic cholangiography, tumor</u>
772		<u>embolization, and percutaneous ablation. ^(Core)</u>
773		
774	IV.B.1.c).(3)	<u>Fellows must demonstrate knowledge and understanding</u>
775		<u>of the indications, performance, and interpretation of</u>
776		<u>positron emission tomography (PET) and PET/CT in</u>
777		<u>relation to abdominal disease. ^(Core)</u>
778		
779	IV.B.1.c).(4)	Fellows must demonstrate knowledge of low dose radiation
780		techniques for both adults and children. ^(Core)
781		

782 IV.B.1.c).(5) Fellows must demonstrate knowledge of the prevention
783 and/or treatment of complications of contrast
784 administration. (Core)
785

786 IV.B.1.c).(6) Fellows should ~~develop~~ demonstrate knowledge and skills
787 in preparing and presenting educational material for
788 medical students, graduate medical staff members, and
789 allied health personnel. (Core)
790

791 **IV.B.1.d) Practice-based Learning and Improvement**
792

793 **Fellows must demonstrate the ability to investigate and**
794 **evaluate their care of patients, to appraise and assimilate**
795 **scientific evidence, and to continuously improve patient care**
796 **based on constant self-evaluation and lifelong learning.** (Core)
797

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

798
799 **IV.B.1.e) Interpersonal and Communication Skills**
800

801 **Fellows must demonstrate interpersonal and communication**
802 **skills that result in the effective exchange of information and**
803 **collaboration with patients, their families, and health**
804 **professionals.** (Core)
805

806 **IV.B.1.f) Systems-based Practice**
807

808 **Fellows must demonstrate an awareness of and**
809 **responsiveness to the larger context and system of health**
810 **care, including the social determinants of health, as well as**
811 **the ability to call effectively on other resources to provide**
812 **optimal health care.** (Core)
813

814 **IV.C. Curriculum Organization and Fellow Experiences**
815

816 **IV.C.1. The curriculum must be structured to optimize fellow educational**
817 **experiences, the length of these experiences, and supervisory**
818 **continuity.** (Core)
819

820 IV.C.1.a) The assignment of educational experiences should be structured
821 to minimize the frequency of transitions. (Detail)
822

823 IV.C.1.b) Educational experiences should be of sufficient length to provide a
824 quality educational experience defined by ongoing supervision,

- 825 longitudinal relationships with faculty members, and high-quality
 826 assessment and feedback. ^(Detail)
 827
 828 **IV.C.2. The program must provide instruction and experience in pain**
 829 **management if applicable for the subspecialty, including recognition**
 830 **of the signs of addiction.** ^(Core)
 831
 832 **IV.C.3. Didactic Experiences**

 871

871 IV.C.3.d).(1) Participation in local or national subspecialty societies
872 should be encouraged. Reasonable expenses should be
873 reimbursed. ^(Detail)
874

Specialty-Specific Background and Intent: When possible, fellow participation in local or national subspecialty societies should be encouraged, and reimbursement of reasonable expenses considered.

875
876 IV.C.4. Fellow Experiences

877
878 IV.C.4.a) The program must provide the fellows a structured learning
879 experience designed to develop expertise in the appropriate
880 application of all forms of diagnostic imaging and interventions to
881 problems of the abdomen and pelvis. ^(Core)
882

883 IV.C.4.b) Fellows must have both clinical and didactic experiences that
884 encompass the full breadth spectrum of abdominal diseases and
885 their pathophysiology. ^(Core) [Moved from IV.C.3.]
886

887 IV.C.4.b).(1) This experience must include uncommon problems
888 involving the gastrointestinal tract, genitourinary tract, and
889 abdomen. ^(Core Detail) [Moved from IV.C.3.a)]
890

891
892 IV.C.4.c) Fellows must have daily image interpretation sessions, under
893 faculty review and critique, in which fellows reach their own
894 diagnostic conclusions. ^(Core) [Moved from IV.B.1.c).(5)]
895

896 IV.C.4.d) All fellows must maintain a procedure log and record their
897 involvement in both diagnostic and invasive cases. ^(Core)
898

899 IV.C.4.e) Fellows should be instructed in the indications, risks, limitations,
900 alternatives, and appropriate utilization of imaging and image-
901 guided invasive procedures. ^(Core) [Moved from IV.C.4.]
902

903 IV.C.4.f) ~~Fellows must participate on a regular basis in scheduled~~
904 ~~conferences.~~ ^(Core)
905

906 IV.D. **Scholarship**

907
908 ***Medicine is both an art and a science. The physician is a humanistic***
909 ***scientist who cares for patients. This requires the ability to think critically,***
910 ***evaluate the literature, appropriately assimilate new knowledge, and***
911 ***practice lifelong learning. The program and faculty must create an***
912 ***environment that fosters the acquisition of such skills through fellow***
913 ***participation in scholarly activities as defined in the subspecialty-specific***
914 ***Program Requirements. Scholarly activities may include discovery,***
915 ***integration, application, and teaching.***

916
917 ***The ACGME recognizes the diversity of fellowships and anticipates that***
918 ***programs prepare physicians for a variety of roles, including clinicians,***

919 *scientists, and educators. It is expected that the program's scholarship will*
920 *reflect its mission(s) and aims, and the needs of the community it serves.*
921 *For example, some programs may concentrate their scholarly activity on*
922 *quality improvement, population health, and/or teaching, while other*
923 *programs might choose to utilize more classic forms of biomedical*
924 *research as the focus for scholarship.*
925

926 **IV.D.1. Program Responsibilities**

927
928 **IV.D.1.a) The program must demonstrate evidence of scholarly**
929 **activities, consistent with its mission(s) and aims. (Core)**
930

931 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
932 **must allocate adequate resources to facilitate fellow and**
933 **faculty involvement in scholarly activities. (Core)**
934

935 **IV.D.2. Faculty Scholarly Activity**

936
937 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
938 **accomplishments in at least three of the following domains:**
939 **(Core)**
940

- Research in basic science, education, translational science, patient care, or population health
- Peer-reviewed grants
- Quality improvement and/or patient safety initiatives
- Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports
- Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials
- Contribution to professional committees, educational organizations, or editorial boards
- Innovations in education

997 ~~meetings.~~ (Outcome)

998
999 **V. Evaluation**

1000
1001 **V.A. Fellow Evaluation**

1002
1003 **V.A.1. Feedback and Evaluation**

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1005
1006
1007
1008
1009

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

V.A.1.a).(1) The program must ensure that there is at least a quarterly review. ^(Core)

V.A.1.a).(1).(a) These quarterly reviews should include: ^(Detail)

V.A.1.a).(1).(a).(i) review of ~~faculty~~ evaluations of the fellow; ^(CoreDetail)

V.A.1.a).(1).(a).(ii) review of the procedure log; ^(CoreDetail)

V.A.1.a).(1).(a).(iii) review of procedural competencies; and, ^(Core)

V.A.1.a).(1).(a).(iv) documentation of compliance with institutional and departmental policies (HIPAA, the Joint Commission, patient

- 1027 safety, infection control, etc.). (CoreDetail)
- 1028
- 1029 **V.A.1.b) Evaluation must be documented at the completion of the**
- 1030 **assignment.** (Core)
- 1031
- 1032 **V.A.1.b).(1) For block rotations of greater than three months in**
- 1033 **duration, evaluation must be documented at least**
- 1034 **every three months.** (Core)
- 1035
- 1036 **V.A.1.b).(2) Longitudinal experiences such as continuity clinic in**
- 1037 **the context of other clinical responsibilities must be**
- 1038 **evaluated at least every three months and at**
- 1039 **completion.** (Core)
- 1040
- 1041 **V.A.1.c) The program must provide an objective performance**
- 1042 **evaluation based on the Competencies and the subspecialty-**
- 1043 **specific Milestones, and must:** (Core)
- 1044
- 1045 **V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers,**
- 1046 **patients, self, and other professional staff members);**
- 1047 **and,** (Core)
- 1048
- 1049 **V.A.1.c).(2) provide that information to the Clinical Competency**
- 1050 **Committee for its synthesis of progressive fellow**
- 1051 **performance and improvement toward unsupervised**
- 1052 **practice.** (Core)
- 1053

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1054
- 1055 **V.A.1.d) The program director or their designee, with input from the**
- 1056 **Clinical Competency Committee, must:**
- 1057
- 1058 **V.A.1.d).(1) meet with and review with each fellow their**
- 1059 **documented semi-annual evaluation of performance,**
- 1060 **including progress along the subspecialty-specific**
- 1061 **Milestones.** (Core)
- 1062
- 1063 **V.A.1.d).(2) assist fellows in developing individualized learning**
- 1064 **plans to capitalize on their strengths and identify areas**
- 1065 **for growth; and,** (Core)
- 1066

1067 V.A.1.d).(3) develop plans for fellows failing to progress, following
1068 institutional policies and procedures. (Core)
1069

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1070
1071 V.A.1.e) At least annually, there must be a summative evaluation of
1072 each fellow that includes their readiness to progress to the
1073 next year of the program, if applicable. (Core)
1074
1075 V.A.1.f) The evaluations of a fellow's performance must be accessible
1076 for review by the fellow. (Core)
1077
1078 V.A.2. Final Evaluation
1079
1080 V.A.2.a) The program director must provide a final evaluation for each
1081 fellow upon completion of the program. (Core)
1082
1083 V.A.2.a).(1) The subspecialty-specific Milestones, and when
1084 applicable the subspecialty-specific Case Logs, must
1085 be used as tools to ensure fellows are able to engage
1086 in autonomous practice upon completion of the
1087 program. (Core)
1088
1089 V.A.2.a).(2) The final evaluation must:
1090
1091 V.A.2.a).(2).(a) become part of the fellow's permanent record
1092 maintained by the institution, and must be
1093 accessible for review by the fellow in
1094 accordance with institutional policy; (Core)
1095
1096 V.A.2.a).(2).(b) verify that the fellow has demonstrated the
1097 knowledge, skills, and behaviors necessary to
1098 enter autonomous practice; (Core)
1099

- 1100 V.A.2.a).(2).(c) consider recommendations from the Clinical
1101 Competency Committee; and, ^(Core)
1102
- 1103 V.A.2.a).(2).(d) be shared with the fellow upon completion of
1104 the program. ^(Core)
1105
- 1106 V.A.3. A Clinical Competency Committee must be appointed by the
1107 program director. ^(Core)
1108
- 1109 V.A.3.a) At a minimum the Clinical Competency Committee must
1110 include three members, at least one of whom is a core faculty
1111 member. Members must be faculty members from the same
1112 program or other programs, or other health professionals
1113 who have extensive contact and experience with the
1114 program's fellows. ^(Core)
1115
- 1116 V.A.3.b) The Clinical Competency Committee must:
1117
- 1118 V.A.3.b).(1) review all fellow evaluations at least semi-annually;
1119 ^(Core)
1120
- 1121 V.A.3.b).(2) determine each fellow's progress on achievement of
1122 the subspecialty-specific Milestones; and, ^(Core)
1123
- 1124 V.A.3.b).(3) meet prior to the fellows' semi-annual evaluations and
1125 advise the program director regarding each fellow's
1126 progress. ^(Core)
1127
- 1128 V.B. Faculty Evaluation
1129
- 1130 V.B.1. The program must have a process to evaluate each faculty
1131 member's performance as it relates to the educational program at
1132 least annually. ^(Core)
1133

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information.

The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1134
1135 **V.B.1.a)** This evaluation must include a review of the faculty member's
1136 clinical teaching abilities, engagement with the educational
1137 program, participation in faculty development related to their
1138 skills as an educator, clinical performance, professionalism,
1139 and scholarly activities. (Core)
1140
1141 **V.B.1.b)** This evaluation must include written, confidential evaluations
1142 by the fellows. (Core)
1143
1144 **V.B.2.** Faculty members must receive feedback on their evaluations at least
1145 annually. (Core)
1146
1147 **V.B.3.** Results of the faculty educational evaluations should be
1148 incorporated into program-wide faculty development plans. (Core)
1149

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1150
1151 **V.C. Program Evaluation and Improvement**
1152
1153 **V.C.1.** The program director must appoint the Program Evaluation
1154 Committee to conduct and document the Annual Program
1155 Evaluation as part of the program's continuous improvement
1156 process. (Core)
1157
1158 **V.C.1.a)** The Program Evaluation Committee must be composed of at
1159 least two program faculty members, at least one of whom is a
1160 core faculty member, and at least one fellow. (Core)
1161
1162 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
1163
1164 **V.C.1.b).(1)** acting as an advisor to the program director, through
1165 program oversight; (Core)
1166
1167 **V.C.1.b).(2)** review of the program's self-determined goals and
1168 progress toward meeting them; (Core)
1169
1170 **V.C.1.b).(3)** guiding ongoing program improvement, including
1171 development of new goals, based upon outcomes;
1172 and, (Core)
1173
1174 **V.C.1.b).(4)** review of the current operating environment to identify
1175 strengths, challenges, opportunities, and threats as
1176 related to the program's mission and aims. (Core)

1177

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

1178

1179

V.C.1.c) The Program Evaluation Committee should consider the following elements in its assessment of the program:

1180

1181

1182

V.C.1.c).(6).(b) in-training examinations (where applicable); (Core)

1215

1216

1217

V.C.1.c).(6).(c) board pass and certification rates; and, (Core)

1218

1219

V.C.1.c).(6).(d) graduate performance. (Core)

1220

1221

V.C.1.c).(7) aggregate faculty:

- 1222
 1223 V.C.1.c).(7).(a) evaluation; and, (Core)
 1224
 1225 V.C.1.c).(7).(b) professional development (Core)
 1226
 1227 V.C.1.d) The Program Evaluation Committee must evaluate the
 1228 program's mission and aims, strengths, areas for
 1229 improvement, and threats. (Core)
 1230
 1231 V.C.1.e) The annual review, including the action plan, must:
 1232
 1233 V.C.1.e).(1) be distributed to and discussed with the members of
 1234 the teaching faculty and the fellows; and, (Core)
 1235
 1236 V.C.1.e).(2) be submitted to the DIO. (Core)
 1237
 1238 V.C.2. The program must participate in a Self-Study prior to its 10-Year
 1239 Accreditation Site Visit. (Core)
 1240
 1241 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
 1242 (Core)
 1243

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1244
 1245 V.C.3. ~~One goal of ACGME-accredited education is to educate physicians~~
 1246 ~~who seek and achieve board certification. One measure of the~~
 1247 ~~effectiveness of the educational program is the ultimate pass rate.~~
 1248
 1249 ~~The program director should encourage all eligible program~~
 1250 ~~graduates to take the certifying examination offered by the~~
 1251 ~~applicable American Board of Medical Specialties (ABMS) member~~
 1252 ~~board or American Osteopathic Association (AOA) certifying board.~~
 1253
 1254 V.C.3.a) For subspecialties in which the ABMS member board and/or
 1255 AOA certifying board offer(s) an annual written exam, in the
 1256 preceding three years, the program's aggregate pass rate of
 1257 those taking the examination for the first time must be higher
 1258 than the bottom fifth percentile of programs in that
 1259 subspecialty. (Outcome)
 1260

- 1261 V.C.3.b) ~~For subspecialties in which the ABMS member board and/or~~
 1262 ~~AOA certifying board offer(s) a biennial written exam, in the~~
 1263 ~~preceding six years, the program's aggregate pass rate of~~
 1264 ~~those taking the examination for the first time must be higher~~
 1265 ~~than the bottom fifth percentile of programs in that~~
 1266 ~~subspecialty.~~^(Outcome)
 1267
- 1268 V.C.3.c) ~~For subspecialties in which the ABMS member board and/or~~
 1269 ~~AOA certifying board offer(s) an annual oral exam, in the~~
 1270 ~~preceding three years, the program's aggregate pass rate of~~
 1271 ~~those taking the examination for the first time must be higher~~
 1272 ~~than the bottom fifth percentile of programs in that~~
 1273 ~~subspecialty.~~^(Outcome)
 1274
- 1275 V.C.3.d) ~~For subspecialties in which the ABMS member board and/or~~
 1276 ~~AOA certifying board offer(s) a biennial oral exam, in the~~
 1277 ~~preceding six years, the program's aggregate pass rate of~~
 1278 ~~those taking the examination for the first time must be higher~~
 1279 ~~than the bottom fifth percentile of programs in that~~
 1280 ~~subspecialty.~~^(Outcome)
 1281
- 1282 V.C.3.e) ~~For each of the exams referenced in V.C.3.a) d), any program~~
 1283 ~~whose graduates over the time period specified in the~~
 1284 ~~requirement have achieved an 80 percent pass rate will have~~
 1285 ~~met this requirement, no matter the percentile rank of the~~
 1286 ~~program for pass rate in that subspecialty.~~^(Outcome)
 1287

~~Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.~~

~~There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.~~

- 1288
 1289 V.C.3.f) ~~Programs must report, in ADS, board certification status~~
 1290 ~~annually for the cohort of board-eligible fellows that~~
 1291 ~~graduated seven years earlier.~~^(Core)
 1292

~~Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.~~

~~The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.~~

~~In the future, the ACGME may establish parameters related to ultimate board certification rates.~~

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too

fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.
(Core)

VI.A.1.a).(1).(b) The program must have a structure that promotes safe, interprofessional, team-based care.
(Core)

VI.A.1.a).(2) Education on Patient Safety

1362 Programs must provide formal educational activities
1363 that promote patient safety-related goals, tools, and
1364 techniques. ^(Core)
1365

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1366
1367 **VI.A.1.a).(3)**
1368

Patient Safety Events

1369 *Reporting, investigation, and follow-up of adverse*
1370 *events, near misses, and unsafe conditions are pivotal*
1371 *mechanisms for improving patient safety, and are*
1372 *essential for the success of any patient safety*
1373 *program. Feedback and experiential learning are*
1374 *essential to developing true competence in the ability*
1375 *to identify causes and institute sustainable systems-*
1376 *based changes to ameliorate patient safety*
1377 *vulnerabilities.*

1379 **VI.A.1.a).(3).(a)**
1380

Residents, fellows, faculty members, and other clinical staff members must:

1381
1382 **VI.A.1.a).(3).(a).(i)**
1383

know their responsibilities in reporting patient safety events at the clinical site;
^(Core)

1384
1385
1386 **VI.A.1.a).(3).(a).(ii)**
1387

know how to report patient safety events, including near misses, at the clinical site; and, ^(Core)

1388
1389
1390 **VI.A.1.a).(3).(a).(iii)**
1391

be provided with summary information of their institution's patient safety reports. ^(Core)

1392
1393
1394 **VI.A.1.a).(3).(b)**
1395

Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. ^(Core)

1396

1398
1399
1400
1401 **VI.A.1.a).(4)**
1402

Fellow Education and Experience in Disclosure of Adverse Events

1403
1404 *Patient-centered care requires patients, and when*
1405 *appropriate families, to be apprised of clinical*
1406 *situations that affect them, including adverse events.*
1407 *This is an important skill for faculty physicians to*
1408 *model, and for fellows to develop and apply.*
1409

1410	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. ^(Core)
1411		
1412		
1413		
1414	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated. ^(Detail)
1415		
1416		
1417		
1418	VI.A.1.b)	Quality Improvement
1419		
1420	VI.A.1.b).(1)	Education in Quality Improvement
1421		
1422		<i>A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.</i>
1423		
1424		
1425		
1426		
1427	VI.A.1.b).(1).(a)	Fellows must receive training and experience in quality improvement processes, including an understanding of health care disparities. ^(Core)
1428		
1429		
1430		
1431	VI.A.1.b).(2)	Quality Metrics
1432		
1433		<i>Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.</i>
1434		
1435		
1436		
1437	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data on quality metrics and benchmarks related to their patient populations. ^(Core)
1438		
1439		
1440		
1441	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1442		
1443		<i>Experiential learning is essential to developing the ability to identify and institute sustainable systems-based changes to improve patient care.</i>
1444		
1445		
1446		
1447	VI.A.1.b).(3).(a)	Fellows must have the opportunity to participate in interprofessional quality improvement activities. ^(Core)
1448		
1449		
1450		
1451	VI.A.1.b).(3).(a).(i)	This should include activities aimed at reducing health care disparities. ^(Detail)
1452		
1453		
1454	VI.A.2.	Supervision and Accountability
1455		
1456	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate,</i>
1457		
1458		
1459		
1460		

1461 *and monitor a structured chain of responsibility and*
1462 *accountability as it relates to the supervision of all patient*
1463 *care.*

1464
1465 *Supervision in the setting of graduate medical education*
1466 *provides safe and effective care to patients; ensures each*
1467 *fellow's development of the skills, knowledge, and attitudes*
1468 *required to enter the unsupervised practice of medicine; and*
1469 *establishes a foundation for continued professional growth.*

1470
1471 **VI.A.2.a).(1)** Each patient must have an identifiable and
1472 appropriately-credentialed and privileged attending
1473 physician (or licensed independent practitioner as
1474 specified by the applicable Review Committee) who is
1475 responsible and accountable for the patient's care.
1476 (Core)

1477
1478 **VI.A.2.a).(1).(a)** This information must be available to fellows,
1479 faculty members, other members of the health
1480 care team, and patients. (Core)

1481
1482 **VI.A.2.a).(1).(b)** Fellows and faculty members must inform each
1483 patient of their respective roles in that patient's
1484 care when providing direct patient care. (Core)

1485
1486 **VI.A.2.b)** *Supervision may be exercised through a variety of methods.*
1487 *For many aspects of patient care, the supervising physician*
1488 *may be a more advanced fellow. Other portions of care*
1489 *provided by the fellow can be adequately supervised by the*
1490 *appropriate availability of the supervising faculty member or*
1491 *fellow, either on site or by means of telecommunication*
1492 *technology. Some activities require the physical presence of*
1493 *the supervising faculty member. In some circumstances,*
1494 *supervision may include post-hoc review of fellow-delivered*
1495 *care with feedback.*

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1497
1498 **VI.A.2.b).(1)** The program must demonstrate that the appropriate
1499 level of supervision in place for all fellows is based on
1500 each fellow's level of training and ability, as well as
1501 patient complexity and acuity. Supervision may be

1502		exercised through a variety of methods, as appropriate
1503		to the situation. ^(Core)
1504		
1505	VI.A.2.b).(2)	The program must define when physical presence of a
1506		supervising physician is required. ^(Core)
1507		
1508	VI.A.2.c)	Levels of Supervision
1509		
1510		To promote appropriate fellow supervision while providing
1511		for graded authority and responsibility, the program must use
1512		the following classification of supervision: ^(Core)
1513		
1514	VI.A.2.c).(1)	Direct Supervision:
1515		
1516	VI.A.2.c).(1).(a)	the supervising physician is physically present
1517		with the fellow during the key portions of the
1518		patient interaction; or, ^(Core)
1519		
1520	VI.A.2.c).(1).(b)	the supervising physician and/or patient is not
1521		physically present with the fellow and the
1522		supervising physician is concurrently
1523		monitoring the patient care through appropriate
1524		telecommunication technology. ^(Core)
1525		
1526	VI.A.2.c).(1).(b).(i)	<u>The program must have clear guidelines</u>
1527		<u>that delineate which competencies must be</u>
1528		<u>met to determine when a fellow can</u>
1529		<u>progress to indirect supervision. ^(Core)</u>
1530		
1531	VI.A.2.c).(1).(b).(ii)	<u>The program director must ensure that clear</u>
1532		<u>expectations exist and are communicated to</u>
1533		<u>the fellows, and that these expectations</u>
1534		<u>outline specific situations in which a fellow</u>
1535		<u>would still require direct supervision. ^(Core)</u>
1536		
1537	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not
1538		providing physical or concurrent visual or audio
1539		supervision but is immediately available to the fellow
1540		for guidance and is available to provide appropriate
1541		direct supervision. ^(Core)
1542		
1543	VI.A.2.c).(3)	Oversight – the supervising physician is available to
1544		provide review of procedures/encounters with
1545		feedback provided after care is delivered. ^(Core)
1546		
1547	VI.A.2.d)	The privilege of progressive authority and responsibility,
1548		conditional independence, and a supervisory role in patient
1549		care delegated to each fellow must be assigned by the
1550		program director and faculty members. ^(Core)
1551		

- 1552 VI.A.2.d).(1) The program director must evaluate each fellow's
 1553 abilities based on specific criteria, guided by the
 1554 Milestones. ^(Core)
 1555
- 1556 VI.A.2.d).(2) Faculty members functioning as supervising
 1557 physicians must delegate portions of care to fellows
 1558 based on the needs of the patient and the skills of
 1559 each fellow. ^(Core)
 1560
- 1561 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior
 1562 fellows and residents in recognition of their progress
 1563 toward independence, based on the needs of each
 1564 patient and the skills of the individual resident or
 1565 fellow. ^(Detail)
 1566
- 1567 VI.A.2.e) Programs must set guidelines for circumstances and events
 1568 in which fellows must communicate with the supervising
 1569 faculty member(s). ^(Core)
 1570
- 1571 VI.A.2.e).(1) Each fellow must know the limits of their scope of
 1572 authority, and the circumstances under which the
 1573 fellow is permitted to act with conditional
 1574 independence. ^(Outcome)
 1575

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1576
- 1577 VI.A.2.f) Faculty supervision assignments must be of sufficient
 1578 duration to assess the knowledge and skills of each fellow
 1579 and to delegate to the fellow the appropriate level of patient
 1580 care authority and responsibility. ^(Core)
 1581
- 1582 VI.B. Professionalism
- 1583
- 1584 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
 1585 educate fellows and faculty members concerning the professional
 1586 responsibilities of physicians, including their obligation to be
 1587 appropriately rested and fit to provide the care required by their
 1588 patients. ^(Core)
 1589
- 1590 VI.B.2. The learning objectives of the program must:
- 1591
- 1592 VI.B.2.a) be accomplished through an appropriate blend of supervised
 1593 patient care responsibilities, clinical teaching, and didactic
 1594 educational events; ^(Core)
 1595
- 1596 VI.B.2.b) be accomplished without excessive reliance on fellows to
 1597 fulfill non-physician obligations; and, ^(Core)
 1598

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1599
1600
1601

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1602
1603
1604
1605
1606
1607
1608
1609
1610
1611
1612
1613
1614
1615

VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. (Core)

VI.B.4. Fellows and faculty members must demonstrate an understanding of their personal role in the:

VI.B.4.a) provision of patient- and family-centered care; (Outcome)

VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; (Outcome)

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1616
1617
1618

VI.B.4.c) assurance of their fitness for work, including: (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1619
1620
1621
1622

VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, (Outcome)

- 1623 VI.B.4.c).(2) recognition of impairment, including from illness,
 1624 fatigue, and substance use, in themselves, their peers,
 1625 and other members of the health care team. (Outcome)
 1626
- 1627 VI.B.4.d) commitment to lifelong learning; (Outcome)
 1628
- 1629 VI.B.4.e) monitoring of their patient care performance improvement
 1630 indicators; and, (Outcome)
 1631
- 1632 VI.B.4.f) accurate reporting of clinical and educational work hours,
 1633 patient outcomes, and clinical experience data. (Outcome)
 1634
- 1635 VI.B.5. All fellows and faculty members must demonstrate responsiveness
 1636 to patient needs that supersedes self-interest. This includes the
 1637 recognition that under certain circumstances, the best interests of
 1638 the patient may be served by transitioning that patient's care to
 1639 another qualified and rested provider. (Outcome)
 1640
- 1641 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
 1642 provide a professional, equitable, respectful, and civil environment
 1643 that is free from discrimination, sexual and other forms of
 1644 harassment, mistreatment, abuse, or coercion of students, fellows,
 1645 faculty, and staff. (Core)
 1646
- 1647 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
 1648 have a process for education of fellows and faculty regarding
 1649 unprofessional behavior and a confidential process for reporting,
 1650 investigating, and addressing such concerns. (Core)
 1651
- 1652 VI.C. Well-Being
 1653
- 1654 *Psychological, emotional, and physical well-being are critical in the*
 1655 *development of the competent, caring, and resilient physician and require*
 1656 *proactive attention to life inside and outside of medicine. Well-being*
 1657 *requires that physicians retain the joy in medicine while managing their*
 1658 *own real life stresses. Self-care and responsibility to support other*
 1659 *members of the health care team are important components of*
 1660 *professionalism; they are also skills that must be modeled, learned, and*
 1661 *nurtured in the context of other aspects of fellowship training.*
 1662
- 1663 *Fellows and faculty members are at risk for burnout and depression.*
 1664 *Programs, in partnership with their Sponsoring Institutions, have the same*
 1665 *responsibility to address well-being as other aspects of resident*
 1666 *competence. Physicians and all members of the health care team share*
 1667 *responsibility for the well-being of each other. For example, a culture which*
 1668 *encourages covering for colleagues after an illness without the expectation*
 1669 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
 1670 *clinical learning environment models constructive behaviors, and prepares*
 1671 *fellows with the skills and attitudes needed to thrive throughout their*
 1672 *careers.*
 1673

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1674

- VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:**
- VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; (Core)**
- VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; (Core)**
- VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; (Core)**

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1691
1692
1693
1694

- VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, (Core)**

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1695
1696
1697
1698
1699
1700

- VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. (Core)**

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1701
1702 VI.C.1.e) attention to fellow and faculty member burnout, depression,
1703 and substance abuse. The program, in partnership with its
1704 Sponsoring Institution, must educate faculty members and
1705 fellows in identification of the symptoms of burnout,
1706 depression, and substance abuse, including means to assist
1707 those who experience these conditions. Fellows and faculty
1708 members must also be educated to recognize those
1709 symptoms in themselves and how to seek appropriate care.
1710 The program, in partnership with its Sponsoring Institution,
1711 must: ^(Core)
1712

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1713
1714 VI.C.1.e).(1) encourage fellows and faculty members to alert the
1715 program director or other designated personnel or
1716 programs when they are concerned that another
1717 fellow, resident, or faculty member may be displaying
1718 signs of burnout, depression, substance abuse,
1719 suicidal ideation, or potential for violence; ^(Core)
1720

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1721
1722 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1723 and, ^(Core)
1724
1725 VI.C.1.e).(3) provide access to confidential, affordable mental
1726 health assessment, counseling, and treatment,

1727
1728
1729

including access to urgent and emergent care 24 hours a day, seven days a week. ^(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

VI.D. Fatigue Mitigation

VI.D.1. Programs must:

VI.D.1.a) educate all faculty members and fellows to recognize the signs of fatigue and sleep deprivation; ^(Core)

VI.D.1.b) educate all faculty members and fellows in alertness management and fatigue mitigation processes; and, ^(Core)

VI.D.1.c) encourage fellows to use fatigue mitigation processes to manage the potential negative effects of fatigue on patient care and learning. ^(Detail)

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation

processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

VI.D.2. Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2–VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue. *(Core)*

VI.D.3. The program, in partnership with its Sponsoring Institution, must ensure adequate sleep facilities and safe transportation options for fellows who may be too fatigued to safely return home. *(Core)*

VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care

VI.E.1. Clinical Responsibilities

The clinical responsibilities for each fellow must be based on PGY level, patient safety, fellow ability, severity and complexity of patient illness/condition, and available support services. *(Core)*

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1783
1784
1785
1786
1787

VI.E.2. Teamwork

Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system. *(Core)*

VI.E.3. Transitions of Care

- 1788 VI.E.3.a) Programs must design clinical assignments to optimize
 1789 transitions in patient care, including their safety, frequency,
 1790 and structure. ^(Core)
 1791
- 1792 VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,
 1793 must ensure and monitor effective, structured hand-over
 1794 processes to facilitate both continuity of care and patient
 1795 safety. ^(Core)
 1796
- 1797 VI.E.3.c) Programs must ensure that fellows are competent in
 1798 communicating with team members in the hand-over process.
 1799 ^(Outcome)
 1800
- 1801 VI.E.3.d) Programs and clinical sites must maintain and communicate
 1802 schedules of attending physicians and fellows currently
 1803 responsible for care. ^(Core)
 1804
- 1805 VI.E.3.e) Each program must ensure continuity of patient care,
 1806 consistent with the program’s policies and procedures
 1807 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may
 1808 be unable to perform their patient care responsibilities due to
 1809 excessive fatigue or illness, or family emergency. ^(Core)
 1810
- 1811 VI.F. Clinical Experience and Education
 1812
- 1813 *Programs, in partnership with their Sponsoring Institutions, must design*
 1814 *an effective program structure that is configured to provide fellows with*
 1815 *educational and clinical experience opportunities, as well as reasonable*
 1816 *opportunities for rest and personal activities.*
 1817

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

- 1818
- 1819 VI.F.1. Maximum Hours of Clinical and Educational Work per Week
 1820
- 1821 Clinical and educational work hours must be limited to no more than
 1822 80 hours per week, averaged over a four-week period, inclusive of all
 1823 in-house clinical and educational activities, clinical work done from
 1824 home, and all moonlighting. ^(Core)
 1825

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in

excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)

VI.F.2.b).(1) There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1844
1845
1846
1847

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. ^(Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1848
1849
1850
1851
1852
1853

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. ^(Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend,"

meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

- 1854
1855 **VI.F.3. Maximum Clinical Work and Education Period Length**
1856
1857 **VI.F.3.a) Clinical and educational work periods for fellows must not**
1858 **exceed 24 hours of continuous scheduled clinical**
1859 **assignments. (Core)**
1860
1861 **VI.F.3.a).(1) Up to four hours of additional time may be used for**
1862 **activities related to patient safety, such as providing**
1863 **effective transitions of care, and/or fellow education.**
1864 **(Core)**
1865
1866 **VI.F.3.a).(1).(a) Additional patient care responsibilities must not**
1867 **be assigned to a fellow during this time. (Core)**
1868

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- 1869
1870 **VI.F.4. Clinical and Educational Work Hour Exceptions**
1871
1872 **VI.F.4.a) In rare circumstances, after handing off all other**
1873 **responsibilities, a fellow, on their own initiative, may elect to**
1874 **remain or return to the clinical site in the following**
1875 **circumstances:**
1876
1877 **VI.F.4.a).(1) to continue to provide care to a single severely ill or**
1878 **unstable patient; (Detail)**
1879
1880 **VI.F.4.a).(2) humanistic attention to the needs of a patient or**
1881 **family; or, (Detail)**
1882
1883 **VI.F.4.a).(3) to attend unique educational events. (Detail)**
1884
1885 **VI.F.4.b) These additional hours of care or education will be counted**
1886 **toward the 80-hour weekly limit. (Detail)**
1887

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1906

VI.F.4.c) A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.

The Review Committee for Diagnostic Radiology will not consider requests for exceptions to the 80-hour limit to the fellows' work week.

VI.F.4.c).(1) In preparing a request for an exception, the program director must follow the clinical and educational work hour exception policy from the *ACGME Manual of Policies and Procedures*. ^(Core)

VI.F.4.c).(2) Prior to submitting the request to the Review Committee, the program director must obtain approval from the Sponsoring Institution's GMEC and DIO. ^(Core)

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

1948

VI.F.7. Maximum In-House On-Call Frequency

Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). *(Core)*

VI.F.8. At-Home Call

VI.F.8.a) Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. *(Core)*

VI.F.8.a).(1) At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. *(Core)*

VI.F.8.b) Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. *(Detail)*

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
