Frequently Asked Questions: Orthopaedic Surgery of the Spine Review Committee for Orthopaedic Surgery ACGME

Question	Answer
The Learning and Working Environme	nt
What skills should members of the interprofessional caregiver team have?	All members of the interprofessional caregiver team should be provided instruction in:
	1. communication, so that if all required tasks cannot be accomplished in a timely
[Program Requirement: VI.E.2.]	 fashion, appropriate methods are established to hand off the remaining task(s) to another team member at the end of a clinical experience and education period; compliance with clinical and educational work hours limits imposed at the various levels of education;
	3. prioritization of tasks as the dynamics of a patient's needs change;
	 recognition of and sensitivity to the experience and competency of other team members;
	 recognizing when an individual becomes overburdened with responsibilities that cannot be accomplished within an allotted time period;
	6. signs and symptoms of fatigue not only in oneself, but in other team members;
	7. team development; and,
	8. time management.
