1 Proposed ACGME Program Requirements for Graduate Medical Education
2 in Sleep Medicine
3

4 Common Program Requirements (One-Year Fellowship) are in BOLD
5

6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (One-Year Fellowship) are intended to explain the differences.

10
11 Introduction
12

13 **Int.A. *Fellowship is advanced graduate medical education beyond a core***
14 ***residency program for physicians who desire to enter more specialized***
15 ***practice. Fellowship-trained physicians serve the public by providing***
16 ***subspecialty care, which may also include core medical care, acting as a***
17 ***community resource for expertise in their field, creating and integrating***
18 ***new knowledge into practice, and educating future generations of***
19 ***physicians. Graduate medical education values the strength that a diverse***
20 ***group of physicians brings to medical care.***
21

22 ***Fellows who have completed residency are able to practice independently***
23 ***in their core specialty. The prior medical experience and expertise of***
24 ***fellows distinguish them from physicians entering into residency training.***
25 ***The fellow's care of patients within the subspecialty is undertaken with***
26 ***appropriate faculty supervision and conditional independence. Faculty***
27 ***members serve as role models of excellence, compassion,***
28 ***professionalism, and scholarship. The fellow develops deep medical***
29 ***knowledge, patient care skills, and expertise applicable to their focused***
30 ***area of practice. Fellowship is an intensive program of subspecialty clinical***
31 ***and didactic education that focuses on the multidisciplinary care of***
32 ***patients. Fellowship education is often physically, emotionally, and***
33 ***intellectually demanding, and occurs in a variety of clinical learning***
34 ***environments committed to graduate medical education and the well-being***
35 ***of patients, residents, fellows, faculty members, students, and all members***
36 ***of the health care team.***
37

38 ***In addition to clinical education, many fellowship programs advance***
39 ***fellows' skills as physician-scientists. While the ability to create new***
40 ***knowledge within medicine is not exclusive to fellowship-educated***
41 ***physicians, the fellowship experience expands a physician's abilities to***
42 ***pursue hypothesis-driven scientific inquiry that results in contributions to***
43 ***the medical literature and patient care. Beyond the clinical subspecialty***
44 ***expertise achieved, fellows develop mentored relationships built on an***
45 ***infrastructure that promotes collaborative research.***
46

47 **Int.B. Definition of Subspecialty**

48 Sleep medicine is a discipline of medical practice in which sleep disorders are
49 assessed using a combination of clinical evaluation and physiological monitoring,
50 and treated using medications, medical devices, surgical procedures, patient
51 education, and behavioral techniques. Sleep medicine fellowships provide
52 advanced education to allow a fellow to acquire competency in the subspecialty
53 with sufficient expertise to act as an independent consultant.
54

55 **Int.C. Length of Educational Program**

56
57 The educational program in sleep medicine must be 12 months in length. (Core)*
58

59 **I. Oversight**

60
61 **I.A. Sponsoring Institution**

62
63 *The Sponsoring Institution is the organization or entity that assumes the*
64 *ultimate financial and academic responsibility for a program of graduate*
65 *medical education consistent with the ACGME Institutional Requirements.*
66

67 *When the Sponsoring Institution is not a rotation site for the program, the*
68 *most commonly utilized site of clinical activity for the program is the*
69 *primary clinical site.*
70

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, a federally qualified health center, a surgery center, an academic and private single-specialty clinic, or an educational foundation.

71
72 **I.A.1. The program must be sponsored by one ACGME-accredited**
73 **Sponsoring Institution. (Core)**
74

75 **I.B. Participating Sites**

76
77 *A participating site is an organization providing educational experiences or*
78 *educational assignments/rotations for fellows.*
79

80 **I.B.1. The program, with approval of its Sponsoring Institution, must**
81 **designate a primary clinical site. (Core)**
82

83 **I.B.1.a)** A sleep medicine fellowship should function as an integral part of
84 an ACGME-accredited residency program in child neurology,
85 internal medicine, neurology, pediatrics, or psychiatry. (Core)
86

87 **I.B.1.b)** The Sponsoring Institution should sponsor only one ACGME-
88 accredited sleep medicine program. (Core)

- 89
90 I.B.1.c) The Sponsoring Institution must ensure that there is a reporting
91 relationship with the program director of the sponsoring core
92 residency program to ensure compliance with the ACGME's
93 accreditation standards; ^(Core)
94
- 95 **I.B.2.** **There must be a program letter of agreement (PLA) between the**
96 **program and each participating site that governs the relationship**
97 **between the program and the participating site providing a required**
98 **assignment.** ^(Core)
99
- 100 **I.B.2.a)** **The PLA must:**
- 101
- 102 **I.B.2.a).(1)** **be renewed at least every 10 years; and,** ^(Core)
103
- 104 **I.B.2.a).(2)** **be approved by the designated institutional official**
105 **(DIO).** ^(Core)
106
- 107 **I.B.3.** **The program must monitor the clinical learning and working**
108 **environment at all participating sites.** ^(Core)
109
- 110 **I.B.3.a)** **At each participating site there must be one faculty member,**
111 **designated by the program director, who is accountable for**
112 **fellow education for that site, in collaboration with the**
113 **program director.** ^(Core)
114

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

- 115
116 **I.B.4.** **The program director must submit any additions or deletions of**
117 **participating sites routinely providing an educational experience,**

118 required for all fellows, of one month full time equivalent (FTE) or
119 more through the ACGME's Accreditation Data System (ADS). (Core)
120

121 **I.C.** The program, in partnership with its Sponsoring Institution, must engage in
122 practices that focus on mission-driven, ongoing, systematic recruitment
123 and retention of a diverse and inclusive workforce of residents (if present),
124 fellows, faculty members, senior administrative staff members, and other
125 relevant members of its academic community. (Core)
126

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

127
128 **I.D. Resources**

129
130 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
131 **ensure the availability of adequate resources for fellow education.**
132 (Core)

133
134 **I.D.1.a) Space and Equipment**
135
136 There must be space and equipment for the program, including
137 meeting rooms, examination rooms, computers, visual and other
138 educational aids, and work/study space. (Core)
139

140 **I.D.1.b) Facilities**

141
142 **I.D.1.b).(1)** There must be an outpatient clinic, as well as diagnostic,
143 therapeutic, and research facilities. (Core)
144

145 **I.D.1.b).(2)** Efficient, effective ambulatory and inpatient facilities must
146 be available for fellows' clinical experiences. (Core)
147

148 **I.D.1.b).(3)** Fellows must have access to a lounge facility during
149 assigned duty hours. (Detail)†
150

151 **I.D.1.b).(4)** When fellows are in the hospital, assigned night duty, or
152 called in from home, they must be provided with a secure
153 space for their belongings. (Detail)
154

155 **I.D.1.b).(5)** There must be an appropriately-equipped sleep center
156 which has a minimum of two fully-equipped
157 polysomnography bedrooms and adequate support space.
158 (Core)
159

160 **I.D.1.b).(5).(a)** The sleep center must be accredited by the
161 American Academy of Sleep Medicine. (Core)
162

163 I.D.1.c) Other Support Services
164
165 Inpatient and outpatient systems must be in place to prevent
166 fellows from performing routine clerical functions, such as
167 scheduling tests and appointments, and retrieving records and
168 letters. ^(Detail)
169

170 I.D.1.d) Medical Records
171
172 Access to an electronic health record should be provided. In the
173 absence of an existing electronic health record, institutions must
174 demonstrate institutional commitment to its development and
175 progress toward its implementation. ^(Core)
176

177 I.D.1.e) The Sponsoring Institution and participating sites must:

178
179 I.D.1.e).(1) ensure the availability of appropriate and timely
180 consultation from other specialties. ^(Detail)
181

182 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
183 **ensure healthy and safe learning and working environments that**
184 **promote fellow well-being and provide for:** ^(Core)
185

186 **I.D.2.a) access to food while on duty;** ^(Core)
187

188 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
189 **and accessible for fellows with proximity appropriate for safe**
190 **patient care, if the fellows are assigned in-house call;** ^(Core)
191

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

192
193 **I.D.2.c) clean and private facilities for lactation that have refrigeration**
194 **capabilities, with proximity appropriate for safe patient care;**
195 ^(Core)
196

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

197

| | | |
|-----|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 198 | I.D.2.d) | security and safety measures appropriate to the participating site; and, ^(Core) |
| 199 | | |
| 200 | | |
| 201 | I.D.2.e) | accommodations for fellows with disabilities consistent with the Sponsoring Institution’s policy. ^(Core) |
| 202 | | |
| 203 | | |
| 204 | I.D.3. | Fellows must have ready access to subspecialty-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities. ^(Core) |
| 205 | | |
| 206 | | |
| 207 | | |
| 208 | | |
| 209 | I.D.4. | The program’s educational and clinical resources must be adequate to support the number of fellows appointed to the program. ^(Core) |
| 210 | | |
| 211 | | |
| 212 | I.D.4.a) | Patient Population |
| 213 | | |
| 214 | I.D.4.a).(1) | The patient population must have a variety of clinical problems and stages of diseases, including short- and long-term sleep disorders. ^(Core) |
| 215 | | |
| 216 | | |
| 217 | | |
| 218 | I.D.4.a).(2) | There must be patients of each gender, with a broad age range, including infants, children, adolescents, and geriatric patients. ^(Core) |
| 219 | | |
| 220 | | |
| 221 | | |
| 222 | I.D.4.a).(3) | A sufficient number of patients must be available to enable each fellow to achieve the required educational outcomes. ^(Core) |
| 223 | | |
| 224 | | |
| 225 | | |
| 226 | I.D.4.a).(4) | There must be patients with the major categories of sleep disorders, including: |
| 227 | | |
| 228 | | |
| 229 | I.D.4.a).(4).(a) | circadian rhythm sleep disorders; ^(Detail) |
| 230 | | |
| 231 | I.D.4.a).(4).(b) | idiopathic hypersomnia; ^(Detail) |
| 232 | | |
| 233 | I.D.4.a).(4).(c) | insomnia; ^(Detail) |
| 234 | | |
| 235 | I.D.4.a).(4).(d) | narcolepsy; ^(Detail) |
| 236 | | |
| 237 | I.D.4.a).(4).(e) | parasomnias; ^(Detail) |
| 238 | | |
| 239 | I.D.4.a).(4).(f) | sleep problems related to other factors and diseases, including medications, and psychiatric and medical disorders; ^(Detail) |
| 240 | | |
| 241 | | |
| 242 | | |
| 243 | I.D.4.a).(4).(g) | sleep-related breathing disorders; and, ^(Detail) |
| 244 | | |
| 245 | I.D.4.a).(4).(h) | sleep-related movement disorders. ^(Detail) |
| 246 | | |

247 I.E. *A fellowship program usually occurs in the context of many learners and*
248 *other care providers and limited clinical resources. It should be structured*
249 *to optimize education for all learners present.*

251 I.E.1. Fellows should contribute to the education of residents in core
252 programs, if present. ^(Core)
253

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

254
255 II. Personnel

256
257 II.A. Program Director

258
259 II.A.1. There must be one faculty member appointed as program director
260 with authority and accountability for the overall program, including
261 compliance with all applicable program requirements. ^(Core)
262

263 II.A.1.a) The Sponsoring Institution's Graduate Medical Education
264 Committee (GMEC) must approve a change in program
265 director. ^(Core)
266

267 II.A.1.b) Final approval of the program director resides with the
268 Review Committee. ^(Core)
269

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

270
271 II.A.2. The program director must be provided with support adequate for
272 administration of the program based upon its size and configuration.
273 ^(Core)

274
275 II.A.2.a) At a minimum, the program director must be provided with the
276 salary support required to devote 25-50 percent FTE of non-
277 clinical time to the administration of the program. ^(Detail)
278

Background and Intent: Twenty five percent FTE is defined as one and one quarter (1.25) days per week.

"Administrative time" is defined as non-clinical time spent meeting the responsibilities of

the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

279
280

306
307
308
309
310
311
312
313
314

II.A.3. Qualifications of the program director:

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; and, ^(Core)

II.A.3.a).(1) The program director should continue in his or her position for a length of time adequate to maintain continuity of leadership and program stability. ^(Detail)

II.A.3.a).(2) The program director must have at least three years of participation as an active faculty member in an ACGME-accredited education program. ^(Detail)

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Family Medicine, Internal Medicine, Psychiatry and Neurology, Otolaryngology – Head and Neck Surgery, Pediatrics, or Psychiatry or by the American Osteopathic Board of Family Physicians, Internal Medicine, Neurology and Psychiatry, or Ophthalmology and Otolaryngology – Head and Neck Surgery, or subspecialty qualifications that are acceptable to the Review Committee. ^(Core)

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. ^(Core)

II.A.4.a) The program director must:

II.A.4.a).(1) be a role model of professionalism; ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

315
316
317

II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the

318
319
320

mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

321
322
323
324
325

II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

326
327
328
329
330
331
332
333
334
335
336
337
338
339
340
341
342
343

II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)

II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; ^(Core)

II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; ^(Core)

II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

344
345
346
347

II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)

- 348 **II.A.4.a).(9)** provide applicants who are offered an interview with
 349 information related to the applicant’s eligibility for the
 350 relevant subspecialty board examination(s); ^(Core)
 351
- 352 **II.A.4.a).(10)** provide a learning and working environment in which
 353 fellows have the opportunity to raise concerns and
 354 provide feedback in a confidential manner as
 355 appropriate, without fear of intimidation or retaliation;
 356 ^(Core)
 357
- 358 **II.A.4.a).(11)** ensure the program’s compliance with the Sponsoring
 359 Institution’s policies and procedures related to
 360 grievances and due process; ^(Core)
 361
- 362 **II.A.4.a).(12)** ensure the program’s compliance with the Sponsoring
 363 Institution’s policies and procedures for due process
 364 when action is taken to suspend or dismiss, not to
 365 promote, or not to renew the appointment of a fellow;
 366 ^(Core)
 367

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution’s policies and procedures, and will ensure they are followed by the program’s leadership, faculty members, support personnel, and fellows.

- 368
- 369 **II.A.4.a).(13)** ensure the program’s compliance with the Sponsoring
 370 Institution’s policies and procedures on employment
 371 and non-discrimination; ^(Core)
 372
- 373 **II.A.4.a).(13).(a)** **Fellows must not be required to sign a non-**
 374 **competition guarantee or restrictive covenant.**
 375 ^(Core)
 376
- 377 **II.A.4.a).(14)** document verification of program completion for all
 378 graduating fellows within 30 days; ^(Core)
 379
- 380 **II.A.4.a).(15)** provide verification of an individual fellow’s
 381 completion upon the fellow’s request, within 30 days;
 382 and, ^(Core)
 383

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 384
- 385 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
 386 Institution’s DIO before submitting information or
 387 requests to the ACGME, as required in the Institutional
 388 Requirements and outlined in the ACGME Program

389 Director's Guide to the Common Program
390 Requirements. (Core)
391

392 **II.B. Faculty**
393

394 *Faculty members are a foundational element of graduate medical education*
395 *– faculty members teach fellows how to care for patients. Faculty members*
396 *provide an important bridge allowing fellows to grow and become practice*
397 *ready, ensuring that patients receive the highest quality of care. They are*
398 *role models for future generations of physicians by demonstrating*
399 *compassion, commitment to excellence in teaching and patient care,*
400 *professionalism, and a dedication to lifelong learning. Faculty members*
401 *experience the pride and joy of fostering the growth and development of*
402 *future colleagues. The care they provide is enhanced by the opportunity to*
403 *teach. By employing a scholarly approach to patient care, faculty members,*
404 *through the graduate medical education system, improve the health of the*
405 *individual and the population.*

406
407 *Faculty members ensure that patients receive the level of care expected*
408 *from a specialist in the field. They recognize and respond to the needs of*
409 *the patients, fellows, community, and institution. Faculty members provide*
410 *appropriate levels of supervision to promote patient safety. Faculty*
411 *members create an effective learning environment by acting in a*
412 *professional manner and attending to the well-being of the fellows and*
413 *themselves.*
414

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

415
416 **II.B.1. For each participating site, there must be a sufficient number of**
417 **faculty members with competence to instruct and supervise all**
418 **fellows at that location. (Core)**
419

420 **II.B.2. Faculty members must:**

421 **II.B.2.a) be role models of professionalism; (Core)**

422 **II.B.2.b) demonstrate commitment to the delivery of safe, quality,**
423 **cost-effective, patient-centered care; (Core)**
424
425
426

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

427
428 **II.B.2.c) demonstrate a strong interest in the education of fellows; (Core)**
429

430 **II.B.2.d) devote sufficient time to the educational program to fulfill**
431 **their supervisory and teaching responsibilities; (Core)**

- 432
 433 **II.B.2.e)** administer and maintain an educational environment
 434 conducive to educating fellows; ^(Core)
 435
 436 **II.B.2.f)** pursue faculty development designed to enhance their skills;
 437 and, ^(Core)
 438
 439 **II.B.2.g)** encourage and support fellows in scholarly activities. ^(Core)
 440

441 **II.B.3. Faculty Qualifications**

442
 443 **II.B.3.a)** Faculty members must have appropriate qualifications in
 444 their field and hold appropriate institutional appointments.
 445 ^(Core)
 446

447 **II.B.3.b)** Subspecialty physician faculty members must:

448
 449 **II.B.3.b).(1)** have current certification in the subspecialty by the
 450 **American Boards** of Family Medicine, Internal Medicine,
 451 Psychiatry and Neurology, Otolaryngology – Head and
 452 Neck Surgery, Pediatrics, or Psychiatry **or the American**
 453 **Osteopathic Boards** of Family Physicians, Internal
 454 Medicine, Neurology and Psychiatry, or Ophthalmology
 455 and Otolaryngology – Head and Neck Surgery, **or**
 456 **possess qualifications judged acceptable to the**
 457 **Review Committee.** ^(Core)
 458

459 **II.B.3.c)** Any non-physician faculty members who participate in
 460 fellowship program education must be approved by the
 461 program director. ^(Core)
 462

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

- 463
 464 **II.B.3.d)** Any other specialty physician faculty members must have
 465 current certification in their specialty by the appropriate
 466 American Board of Medical Specialties (ABMS) member
 467 board or American Osteopathic Association (AOA) certifying
 468 board, or possess qualifications judged acceptable to the
 469 Review Committee. ^(Core)
 470
 471 **II.B.3.d).(1)** Faculty who are ABMS- or AOA-certified in anesthesiology,
 472 family medicine, internal medicine, neurology,
 473 otolaryngology, pediatrics, psychiatry, pulmonology, should
 474 be available to the program. ^(Core)

475
476
477
478
479
480
481
482
483

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. ^(Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

484
485
486
487
488
489
490
491
492
493
494
495
496
497
498
499

II.B.4.a) Core faculty members must be designated by the program director. ^(Core)

II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey. ^(Core)

II.B.4.c) In addition to the program director, there must be at least one core faculty member certified in sleep medicine by the American Board of Family Medicine, Internal Medicine, Psychiatry and Neurology, Otolaryngology – Head and Neck Surgery, Pediatrics, or Psychiatry or the American Osteopathic Board of Family Physicians, Internal Medicine, Neurology and Psychiatry, or Ophthalmology and Otolaryngology – Head and Neck Surgery. ^(Core)

II.B.4.d) For programs with more two fellows, there must be at least one core faculty member certified in sleep medicine by the American Board of Family Medicine, Internal Medicine, Psychiatry and Neurology, Otolaryngology – Head and Neck Surgery, Pediatrics, or Psychiatry or the American Osteopathic Board of Family Physicians, Internal Medicine, Neurology and Psychiatry, or Ophthalmology and Otolaryngology – Head and Neck Surgery for every 1.5 fellows. ^(Core)

II.C. Program Coordinator

II.C.1. There must be administrative support for program coordination. ^(Core)

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

513
514
515

II.D. Other Program Personnel

516 **The program, in partnership with its Sponsoring Institution, must jointly**
517 **ensure the availability of necessary personnel for the effective**
518 **administration of the program.** (Core)

519
520 II.D.1. There must be services available from other health care professionals,
521 including dietitians, language interpreters, nurses, occupational
522 therapists, physical therapists, and social workers. (Detail)

523
524 II.D.2. There must be appropriate and timely consultation from other specialties.
525 (Detail)

526

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

527

528 **III. Fellow Appointments**

529

530 **III.A. Eligibility Criteria**

531

532 **III.A.1. Eligibility Requirements – Fellowship Programs**

533

534 **All required clinical education for entry into ACGME-accredited**
535 **fellowship programs must be completed in an ACGME-accredited**
536 **residency program, an AOA-approved residency program, a**
537 **program with ACGME International (ACGME-I) Advanced Specialty**
538 **Accreditation, or a Royal College of Physicians and Surgeons of**
539 **Canada (RCPSC)-accredited or College of Family Physicians of**
540 **Canada (CFPC)-accredited residency program located in Canada.**
541 (Core)

542

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

543

544 **III.A.1.a) Fellowship programs must receive verification of each**
545 **entering fellow's level of competence in the required field,**
546 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
547 **Milestones evaluations from the core residency program.** (Core)

548

549 III.A.1.b) Prior to appointment in the program, each fellow must have
550 completed a core program in anesthesiology, child neurology,
551 family medicine, internal medicine, neurology, otolaryngology,
552 pediatrics, or psychiatry that satisfies the requirements in III.A.1.
553 (Core)

554

555 **III.A.1.c) Fellow Eligibility Exception**

556

557
558
559

584
585
586
587

The Review Committee for Internal Medicine, Neurology, Pediatrics and Psychiatry will allow the following exception to the fellowship eligibility requirements:

- III.A.1.c).(1)** **An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions:**
(Core)
- III.A.1.c).(1).(a)** **evaluation by the program director and fellowship selection committee of the applicant’s suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and,** (Core)
- III.A.1.c).(1).(b)** **review and approval of the applicant’s exceptional qualifications by the GMEC; and,**
(Core)
- III.A.1.c).(1).(c)** **verification of Educational Commission for Foreign Medical Graduates (ECFMG) certification.** (Core)
- III.A.1.c).(2)** **Applicants accepted through this exception must have an evaluation of their performance by the Clinical Competency Committee within 12 weeks of matriculation.** (Core)

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

588
589
590
591

- III.B.** **The program director must not appoint more fellows than approved by the Review Committee.** (Core)

592 III.B.1. All complement increases must be approved by the Review
593 Committee. ^(Core)

594
595 IV. Educational Program

596
597 *The ACGME accreditation system is designed to encourage excellence and*
598 *innovation in graduate medical education regardless of the organizational*
599 *affiliation, size, or location of the program.*

600
601 *The educational program must support the development of knowledgeable, skillful*
602 *physicians who provide compassionate care.*

603
604 *In addition, the program is expected to define its specific program aims consistent*
605 *with the overall mission of its Sponsoring Institution, the needs of the community*
606 *it serves and that its graduates will serve, and the distinctive capabilities of*
607 *physicians it intends to graduate. While programs must demonstrate substantial*
608 *compliance with the Common and subspecialty-specific Program Requirements, it*
609 *is recognized that within this framework, programs may place different emphasis*
610 *on research, leadership, public health, etc. It is expected that the program aims*
611 *will reflect the nuanced program-specific goals for it and its graduates; for*
612 *example, it is expected that a program aiming to prepare physician-scientists will*
613 *have a different curriculum from one focusing on community health.*

614
615 IV.A. The curriculum must contain the following educational components: ^(Core)

616
617 IV.A.1. a set of program aims consistent with the Sponsoring Institution's
618 mission, the needs of the community it serves, and the desired
619 distinctive capabilities of its graduates; ^(Core)

620
621 IV.A.1.a) The program's aims must be made available to program
622 applicants, fellows, and faculty members. ^(Core)

623
624 IV.A.2. competency-based goals and objectives for each educational
625 experience designed to promote progress on a trajectory to
626 autonomous practice in their subspecialty. These must be
627 distributed, reviewed, and available to fellows and faculty members;
628 ^(Core)

629
630 IV.A.3. delineation of fellow responsibilities for patient care, progressive
631 responsibility for patient management, and graded supervision in
632 their subspecialty; ^(Core)

633

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

634
635 IV.A.4. structured educational activities beyond direct patient care; and,
636 ^(Core)

637

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

638

639 **IV.A.5. advancement of fellows’ knowledge of ethical principles**
640 **foundational to medical professionalism. (Core)**

640

641

642 **IV.B. ACGME Competencies**

642

643

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

644

645 **IV.B.1. The program must integrate the following ACGME Competencies**
646 **into the curriculum: (Core)**

645

646

647

648 **IV.B.1.a) Professionalism**

648

649

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)

649

650

651

652

653 **IV.B.1.b) Patient Care and Procedural Skills**

653

654

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]’s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician’s well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

655

656 **IV.B.1.b).(1) Fellows must be able to provide patient care that is**
657 **compassionate, appropriate, and effective for the**
658 **treatment of health problems and the promotion of**
659 **health. (Core)**

656

657

658

659

660

661 **IV.B.1.b).(1).(a) Fellows must demonstrate competence in the**
662 **diagnosis and management of patients with sleep**

661

662

| | | |
|-----|-------------------------|-------------------------------------------------------|
| 663 | | disorders in outpatient and inpatient settings; and, |
| 664 | | (Core) |
| 665 | | |
| 666 | IV.B.1.b).(1).(b) | Fellows must demonstrate competence as a |
| 667 | | consultant in both inpatient and outpatient settings. |
| 668 | | (Core) |
| 669 | | |
| 670 | IV.B.1.b).(2) | Fellows must be able to perform all medical, |
| 671 | | diagnostic, and surgical procedures considered |
| 672 | | essential for the area of practice. (Core) |
| 673 | | |
| 674 | IV.B.1.b).(2).(a) | Fellows must demonstrate clinical competence in: |
| 675 | | |
| 676 | IV.B.1.b).(2).(a).(i) | conducting the tests unique to sleep |
| 677 | | medicine, including electrode and sensor |
| 678 | | application, calibrations, maintenance of |
| 679 | | signal integrity, and protocols for initiating |
| 680 | | and terminating the tests; (Core) |
| 681 | | |
| 682 | IV.B.1.b).(2).(a).(ii) | evaluating, diagnosing and |
| 683 | | comprehensively treating patients over the |
| 684 | | entire spectrum of pediatric and adult sleep |
| 685 | | and circadian rhythm disorders, as well as |
| 686 | | those medical, neurological, and psychiatric |
| 687 | | disorders that may present with sleep- |
| 688 | | related complaints in both the inpatient and |
| 689 | | outpatient settings; (Core) |
| 690 | | |
| 691 | IV.B.1.b).(2).(a).(iii) | integrating information obtained from patient |
| 692 | | history, physical examination, physiologic |
| 693 | | recordings, imaging studies as they relate to |
| 694 | | sleep disorders, psychometric testing, |
| 695 | | pulmonary function testing, and biochemical |
| 696 | | and molecular tests results to arrive at an |
| 697 | | accurate and timely diagnosis and treatment |
| 698 | | plan; (Core) |
| 699 | | |
| 700 | IV.B.1.b).(2).(a).(iv) | integrating relevant biological, |
| 701 | | psychological, social, economic, ethnic, and |
| 702 | | familial factors into the evaluation and |
| 703 | | treatment of their patients' sleep disorders; |
| 704 | | (Core) |
| 705 | | |
| 706 | IV.B.1.b).(2).(a).(v) | interpreting psychological and psychometric |
| 707 | | tests as they relate to sleep disorders. (Core) |
| 708 | | |
| 709 | IV.B.1.b).(2).(a).(vi) | performing cardiopulmonary resuscitation; |
| 710 | | (Core) |
| 711 | | |

| | | |
|-----|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| 712 | IV.B.1.b).(2).(a).(vii) | performing physical, neurological and mental status examinations relevant to the practice of sleep medicine; ^(Core) |
| 713 | | |
| 714 | | |
| 715 | | |
| 716 | IV.B.1.b).(2).(a).(viii) | planning and implementing therapeutic treatment, including pharmaceutical, medical device, behavioral, and surgical therapies; ^(Core) |
| 717 | | |
| 718 | | |
| 719 | | |
| 720 | | |
| 721 | IV.B.1.b).(2).(a).(ix) | selecting the appropriate sleep investigation(s) to facilitate a patient's diagnosis and treatment; and, ^(Core) |
| 722 | | |
| 723 | | |
| 724 | | |
| 725 | IV.B.1.b).(2).(a).(x) | scoring and interpreting: |
| 726 | | |
| 727 | IV.B.1.b).(2).(a).(x).(a) | polysomnograms; ^(Core) |
| 728 | | |
| 729 | IV.B.1.b).(2).(a).(x).(b) | multiple sleep latency and maintenance of wakefulness testing; ^(Core) |
| 730 | | |
| 731 | | |
| 732 | | |
| 733 | IV.B.1.b).(2).(a).(x).(c) | portable sleep monitor recordings; ^(Core) |
| 734 | | |
| 735 | | |
| 736 | IV.B.1.b).(2).(a).(x).(d) | actigraphy; ^(Core) |
| 737 | | |
| 738 | IV.B.1.b).(2).(a).(x).(e) | downloads from positive pressure devices; ^(Core) |
| 739 | | |
| 740 | | |
| 741 | IV.B.1.b).(2).(a).(x).(f) | sleep diaries; and, ^(Core) |
| 742 | | |
| 743 | IV.B.1.b).(2).(a).(x).(g) | standardized scales of sleepiness. ^(Core) |
| 744 | | |
| 745 | | |

IV.B.1.c)

Medical Knowledge

Fellows must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. ^(Core)

IV.B.1.c).(1)

Fellows must demonstrate knowledge of the neurobiology of sleep and wakefulness, sleep-related anatomy and physiology, and the neural structures mediating circadian rhythms. ^(Core)

This must include:

IV.B.1.c).(1).(a)

fundamental mechanisms of sleep, major theories in sleep medicine, and the generally-accepted facts of basic sleep mechanisms including: ^(Core)

| | | |
|-----|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 763 | | |
| 764 | IV.B.1.c).(1).(a).(i) | basic neurologic mechanisms controlling sleep and wakefulness; ^(Core) |
| 765 | | |
| 766 | | |
| 767 | IV.B.1.c).(1).(a).(ii) | cardiovascular physiology and pathophysiology related to sleep and sleep disorders; ^(Core) |
| 768 | | |
| 769 | | |
| 770 | | |
| 771 | IV.B.1.c).(1).(a).(iii) | changes in sleep across the life span; ^(Core) |

| 896 | | |
| 897 | IV.B.1.d) | Practice-based Learning and Improvement |
| 898 | | |
| 899 | | Fellows must demonstrate the ability to investigate and |
| 900 | | evaluate their care of patients, to appraise and assimilate |
| 901 | | scientific evidence, and to continuously improve patient care |
| 902 | | based on constant self-evaluation and lifelong learning. (Core) |
| 903 | | |

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

| 1025 | | |
| 1026 | IV.D. | Scholarship |
| 1027 | | |
| 1028 | | <i>Medicine is both an art and a science. The physician is a humanistic scientist who cares for patients. This requires the ability to think critically, evaluate the literature, appropriately assimilate new knowledge, and practice lifelong learning. The program and faculty must create an environment that fosters the acquisition of such skills through fellow participation in scholarly activities as defined in the subspecialty-specific Program Requirements. Scholarly activities may include discovery, integration, application, and teaching.</i> |
| 1029 | | |
| 1030 | | |
| 1031 | | |
| 1032 | | |
| 1033 | | |
| 1034 | | |
| 1035 | | |
| 1036 | | |
| 1037 | | <i>The ACGME recognizes the diversity of fellowships and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program's scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other programs might choose to utilize more classic forms of biomedical research as the focus for scholarship.</i> |
| 1038 | | |
| 1039 | | |
| 1040 | | |
| 1041 | | |
| 1042 | | |
| 1043 | | |
| 1044 | | |
| 1045 | | |
| 1046 | IV.D.1. | Program Responsibilities |
| 1047 | | |
| 1048 | IV.D.1.a) | The program must demonstrate evidence of scholarly activities, consistent with its mission(s) and aims. ^(Core) |
| 1049 | | |

 1074 organizations. ^(Detail)
 1075

1076 **IV.D.3. Fellow Scholarly Activity**

- 1077
 1078 IV.D.3.a) The program must provide an opportunity for each fellow to
 1079 participate in research or other scholarly activities. ^(Core)
 1080

1081 **V. Evaluation**

1082 **V.A. Fellow Evaluation**

1083 **V.A.1. Feedback and Evaluation**

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

Summative evaluation is *evaluating a fellow’s learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when

fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

- 1087
1088 **V.A.1.a)** Faculty members must directly observe, evaluate, and
1089 frequently provide feedback on fellow performance during
1090 each rotation or similar educational assignment. ^(Core)
1091

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

- 1092
1093 **V.A.1.b)** Evaluation must be documented at the completion of the
1094 assignment. ^(Core)
1095
1096 **V.A.1.b).(1)** Evaluations must be completed at least every three
1097 months. ^(Core)
1098
1099 **V.A.1.c)** The program must provide an objective performance
1100 evaluation based on the Competencies and the subspecialty-
1101 specific Milestones, and must: ^(Core)
1102
1103 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,
1104 patients, self, and other professional staff members);
1105 and, ^(Core)
1106
1107 **V.A.1.c).(2)** provide that information to the Clinical Competency
1108 Committee for its synthesis of progressive fellow
1109 performance and improvement toward unsupervised
1110 practice. ^(Core)
1111

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1112
1113 **V.A.1.d)** The program director or their designee, with input from the
1114 Clinical Competency Committee, must:

- 1115
 1116 V.A.1.d).(1) meet with and review with each fellow their
 1117 documented semi-annual evaluation of performance,
 1118 including progress along the subspecialty-specific
 1119 Milestones. ^(Core)
 1120
 1121 V.A.1.d).(2) develop plans for fellows failing to progress, following
 1122 institutional policies and procedures. ^(Core)
 1123

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1124
 1125 V.A.1.e) The evaluations of a fellow's performance must be accessible
 1126 for review by the fellow. ^(Core)
 1127
 1128 V.A.2. Final Evaluation
 1129
 1130 V.A.2.a) The program director must provide a final evaluation for each
 1131 fellow upon completion of the program. ^(Core)
 1132
 1133 V.A.2.a).(1) The subspecialty-specific Milestones, and when
 1134 applicable the subspecialty-specific Case Logs, must
 1135 be used as tools to ensure fellows are able to engage
 1136 in autonomous practice upon completion of the
 1137 program. ^(Core)
 1138
 1139 V.A.2.a).(2) The final evaluation must:
 1140
 1141 V.A.2.a).(2).(a) become part of the fellow's permanent record
 1142 maintained by the institution, and must be
 1143 accessible for review by the fellow in
 1144 accordance with institutional policy; ^(Core)
 1145
 1146 V.A.2.a).(2).(b) verify that the fellow has demonstrated the
 1147 knowledge, skills, and behaviors necessary to
 1148 enter autonomous practice; ^(Core)

- 1149
- 1150 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
1151 Competency Committee; and, ^(Core)
- 1152
- 1153 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of
1154 the program. ^(Core)
- 1155
- 1156 **V.A.3.** **A Clinical Competency Committee must be appointed by the**
1157 **program director.** ^(Core)
- 1158
- 1159 **V.A.3.a)** **At a minimum the Clinical Competency Committee must**
1160 **include three members, at least one of whom is a core faculty**
1161 **member. Members must be faculty members from the same**
1162 **program or other programs, or other health professionals**
1163 **who have extensive contact and experience with the**
1164 **program’s fellows.** ^(Core)
- 1165
- 1166 **V.A.3.b)** **The Clinical Competency Committee must:**
- 1167
- 1168 **V.A.3.b).(1)** **review all fellow evaluations at least semi-annually;**
1169 ^(Core)
- 1170
- 1171 **V.A.3.b).(2)** **determine each fellow’s progress on achievement of**
1172 **the subspecialty-specific Milestones; and,** ^(Core)
- 1173
- 1174 **V.A.3.b).(3)** **meet prior to the fellows’ semi-annual evaluations and**
1175 **advise the program director regarding each fellow’s**
1176 **progress.** ^(Core)
- 1177
- 1178 **V.B.** **Faculty Evaluation**
- 1179
- 1180 **V.B.1.** **The program must have a process to evaluate each faculty**
1181 **member’s performance as it relates to the educational program at**
1182 **least annually.** ^(Core)
- 1183

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The

process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1184
1185 **V.B.1.a)** This evaluation must include a review of the faculty member's
1186 clinical teaching abilities, engagement with the educational
1187 program, participation in faculty development related to their
1188 skills as an educator, clinical performance, professionalism,
1189 and scholarly activities. (Core)
1190
1191 **V.B.1.b)** This evaluation must include written, confidential evaluations
1192 by the fellows. (Core)
1193
1194 **V.B.2.** Faculty members must receive feedback on their evaluations at least
1195 annually. (Core)
1196

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1197
1198 **V.C. Program Evaluation and Improvement**
1199
1200 **V.C.1.** The program director must appoint the Program Evaluation
1201 Committee to conduct and document the Annual Program
1202 Evaluation as part of the program's continuous improvement
1203 process. (Core)
1204
1205 **V.C.1.a)** The Program Evaluation Committee must be composed of at
1206 least two program faculty members, at least one of whom is a
1207 core faculty member, and at least one fellow. (Core)
1208
1209 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
1210
1211 **V.C.1.b).(1)** acting as an advisor to the program director, through
1212 program oversight; (Core)
1213
1214 **V.C.1.b).(2)** review of the program's self-determined goals and
1215 progress toward meeting them; (Core)
1216
1217 **V.C.1.b).(3)** guiding ongoing program improvement, including
1218 development of new goals, based upon outcomes;
1219 and, (Core)
1220
1221 **V.C.1.b).(4)** review of the current operating environment to identify
1222 strengths, challenges, opportunities, and threats as
1223 related to the program's mission and aims. (Core)
1224

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

- 1225
1226 V.C.1.c) The Program Evaluation Committee should consider the
1227 following elements in its assessment of the program:
1228
1229 V.C.1.c).(1) fellow performance; ^(Core)
1230
1231 V.C.1.c).(2) faculty development; and, ^(Core)
1232
1233 V.C.1.c).(3) progress on the previous year's action plan(s). ^(Core)
1234
1235 V.C.1.d) The Program Evaluation Committee must evaluate the
1236 program's mission and aims, strengths, areas for
1237 improvement, and threats. ^(Core)
1238
1239 V.C.1.e) The annual review, including the action plan, must:
1240
1241 V.C.1.e).(1) be distributed to and discussed with the members of
1242 the teaching faculty and the fellows; and, ^(Core)
1243
1244 V.C.1.e).(2) be submitted to the DIO. ^(Core)
1245
1246 V.C.2. The program must participate in a Self-Study prior to its 10-Year
1247 Accreditation Site Visit. ^(Core)
1248
1249 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
1250 ^(Core)
1251

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1252
1253 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
1254 *who seek and achieve board certification. One measure of the*
1255 *effectiveness of the educational program is the ultimate pass rate.*
1256
1257 *The program director should encourage all eligible program*
1258 *graduates to take the certifying examination offered by the*

- 1259 *applicable American Board of Medical Specialties (ABMS) member*
 1260 *board or American Osteopathic Association (AOA) certifying board.*
 1261
- 1262 **V.C.3.a)** For subspecialties in which the ABMS member board and/or
 1263 AOA certifying board offer(s) an annual written exam, in the
 1264 preceding three years, the program’s aggregate pass rate of
 1265 those taking the examination for the first time must be higher
 1266 than the bottom fifth percentile of programs in that
 1267 subspecialty. ^{(Outcome)‡}
 1268
- 1269 **V.C.3.b)** For subspecialties in which the ABMS member board and/or
 1270 AOA certifying board offer(s) a biennial written exam, in the
 1271 preceding six years, the program’s aggregate pass rate of
 1272 those taking the examination for the first time must be higher
 1273 than the bottom fifth percentile of programs in that
 1274 subspecialty. ^(Outcome)
 1275
- 1276 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
 1277 AOA certifying board offer(s) an annual oral exam, in the
 1278 preceding three years, the program’s aggregate pass rate of
 1279 those taking the examination for the first time must be higher
 1280 than the bottom fifth percentile of programs in that
 1281 subspecialty. ^(Outcome)
 1282
- 1283 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
 1284 AOA certifying board offer(s) a biennial oral exam, in the
 1285 preceding six years, the program’s aggregate pass rate of
 1286 those taking the examination for the first time must be higher
 1287 than the bottom fifth percentile of programs in that
 1288 subspecialty. ^(Outcome)
 1289
- 1290 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
 1291 whose graduates over the time period specified in the
 1292 requirement have achieved an 80 percent pass rate will have
 1293 met this requirement, no matter the percentile rank of the
 1294 program for pass rate in that subspecialty. ^(Outcome)
 1295

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1296
 1297 **V.C.3.f)** Programs must report, in ADS, board certification status
 1298 annually for the cohort of board-eligible fellows that
 1299 graduated seven years earlier. ^(Core)

1300

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.
(Core)

1364 VI.A.1.a).(1).(b) The program must have a structure that
1365 promotes safe, interprofessional, team-based
1366 care. ^(Core)
1367

1368 VI.A.1.a).(2) Education on Patient Safety
1369
1370 Programs must provide formal educational activities
1371 that promote patient safety-related goals, tools, and
1372 techniques. ^(Core)
1373

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1374 VI.A.1.a).(3) Patient Safety Events
1375
1376 *Reporting, investigation, and follow-up of adverse*
1377 *events, near misses, and unsafe conditions are pivotal*
1378 *mechanisms for improving patient safety, and are*
1379 *essential for the success of any patient safety*
1380 *program. Feedback and experiential learning are*
1381 *essential to developing true competence in the ability*
1382 *to identify causes and institute sustainable systems-*
1383 *based changes to ameliorate patient safety*
1384 *vulnerabilities.*
1385
1386

1387 VI.A.1.a).(3).(a) Residents, fellows, faculty members, and other
1388 clinical staff members must:

1389 VI.A.1.a).(3).(a).(i) know their responsibilities in reporting
1390 patient safety events at the clinical site;
1391 ^(Core)
1392

1393 VI.A.1.a).(3).(a).(ii) know how to report patient safety
1394 events, including near misses, at the
1395 clinical site; and, ^(Core)
1396

1397 VI.A.1.a).(3).(a).(iii) be provided with summary information
1398 of their institution's patient safety
1399 reports. ^(Core)
1400

1401 VI.A.1.a).(3).(b) Fellows must participate as team members in
1402 real and/or simulated interprofessional clinical
1403 patient safety activities, such as root cause
1404 analyses or other activities that include
1405 analysis, as well as formulation and
1406 implementation of actions. ^(Core)
1407

1408 VI.A.1.a).(4) Fellow Education and Experience in Disclosure of
1409 Adverse Events
1410
1411

1412 *Patient-centered care requires patients, and when*
1413 *appropriate families, to be apprised of clinical*
1414 *situations that affect them, including adverse events.*
1415 *This is an important skill for faculty physicians to*
1416 *model, and for fellows to develop and apply.*

1418 VI.A.1.a).(4).(a) All fellows must receive training in how to
1419 disclose adverse events to patients and
1420 families. ^(Core)

1421 VI.A.1.a).(4).(b) Fellows should have the opportunity to
1422 participate in the disclosure of patient safety
1423 events, real or simulated. ^(Detail)

1424 VI.A.1.b) Quality Improvement

1425 VI.A.1.b).(1) Education in Quality Improvement

1428 *A cohesive model of health care includes quality-*
1429 *related goals, tools, and techniques that are necessary*
1430 *in order for health care professionals to achieve*
1431 *quality improvement goals.*

1432 VI.A.1.b).(1).(a) Fellows must receive training and experience in
1433 quality improvement processes, including an
1434 understanding of health care disparities. ^(Core)

1435 VI.A.1.b).(2) Quality Metrics

1436 *Access to data is essential to prioritizing activities for*
1437 *care improvement and evaluating success of*
1438 *improvement efforts.*

1439 VI.A.1.b).(2).(a) Fellows and faculty members must receive data
1440 on quality metrics and benchmarks related to
1441 their patient populations. ^(Core)

1442 VI.A.1.b).(3) Engagement in Quality Improvement Activities

1443 *Experiential learning is essential to developing the*
1444 *ability to identify and institute sustainable systems-*
1445 *based changes to improve patient care.*

1446 VI.A.1.b).(3).(a) Fellows must have the opportunity to
1447 participate in interprofessional quality
1448 improvement activities. ^(Core)

1449 VI.A.1.b).(3).(a).(i) This should include activities aimed at
1450 reducing health care disparities. ^(Detail)

1451 VI.A.2. Supervision and Accountability

- 1463
1464 **VI.A.2.a)** *Although the attending physician is ultimately responsible for*
1465 *the care of the patient, every physician shares in the*
1466 *responsibility and accountability for their efforts in the*
1467 *provision of care. Effective programs, in partnership with*
1468 *their Sponsoring Institutions, define, widely communicate,*
1469 *and monitor a structured chain of responsibility and*
1470 *accountability as it relates to the supervision of all patient*
1471 *care.*
- 1472
1473 *Supervision in the setting of graduate medical education*
1474 *provides safe and effective care to patients; ensures each*
1475 *fellow's development of the skills, knowledge, and attitudes*
1476 *required to enter the unsupervised practice of medicine; and*
1477 *establishes a foundation for continued professional growth.*
1478
- 1479 **VI.A.2.a).(1)** Each patient must have an identifiable and
1480 appropriately-credentialed and privileged attending
1481 physician (or licensed independent practitioner as
1482 specified by the applicable Review Committee) who is
1483 responsible and accountable for the patient's care.
1484 (Core)
- 1485
1486 **VI.A.2.a).(1).(a)** This information must be available to fellows,
1487 faculty members, other members of the health
1488 care team, and patients. (Core)
- 1489
1490 **VI.A.2.a).(1).(b)** Fellows and faculty members must inform each
1491 patient of their respective roles in that patient's
1492 care when providing direct patient care. (Core)
- 1493
1494 **VI.A.2.b)** *Supervision may be exercised through a variety of methods.*
1495 *For many aspects of patient care, the supervising physician*
1496 *may be a more advanced fellow. Other portions of care*
1497 *provided by the fellow can be adequately supervised by the*
1498 *appropriate availability of the supervising faculty member or*
1499 *fellow, either on site or by means of telecommunication*
1500 *technology. Some activities require the physical presence of*
1501 *the supervising faculty member. In some circumstances,*
1502 *supervision may include post-hoc review of fellow-delivered*
1503 *care with feedback.*
1504

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

| | | |
|------|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1505 | | |
| 1506 | VI.A.2.b).(1) | The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow’s level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. (Core) |
| 1507 | | |
| 1508 | | |
| 1509 | | |
| 1510 | | |
| 1511 | | |
| 1512 | | |
| 1513 | VI.A.2.b).(2) | The program must define when physical presence of a supervising physician is required. (Core) |
| 1514 | | |
| 1515 | | |
| 1516 | VI.A.2.c) | Levels of Supervision |
| 1517 | | |
| 1518 | | To promote appropriate fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: (Core) |
| 1519 | | |
| 1520 | | |
| 1521 | | |
| 1522 | VI.A.2.c).(1) | Direct Supervision: |
| 1523 | | |
| 1524 | VI.A.2.c).(1).(a) | the supervising physician is physically present with the fellow during the key portions of the patient interaction. (Core) |
| 1525 | | |
| 1526 | | |
| 1527 | | |
| 1528 | VI.A.2.c).(2) | Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision. (Core) |
| 1529 | | |
| 1530 | | |
| 1531 | | |
| 1532 | | |
| 1533 | | |
| 1534 | VI.A.2.c).(3) | Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. (Core) |
| 1535 | | |
| 1536 | | |
| 1537 | | |
| 1538 | VI.A.2.d) | The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each fellow must be assigned by the program director and faculty members. (Core) |
| 1539 | | |
| 1540 | | |
| 1541 | | |
| 1542 | | |
| 1543 | VI.A.2.d).(1) | The program director must evaluate each fellow’s abilities based on specific criteria, guided by the Milestones. (Core) |
| 1544 | | |
| 1545 | | |
| 1546 | | |
| 1547 | VI.A.2.d).(2) | Faculty members functioning as supervising physicians must delegate portions of care to fellows based on the needs of the patient and the skills of each fellow. (Core) |
| 1548 | | |
| 1549 | | |
| 1550 | | |
| 1551 | | |
| 1552 | VI.A.2.d).(3) | Fellows should serve in a supervisory role to junior fellows and residents in recognition of their progress toward independence, based on the needs of each |
| 1553 | | |
| 1554 | | |

1555 patient and the skills of the individual resident or
1556 fellow. ^(Detail)

1557
1558 **VI.A.2.e) Programs must set guidelines for circumstances and events**
1559 **in which fellows must communicate with the supervising**
1560 **faculty member(s).** ^(Core)

1561
1562 **VI.A.2.e).(1) Each fellow must know the limits of their scope of**
1563 **authority, and the circumstances under which the**
1564 **fellow is permitted to act with conditional**
1565 **independence.** ^(Outcome)
1566

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1567
1568 **VI.A.2.f) Faculty supervision assignments must be of sufficient**
1569 **duration to assess the knowledge and skills of each fellow**
1570 **and to delegate to the fellow the appropriate level of patient**
1571 **care authority and responsibility.** ^(Core)
1572

1573 **VI.B. Professionalism**

1574
1575 **VI.B.1. Programs, in partnership with their Sponsoring Institutions, must**
1576 **educate fellows and faculty members concerning the professional**
1577 **responsibilities of physicians, including their obligation to be**
1578 **appropriately rested and fit to provide the care required by their**
1579 **patients.** ^(Core)
1580

1581 **VI.B.2. The learning objectives of the program must:**

1582
1583 **VI.B.2.a) be accomplished through an appropriate blend of supervised**
1584 **patient care responsibilities, clinical teaching, and didactic**
1585 **educational events;** ^(Core)
1586

1587 **VI.B.2.b) be accomplished without excessive reliance on fellows to**
1588 **fulfill non-physician obligations; and,** ^(Core)
1589

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1590
1591 **VI.B.2.c) ensure manageable patient care responsibilities.** ^(Core)

1592

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1593

1594

VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. ^(Core)

1595

1596

1597

1598

VI.B.4. Fellows and faculty members must demonstrate an understanding of their personal role in the:

1599

1600

VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)

1601

1602

VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; ^(Outcome)

1603

1604

1605

1606

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1607

1608

VI.B.4.c) assurance of their fitness for work, including: ^(Outcome)

1609

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1610

VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, ^(Outcome)

1611

1612

1613

VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. ^(Outcome)

1614

1615

1616

1617

VI.B.4.d) commitment to lifelong learning; ^(Outcome)

1618

1619

VI.B.4.e) monitoring of their patient care performance improvement indicators; and, ^(Outcome)

1620

1621

1622

VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. ^(Outcome)

1623

1624

1625

1626 VI.B.5. All fellows and faculty members must demonstrate responsiveness
1627 to patient needs that supersedes self-interest. This includes the
1628 recognition that under certain circumstances, the best interests of
1629 the patient may be served by transitioning that patient's care to
1630 another qualified and rested provider. ^(Outcome)
1631

1632 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
1633 provide a professional, equitable, respectful, and civil environment
1634 that is free from discrimination, sexual and other forms of
1635 harassment, mistreatment, abuse, or coercion of students, fellows,
1636 faculty, and staff. ^(Core)
1637

1638 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1639 have a process for education of fellows and faculty regarding
1640 unprofessional behavior and a confidential process for reporting,
1641 investigating, and addressing such concerns. ^(Core)
1642

1643 VI.C. Well-Being

1644
1645 *Psychological, emotional, and physical well-being are critical in the*
1646 *development of the competent, caring, and resilient physician and require*
1647 *proactive attention to life inside and outside of medicine. Well-being*
1648 *requires that physicians retain the joy in medicine while managing their*
1649 *own real-life stresses. Self-care and responsibility to support other*
1650 *members of the health care team are important components of*
1651 *professionalism; they are also skills that must be modeled, learned, and*
1652 *nurtured in the context of other aspects of fellowship training.*
1653

1654 *Fellows and faculty members are at risk for burnout and depression.*
1655 *Programs, in partnership with their Sponsoring Institutions, have the same*
1656 *responsibility to address well-being as other aspects of resident*
1657 *competence. Physicians and all members of the health care team share*
1658 *responsibility for the well-being of each other. For example, a culture which*
1659 *encourages covering for colleagues after an illness without the expectation*
1660 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
1661 *clinical learning environment models constructive behaviors, and prepares*
1662 *fellows with the skills and attitudes needed to thrive throughout their*
1663 *careers.*
1664

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These

include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:

VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; ^(Core)

VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; ^(Core)

VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; ^(Core)

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1682
1683
1684
1685

VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, ^(Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1686
1687
1688
1689
1690
1691

VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. ^(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; ^(Core)

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1718
1719
1720

VI.C.1.e).(2) provide access to appropriate tools for self-screening; and, ^(Core)

VI.C.1.e).(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. ^(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1721
- 1722 **VI.C.2.** There are circumstances in which fellows may be unable to attend
- 1723 work, including but not limited to fatigue, illness, family
- 1724 emergencies, and parental leave. Each program must allow an
- 1725 appropriate length of absence for fellows unable to perform their
- 1726 patient care responsibilities. ^(Core)
- 1727
- 1728 **VI.C.2.a)** The program must have policies and procedures in place to
- 1729 ensure coverage of patient care. ^(Core)
- 1730
- 1731 **VI.C.2.b)** These policies must be implemented without fear of negative
- 1732 consequences for the fellow who is or was unable to provide
- 1733 the clinical work. ^(Core)
- 1734

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1735
- 1736 **VI.D. Fatigue Mitigation**
- 1737
- 1738 **VI.D.1. Programs must:**
- 1739
- 1740 **VI.D.1.a)** educate all faculty members and fellows to recognize the
- 1741 signs of fatigue and sleep deprivation; ^(Core)
- 1742
- 1743 **VI.D.1.b)** educate all faculty members and fellows in alertness
- 1744 management and fatigue mitigation processes; and, ^(Core)
- 1745
- 1746 **VI.D.1.c)** encourage fellows to use fatigue mitigation processes to
- 1747 manage the potential negative effects of fatigue on patient
- 1748 care and learning. ^(Detail)
- 1749

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1750

- 1751 **VI.D.2.** Each program must ensure continuity of patient care, consistent
 1752 with the program’s policies and procedures referenced in VI.C.2–
 1753 VI.C.2.b), in the event that a fellow may be unable to perform their
 1754 patient care responsibilities due to excessive fatigue. ^(Core)
 1755
- 1756 **VI.D.3.** The program, in partnership with its Sponsoring Institution, must
 1757 ensure adequate sleep facilities and safe transportation options for
 1758 fellows who may be too fatigued to safely return home. ^(Core)
 1759
- 1760 **VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
- 1761
- 1762 **VI.E.1. Clinical Responsibilities**
- 1763
- 1764 The clinical responsibilities for each fellow must be based on PGY
 1765 level, patient safety, fellow ability, severity and complexity of patient
 1766 illness/condition, and available support services. ^(Core)
 1767

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

- 1768
- 1769 **VI.E.2. Teamwork**
- 1770
- 1771 Fellows must care for patients in an environment that maximizes
 1772 communication. This must include the opportunity to work as a
 1773 member of effective interprofessional teams that are appropriate to
 1774 the delivery of care in the subspecialty and larger health system.
 1775 ^(Core)
 1776
- 1777 **VI.E.2.a)** Contributors to effective interprofessional teams may include
 1778 consulting physicians, psychologists, psychiatric nurses, social
 1779 workers and other professional and paraprofessional mental
 1780 health personnel involved in the evaluation and treatment of
 1781 patients. ^(Detail)
 1782
- 1783 **VI.E.3. Transitions of Care**
- 1784
- 1785 **VI.E.3.a)** Programs must design clinical assignments to optimize
 1786 transitions in patient care, including their safety, frequency,
 1787 and structure. ^(Core)
 1788
- 1789 **VI.E.3.b)** Programs, in partnership with their Sponsoring Institutions,
 1790 must ensure and monitor effective, structured hand-over
 1791 processes to facilitate both continuity of care and patient
 1792 safety. ^(Core)
 1793

- 1794 VI.E.3.c) Programs must ensure that fellows are competent in
 1795 communicating with team members in the hand-over process.
 1796 (Outcome)
 1797
- 1798 VI.E.3.d) Programs and clinical sites must maintain and communicate
 1799 schedules of attending physicians and fellows currently
 1800 responsible for care. (Core)
 1801
- 1802 VI.E.3.e) Each program must ensure continuity of patient care,
 1803 consistent with the program’s policies and procedures
 1804 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may
 1805 be unable to perform their patient care responsibilities due to
 1806 excessive fatigue or illness, or family emergency. (Core)
 1807
- 1808 VI.F. Clinical Experience and Education
 1809
- 1810 *Programs, in partnership with their Sponsoring Institutions, must design*
 1811 *an effective program structure that is configured to provide fellows with*
 1812 *educational and clinical experience opportunities, as well as reasonable*
 1813 *opportunities for rest and personal activities.*
 1814

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

- 1815
- 1816 VI.F.1. Maximum Hours of Clinical and Educational Work per Week
 1817
- 1818 Clinical and educational work hours must be limited to no more than
 1819 80 hours per week, averaged over a four-week period, inclusive of all
 1820 in-house clinical and educational activities, clinical work done from
 1821 home, and all moonlighting. (Core)
 1822

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling
 While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their

scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1823
1824
1825

VI.F.2. Mandatory Time Free of Clinical Work and Education

1826 VI.F.2.a) The program must design an effective program structure that
1827 is configured to provide fellows with educational
1828 opportunities, as well as reasonable opportunities for rest
1829 and personal well-being. ^(Core)

1830
1831 VI.F.2.b) Fellows should have eight hours off between scheduled
1832 clinical work and education periods. ^(Detail)

1833
1834 VI.F.2.b).(1) There may be circumstances when fellows choose to
1835 stay to care for their patients or return to the hospital
1836 with fewer than eight hours free of clinical experience
1837 and education. This must occur within the context of
1838 the 80-hour and the one-day-off-in-seven
1839 requirements. ^(Detail)

1840

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1841
1842 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
1843 education after 24 hours of in-house call. ^(Core)

1844

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1845
1846 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
1847 seven free of clinical work and required education (when
1848 averaged over four weeks). At-home call cannot be assigned
1849 on these free days. ^(Core)

1850

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is

defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. ^(Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. ^(Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. ^(Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

VI.F.4. Clinical and Educational Work Hour Exceptions

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; ^(Detail)

VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, ^(Detail)

VI.F.4.a).(3) to attend unique educational events. ^(Detail)

VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and

that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

VI.F.4.c) **A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.**

The Review Committee will not consider requests for exceptions to the 80-hour limit to the fellows' work week.

VI.F.4.c).(1) **In preparing a request for an exception, the program director must follow the clinical and educational work hour exception policy from the *ACGME Manual of Policies and Procedures*. (Core)**

VI.F.4.c).(2) **Prior to submitting the request to the Review Committee, the program director must obtain approval from the Sponsoring Institution's GMEC and DIO. (Core)**

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

VI.F.6. In-House Night Float

Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. (Core)

1921 VI.F.6.a) Sleep medicine fellowships must not average in-house call over a
1922 four-week period. ^(Core)
1923

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

1924
1925 **VI.F.7. Maximum In-House On-Call Frequency**
1926
1927 **Fellows must be scheduled for in-house call no more frequently than**
1928 **every third night (when averaged over a four-week period). ^(Core)**
1929

1930 **VI.F.8. At-Home Call**

1931
1932 **VI.F.8.a) Time spent on patient care activities by fellows on at-home**
1933 **call must count toward the 80-hour maximum weekly limit.**
1934 **The frequency of at-home call is not subject to the every-**
1935 **third-night limitation, but must satisfy the requirement for one**
1936 **day in seven free of clinical work and education, when**
1937 **averaged over four weeks. ^(Core)**

1938
1939 **VI.F.8.a).(1) At-home call must not be so frequent or taxing as to**
1940 **preclude rest or reasonable personal time for each**
1941 **fellow. ^(Core)**

1942
1943 **VI.F.8.b) Fellows are permitted to return to the hospital while on at-**
1944 **home call to provide direct care for new or established**
1945 **patients. These hours of inpatient patient care must be**
1946 **included in the 80-hour maximum weekly limit. ^(Detail)**
1947

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.

1948
1949 ***
1950 ***Core Requirements:** Statements that define structure, resource, or process elements
1951 essential to every graduate medical educational program.
1952
1953 **†Detail Requirements:** Statements that describe a specific structure, resource, or process, for
1954 achieving compliance with a Core Requirement. Programs and sponsoring institutions in
1955 substantial compliance with the Outcome Requirements may utilize alternative or innovative
1956 approaches to meet Core Requirements.

1957

1958 †**Outcome Requirements:** Statements that specify expected measurable or observable
1959 attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their
1960 graduate medical education.

1961

1962 **Osteopathic Recognition**

1963 For programs with or applying for Osteopathic Recognition, the Osteopathic Recognition
1964 Requirements also apply (www.acgme.org/OsteopathicRecognition).
